Subject Index 1991

A.c. polarography
Investigation of the kinetic behaviour of captopril followed by alternating current polarography, 3505
A.c. response
Optical and electrical a.c. response of polyaniline films, 853
***Ab initio* calculation**
Structure of the azetidine radical cation and the neutral azetidin-1-yl radical: an *ab initio* and electron paramagnetic resonance study, 1083
Some *ab initio* valence-bond calculations for NO_2, 1089
Ab initio study of the cyclopropane–hydrogen fluoride dimer, 1293
Hydrogen bonding and tautomerism in 3-substituted β-thioxoketones: an *ab initio* molecular orbital study, 1297
Theoretical approach to the solvation of nitroenamines and the influence of solvation on isomeric equilibria, 1719
Ab initio molecular orbital calculations of conformational energies of ethyl methyl ether: Basis set and electron correlation effects, 3207
Geometric conformation of the oxirane hydrogen halide dimers from *ab initio* calculations, 3495
Classical dynamics of intramolecular energy flow in ethane, 3595
Absorption spectroscopy
Picosecond time-resolved absorption and emission studies of pyrazolotriazole azomethine dyes, 3479
Observation and simulation of the energy-level scheme of the Pr^{3+} ion in REOCl, 3625
Acetic acid
Decomposition of gaseous acetic acid on SnO_2, 2647
Acetone
Multiphoton ionisation spectroscopy of the 3s(2 + 2, 1) and 4s(3 + 1) Rydberg states of acetone: Evidence for a molecular valence state at 153 nm, 2891
Acetone ketyl radical
Photochemical formation of colloidal silver: peptizing action of acetone ketyl radical, 1905
Acetonitrile
Dynamics of acetonitrile crystals and clusters, 539
Acetonitrile–methanol mixture
Enthalpies of transfer of some non-electrolytes from acetonitrile to acetonitrile–methanol mixtures, 2443
Acid–base equilibrium
Acid–base and cationic homoconjugation equilibria of substituted pyridine *N*-oxides in acetone, 3853
Acid–base properties
Acid–base properties of modified aluminas, 1425
Acid-dissociation constant
Acid–base and cationic homoconjugation equilibria in nitromethane solutions of substituted pyridine *N*-oxide systems, 1729
Activated carbon
Thermodynamics of adsorption from solution: adsorption by activated carbon of the three binary systems involving n-butanol, n-heptane and n-dodecane, 755
Characterization of active carbons by combined preadsorption and immersion techniques, 1233
Application of α and *n* plots to N_2 adsorption isotherms of activated carbons. 1237
Simulation of small-angle X-ray scattering behaviour of activated carbon fibres adsorbing water, 2763
Interdependence of different parameters characterizing the chemistry of an activated carbon surface, 3557
Adsorption of pure vapours of ethanol and *n*-heptane and their liquid mixtures on activated carbon, 3799
Adhesion
Surface reaction of 2-mercaptobenzimidazole on metals and its application in adhesion promotion, 1229
Adsorbent
Ex-hydroxide magnesium oxide as a model adsorbent for investigation of micropore filling mechanisms, 1[illegible]
Adsorption
Adsorption of CO, intermediately formed in electrochemical reduction of CO_2, at a copper electrode, 125
Benzene–ammonia coadsorption on TiO_2 (anatase), 175
Surface fractal dimension of microporous carbon fibres by nitrogen adsorption, 179
Surface species on a palladium/zirconia CO oxidation catalyst prepared from a glassy metal precursor: characterization by diffuse reflectance FTIR spectroscopy, 333
Infrared spectroscopic study of ammonia and nitric oxide adsorption and reactivity on a Ru/TiO_2 catalyst: effect of oxo-reducing treatments, 337
Hydrophilic and hydrophobic sites on dehydrated crystalline and amorphous silicas, 497
Fourier-transform infrared, attenuated total reflection spectroscopy: A complementary tool for the investigation of the adsorption of CO on thin metal layers, 637
Infrared and Raman study of the adsorption of NH_3, pyridine, NO and NO_2 on anatase, 643
Thermodynamics of adsorption from solution: adsorption by activated carbon of the three binary systems involving n-butanol, n-heptane and n-dodecane, 755
Adsorption of argon on alumina and calculation of the adsorption potential, 885
State and localization of cobalt, nickel and copper ions adsorbed on titania (anatase), 907
Infrared spectroscopic study of O_2^- on the surface of Cr_2O_3: the effect of surface pretreatment, 913
Fourier-transform infrared studies of carbon monoxide adsorption on platinum and palladium hydrosols: Influence of pH, 1221
Application of α and *n* plots to N_2 adsorption isotherms of activated carbons, 1237
Liquid-phase adsorption of binary ethanol–water mixtures on high-silica adsorbents, 1279
Liquid-phase adsorption of ethanol–water mixtures on NaZSM-5 zeolite with inorganic and organic binders, 1283
Characterization of $AlPO_4$-14 by magic-angle-spinning nuclear magnetic resonance spectroscopy and thermoanalytical and adsorption measurements, 1433
Infrared study of CO adsorption on reduced and oxidised silica-supported copper catalysts, 1467
Infrared study of the reaction between nitrogen oxides and ammonia on titania-supported vanadia catalysts, 1473
Infrared study of CO adsorption on Pt–Rh/Al_2O_3 catalysts, 1479
Infrared study of NO_2–CO reactions over supported rhodium and platinum catalysts, 1485
Infrared study of the adsorption of formic acid on silica-supported copper and oxidised copper catalysts, 1491
Infrared and Raman study of the adsorption of nitrogen oxides on titania-supported vanadia catalysts, 1617
Multiple-pulse ^1H nuclear magnetic resonance investigations of titania and ruthenium dispersed on titania, 1917
Role of iron impurities in formation of electron-accepting sites in H-ZSM-5 zeolites: ^{15}N nuclear magnetic resonance and ^{15}N nuclear magnetic relaxation of adsorbed N_2 and N_2O, 2247
CO Fourier-transform infrared study of metallocenes on silica gel and $AlPO_4$, 2473
Infrared spectroscopic study of the interaction of cations in zeolites with simple molecular probes. Part 1.—Adsorption of molecular hydrogen on alkaline forms of zeolites as a test for localization sites, 2675
Interfacial film of surfactant adsorbed at a solid/liquid interface, 2745
Simulation of small-angle X-ray scattering behaviour of activated carbon fibres adsorbing water, 2763
Infrared study of methyl formate and formaldehyde adsorption on reduced and oxidised silica-supported copper catalysts, 2785
Infrared study of the adsorption of methanol on oxidised and reduced Cu/SiO_2 catalysts, 2795
Effects of exchangeable cations on the adsorption properties of Na^+ mordenite, 2849
Characterization of adsorbed layers of a disordered coil protein on polystyrene latex, 3043
A novel technique for the calculation of site energy densities from gas adsorption isotherm data, 3051
Adsorption of carbonate-derived molecules on the surface of carbonate-containing apatites, 3137
Electron paramagnetic resonance study of radical formation from cyclopentene and dimethylacetylene following adsorption onto H-mordenite, 3179
Iodine adsorption on InSb(001) at room temperature and low temperature: Surface reaction, 3259
Adsorption of (*Z*)-but-2-ene on iron oxide films, 3285
Influence of functional groups and substituents on the adsorption of aromatic non-ionic surfactants at the Hg/ethylene glycol interface, 3399
Wetting transitions and capillary condensation in slit-like pores: Comparison of simulation and density functional theory, 3415
Infrared study of CO adsorption on Pt–Rh/SiO_2 catalysts, 3435
Fourier-transform infrared studies of carbon monoxide adsorption on platinum sols in alcoholic media, 3779
Effect of the ratio of length of sphere to length of cylinder on adsorption and self-diffusion in a 'sphere-cylinder' micropore, 3791
Adsorption of pure vapours of ethanol and *n*-heptane and their liquid mixtures on activated carbon, 3799
Aerosol
Steady-state heat and matter exchange at a phase interface, 2187
Aerosol-OT
Rotational dynamics of AOT reversed micelles in near-critical and supercritical alkanes, 1899
Aggregation
Aggregation in dense solutions of rods, 861
Bending energy of surfactant films, 949
Mechanism of aggregation of oil-in-water microemulsion droplets stabilized by dodecyl pentaoxyethylene alcohol, $C_{12}E_5$, 3775
Al_2O_3-supported V_2O_5 catalyst
Dispersion and 3-picoline ammoxidation investigation of V_2O_5/α-Al_2O_3 catalysts, 1649
Alanine
Thermodynamic and rate parameters for alanine protonation reactions, 3241
Alanine dosimeter
Electron paramagnetic resonance radiation

dosimetry: Possible inorganic alternatives to the EPR/alanine dosimeter, 3147
Alcohol
Effect of steric hindrance and π electrons on alcohol self-association, 1745
Alcohol–1,4-dioxane system
Enthalpies of transfer of tetrabutylammonium bromide as indicators of the structure of aqueous solvents: aqueous methanol, ethanol, propan-1-ol, 2-methylpropan-2-ol and 1,4-dioxane systems, 87
Alkane
Temperature and chain-length dependence of the volumetric properties of 1-chlorobutane–alkane mixtures, 93
Hydrogenolysis of alkanes. Part 6.—Modification of supported ruthenium catalysts by vanadium pentaoxide, 767
Hydrogenolysis of alkanes. Part 7.—Hydrogenolysis of propane and of n-butane over Ir/TiO_2 and Os/TiO_2 catalysts, 775
Alkylation
Chemical reactions in microemulsions: kinetics of the alkylation of 2-alkylindan-1,3-diones in microemulsions and polar organic solvents, 847
Alkylxanthate ion
Interactions between sulphide minerals and alkylxanthate ions. Part 4.—Vibrational spectroscopic and calorimetric study of the interactions between galena and synthetic lead(II) sulphide, and alkylxanthate ions in aqueous, acetone and acetonitrile solutions, 2779
Alkyne
Nitrate radical reactions: Interactions with alkynes, 2141
Alloy
Nature of the passive film on Fe–Cr alloys as studied by ^{18}O secondary ion mass spectrometry: reduction of the prior film and stability to *ex situ* surface analysis, 1011
Allyl radical
Decomposition of 4,4-dimethylpent-1-ene in the presence of oxygen between 400 and 500°C: oxidation chemistry of allyl radicals, 681
Oxidation of allyl radicals: kinetic parameters for the reaction of allyl radicals with HO_2 and O_2 between 400 and 480 °C, 2361
Allylxanthate ion
Interactions between sulphide minerals and alkylxanthate ions. Part 1.—A vibrational spectroscopic study of the interactions between sphalerite and synthetic zinc(II) and cadmium(II) sulphides, and ethylxanthate ions in aqueous and acetone solutions, 2769
Alumina
Properties of Rh-exchanged SiO_2–Al_2O_3 sol–gel catalysts, 199
Electronic charge distribution and Lewis acidity of surface aluminium atoms in γ-Al_2O_3: a quantum-chemical model, 745
Adsorption of argon on alumina and calculation of the adsorption potential, 885
De-sintering action of phosphorus in alumina–aluminium phosphates (AAP) containing transition-metal ions (M = Cr, Mn, Fe, Co, Ni, Cu, Zn), 901
Acid–base properties of modified aluminas, 1425
Aluminophosphate
Characterization of $AlPO_4$-14 by magic-angle-spinning nuclear magnetic resonance spectroscopy and thermoanalytical and adsorption measurements, 1433
Amino acid
Aqueous solutions containing amino acids and peptides. Part 27.—Partial molar heat capacities and partial molar volumes of some *N*-acetyl amino acid amides, some *N*-acetyl peptide amides and two peptides at 25 °C, 1751
Micellar effect on the kinetics of the base equilibrium of amino acids studied by the ultrasonic absorption method, 1857
Solution thermodynamics of amino acid-18-crown-6 and amino acid-cryptand 222 complexes in methanol and ethanol. Linear enthalphy-entropy compensation effect, 3231
Aminocoumarin
Triplet–triplet and singlet–singlet energy-transfer studies between t-stilbene and 7-aminocoumarin laser dyes, 269
Ammonia
Benzene–ammonia coadsorption on TiO_2 (anatase), 175
Infrared spectroscopic study of ammonia and nitric oxide adsorption and reactivity on a Ru/TiO_2 catalyst: effect of oxo-reducing treatments, 337
Dissociation of NH_3 to NH + H_2, 1809
Transitions between states of high angular momentum in the electronic spectrum of NH_2, 2121
Ammonium nitrate
Structure of a 50 mol kg^{-1} aqueous solution of ammonium nitrate at 373 K by the isotopic difference method of neutron diffraction, 279
Anatase
Infrared and Raman study of the adsorption of NH_3, pyridine, NO and NO_2 on anatase, 643
Anderson heteropolyanion
Copper–oxygen coordination in Cu^{II}-heteropolyanion compounds: electron paramagnetic resonance studies and CNDO/2 calculations, 717
Angular momentum
Transitions between states of high angular momentum in the electronic spectrum of NH_2, 2121
Anodic Cl_2 evolution
Evaluation of Cl^- adsorption in anodic Cl_2 evolution at Pt by means of impedance and potential-relaxation experiments. Influence of the state of surface oxidation of the Pt, 2705
Anthraquinone
One-electron reactions of 1,5- and 1,8-dihydroxy-9,10-anthraquinones. A pulse radiolysis study, 1109
Ultraviolet–visible and electron paramagnetic resonance spectroelectrochemical studies of the reduction products of some anthraquinone sulphonates in aqueous solutions, 3653
Apatite
Adsorption of carbonate-derived molecules on the surface of carbonate-containing apatites, 3137
Aqueous alcohol solvent systems
Enthalpies of transfer of formamide, *N*-methylformamide, *N*,*N*-dimethylformamide and urea from water to some aqueous alcohol solvent systems at 298 K, 2447
Aqueous solution
Empirical correlations between thermodynamic and spectroscopic properties of aqueous solutions of alkan-*m*,*n*-diols. Excess enthalpies and spin–lattice relaxation times at 298.15 K, 2989
Arrhenius parameter
Determination of the Arrhenius parameters for the initiation reaction $C_3H_6 + O_2 \rightarrow CH_2CHCH_2 + HO_2$, 241
Arrhenius parameters for the addition of HO_2 radicals to ethene between 400 and 500 °C, 2147
Kinetics of abstraction reactions of *tert*-butoxyl radicals with cyclohexane and methyl-substituted cyclohexanes in the gas phase, 2157
Ascorbic acid
Ascorbic acid oxidation at polypyrrole-coated electrodes, 115
Association
Thermochemical investigations of associated solutions. Part 14.—Calculation of anthracene–butyl acetate association parameters from measured solubility data, 461
Thermochemical investigations of associated solutions. Part 14.—Calculation of anthracene–butyl acetate association parameters from measured solubility data, 461
Atmospheric chemistry
Fourier-transform infrared product study of the reaction of $CH_3O_2 + HO_2$ over the pressure range 15–700 Torr at 295 K, 2379
Study of the temperature dependence of the reaction of the nitrate radical with propene, 3473
Atom–diatomic gas mixture
Approximating relative rotational energy transfer in molecular collisions, 31
Attenuated total reflection Fourier-transform infrared spectroscopy
Fourier-transform infrared, attenuated total reflection spectroscopy: A complementary tool for the investigation of the adsorption of CO on thin metal layers, 637
Attenuated total reflection Fourier-transform infrared spectroscopic study of ion–solvent and ion–ion interactions in lithium perchlorate–nitromethane solutions, 2961
18-Azacrown-6
Molecular mechanics study of 18-azacrown-6 and its binding interactions in 1 : 1 host–guest complexes with neutral and anionic species, 1321
Azetidine radical cation
Structure of the azetidine radical cation and the neutral azetidin-1-yl radical: an *ab initio* and electron paramagnetic resonance study, 1083
Azide
Role of azide concentration in pulse radiolysis studies of oxidation: 3,4-dihydroxyphenylalanine, 2939
Azobenzene
Silver(I) perturbation of (*E*)-(*Z*) photoisomerization of stilbene and azobenzene, 1303
Azoethane
Combination and disproportionation reactions of the $CH_3CH\dot{-}N\dot{-}NC_2H_5$ radical, 1827
Barite
Interactions at the organic/inorganic interface: Binding motifs for phosphonates at the surface of barite crystals, 3409
Belousov–Zhabotinskii reaction
Phenomenological study of a new flow model of the Belousov–Zhabotinskii reaction, 223
Hysteresis and complex oscillations of the uncatalysed Belousov–Zhabotinskii reaction in a stirred flow reactor, 2135
Effects of sulphate and perchlorate ions on an oscillatory reaction of the Belousov–Zhabotinskii type with oxalic acid, 3821
Bending energy
Bending energy of surfactant films, 949
Bentonite
Concentration profile within non-uniform mudcakes, 611
Benzene
Benzene–ammonia coadsorption on TiO_2 (anatase), 175
Benzenoid hydrocarbon
Benzenoid hydrocarbons having eigenvalues of $\pm\sqrt{2}$, 3631
Benzil
Oxidative C—C bond scission of 1,2-dicarbonyl on a metallic copper surface: a surface-enhanced Raman scattering study, 1021
Benzophenone
Effects of water on the phosphorescence spectra of aromatic carbonyl compounds. Part 1.—Dual phosphorescence of benzophenone at 77 K in 2,2,2-trifluoroethanol–water, 449
Photoreduction of thioxanthen-9-one and benzophenone by amines. Electrical conductivity and light emission studies, 1531
Benzoquinone
Incorporation and distribution of benzoquinone into liposomes containing amphilic zinc(II) porphyrin as studied by the quenching of the excited state, 83
1,4-Benzoquinones
Electron paramagnetic resonance, ENDOR and TRIPLE resonance studies on substitution reactions of 2-methyl-1,4-benzoquinone and 2,3-dimethoxy-5-methyl-1,4-benzoquinone in alkaline methanol, 3163
Bilayer
Influence of viscosity on the thermal vibrations of

a lamellar liquid crystal, 153
Electroactive bilayers employing conducting polymers. Part 2.—Speciation by *in situ* spectroscopy, 2209
Bimetallic catalyst
Effects of lanthanide metals in Eu–Ni and Yb–Ni bimetallic catalysts, 2805
Bimolecular reaction
Time resolved Fourier-transform infrared emission in the $O(^3P) + CHF(^1A')$ reaction, 2283
Binary system
Prediction of vapour–liquid equilibrium data for binary mixtures from molecular parameters using a generalized London potential, 57
Partitioning in aqueous two-phase systems as a method of estimation of the relative hydrophobicity of solutes, 137
Influence of ionic and polymer composition on the properties of the phases of aqueous two-phase systems formed by non-ionic polymers, 141
Thermochemical investigations of associated solutions. Part 14.—Calculation of anthracene–butyl acetate association parameters from measured solubility data, 461
Preferential solvation in mixed binary solvents by ultraviolet–visible spectroscopy: N-ethyl-4-cyanopyridinium iodide in alcohol–acetone mixtures, 587
Thermodynamics of adsorption from solution: adsorption by activated carbon of the three binary systems involving n-butanol, n-heptane and n-dodecane, 755
Liquid-phase adsorption of binary ethanol–water mixtures on high-silica adsorbents, 1279
Liquid-phase adsorption of ethanol–water mixtures on NaZSM-5 zeolite with inorganic and organic binders, 1283
Thermodynamic behaviour of binary systems of 1,4-dioxane with 1,2-dichloroethane, dichloromethane, trichloroethene, tetrachloroethene and cyclohexane. Vapour pressures and excess molar Gibbs energies, 1345
Preferential solvation in mixed solvents. Part 6.—Binary mixtures containing methanol, ethanol, acetone or triethylamine and another organic solvent, 1843
Topological investigations of the state of some transition-metal ions in some binary mixtures of non-electrolytes: Molar excess volumes, 2579
Ethane-1,2-diol–2-methoxyethanol solvent system. Dependence of the relative permittivity and refractive index on the temperature and composition of the binary mixture, 2583
Binding energy
Dynamics of the chemisorption of hydrogen on the Fe(001) surface, 1447
Biological cell
Investigation of the kinetic behaviour of captopril followed by alternating current polarography, 3505
Biphenyl
Structure of biphenyl in a nematic liquid-crystalline solvent, 2623
Birefringence
Numerical calculations of the transient-state linear electric birefringence for a sudden application of an alternating field superimposed on a unidirectional field, 297
Simultaneous measurement of linear electric birefringence and linear electric dichroism using pulsed electric fields, 2219
Bjerrum parameter
Error in the Debye–Hückel approximation for dilute primitive model electrolytes with Bjerrum parameters of 2 and *ca.* 6.8 investigated by Monte Carlo methods. Excess energy, Helmholtz free energy, heat capacity and Widom activity coefficients corrected for neutralising background, 479
Block copolymer
Environmentally induced macromolecular rearrangement on the surface of polyurethane–polysiloxane block copolymers, 147
Bond scission
Oxidative C—C bond scission of 1,2-dicarbonyl on a metallic copper surface: a surface-enhanced Raman scattering study, 1021
Boron
HBO osculating complex in the $B(^2P) + OH(^2\Pi)$ reaction, 37
Treatment of boron-containing pentasil-type zeolites under 'boron-extracting' conditions, 3099
Boundary layer
Steady-state heat and matter exchange at a phase interface, 2187
Bridging flocculation
Bridging flocculation induced by competitive adsorption: implications for emulsion stability, 963
Bromo(sulphido)boron
Microwave spectrum for bromo(sulphido)boron, BrBS, 1
Brønsted-acidity
Magic-angle spinning nuclear magnetic resonance studies of water molecules adsorbed on Brønsted- and Lewis-acid sites in zeolites and amorphous silica–aluminas, 657
Role of Lewis and Brønsted sites in selective oxidation of propene on MoO_3–Sb_2O_4 catalyst, 3695
Brownian motion
Brownian motion of rod-shaped colloidal particles surrounded by electrical double layers, 971
Brownian motion of rod-like micelles under flow, 2073
Bubble
Electrophoresis of drops and bubbles, 1883
But-1-ene
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 3.—But-1-ene dehydrogenation activity, 1639
(*Z*)-But-2-ene
Adsorption of (*Z*)-but-2-ene on iron oxide films, 3285
Butan-2-ol–water mixture
Semi-automated apparatus for the determination of liquid solubilities: Mutual solubilities of water and butan-2-ol, 591
Butane
Transformation of butanes over ZSM-5 zeolites. Part 1.—Mechanisms of cracking over H-ZSM-5, 663
Transformation of butanes over ZSM-5 zeolites. Part 2.—Formation of aromatic hydrocarbons over Zn-ZSM-5 and Ga-ZSM-5, 669
Molecular simulation of methane and butane in silicalite, 1951
Butoxyl radical
Kinetics of abstraction reactions of *tert*-butoxyl radicals with cyclohexane and methyl-substituted cyclohexanes in the gas phase, 2157
C_{78}
The higher fullerenes: a candidate for the structure of C_{78}, 3103
Calcium carbonate
Oriented crystallization of $CaCO_3$ under compressed monolayers. Part 1.—Morphological studies of mature crystals, 727
Oriented crystallization of $CaCO_3$ under compressed monolayers. Part 2.—Morphology, structure and growth of immature crystals, 735
Calcium oxide
Measurement of the average emission lifetimes of the $A\ ^1\Sigma^+ - X\ ^1\Sigma^+$ and the orange arc bands of CaO, 677
Calcium phosphate
Calcium phosphate system in saliva-like media, 1759
Calixarene
Electrochemical study on calix[4]quinone and calix[4]hydroquinone in *N*,*N*-dimethylformamide, 1575
Calorimetry
Characterization of active carbons by combined preadsorption and immersion techniques, 1233
Interactions between cations and sugars. Part 6.—Calorimetric method for simultaneous determination of the stability constant and enthalpy change for weak complexation, 2173
Micelle formation in non-aqueous solvents: Calorimetric study of the association of poly(ethylene oxide) alkyl ethers and hexadecyltrimethylammonium bromide in formamide, 3037
Interdependence of different parameters characterizing the chemistry of an activated carbon surface, 3557
Capacitance
Influence of functional groups and substituents on the adsorption of aromatic non-ionic surfactants at the Hg/ethylene glycol interface, 3399
Capillary
Kinetics of liquid penetration into periodically constricted capillaries, 619
Shape of a small sessile drop and the determination of contact angle, 1579
Capillary condensation
Wetting transitions and capillary condensation in slit-like pores: Comparison of simulation and density functional theory, 3415
Capillary flow
Viscosities and pair potential energy function for the argon–methane gas-phase interaction, 2161
Carbohydrate
Interactions between cations and sugars. Part 6.—Calorimetric method for simultaneous determination of the stability constant and enthalpy change for weak complexation, 2173
Carbon
Three candidates for the structure of C_{84}, 1945
Properties of simple fluids in carbon micropores, 2011
Carbon cluster
Potential-energy function for large carbon clusters, 803
Carbon dioxide
Adsorption of CO, intermediately formed in electrochemical reduction of CO_2, at a copper electrode, 125
Carbon dioxide hydrogenation over Au/ZrO_2 catalysts from amorphous precursors: Catalytic reaction mechanism, 2821
Carbon dioxide fixation
Photocatalytic fixation of carbon dioxide in oxoglutaric acid using isocitrate dehydrogenase and cadmium sulphide, 553
Carbon fibre
Surface fractal dimension of microporous carbon fibres by nitrogen adsorption, 179
Ultramicropores in microporous carbon fibres evidenced by helium adsorption at 4.2 K, 1915
Carbon monoxide
Adsorption of CO, intermediately formed in electrochemical reduction of CO_2, at a copper electrode, 125
Fourier-transform infrared studies of carbon monoxide adsorption on platinum and palladium hydrosols: Influence of pH, 1221
Infrared study of CO adsorption on $Pt–Rh/SiO_2$ catalysts, 3435
Carboxymethylchitin
Molecular mobility, structure and a new model of the carboxymethylchitin–alkaline-earth metal complex in aqueous systems, 3841
Carrier membrane
Facilitated transport with fixed-site carrier membranes, 2089
Catalysed deoxygenation
Chemometric optimization of the ruthenium carbonyl catalysed cyclization of 2-nitrostilbene to 2-phenylindole, 2811
Catalysis
Formation and decomposition of formate intermediates on supported Cu catalysts exposed to $CO–CO_2–H_2$ mixtures: evidence for a precursor state, 193
Properties of Rh-exchanged SiO_2–Al_2O_3 sol–gel catalysts, 199
Decomposition products of trinuclear ruthenium complexes as effective catalysts of water oxidation, 313
Catalysis by polyoxometalates. Part 1.—Supported polyoxoanions of the Keggin

structure: spectroscopic study (IR, Raman, UV) of solutions used for impregnation, 349
Bimolecular hydrogen transfer over zeolites and SAPOs having the faujasite structure, 783
Comparative study of new and established heterogeneous oxygen catalysts, 1245
Oxidative coupling of methane over $SrCO_3$ and SrO, 1273
Nature of zirconium phosphite as an acidic catalyst, 1419
Influence of the structure of alumina–aluminium phosphate (AAP) catalysts containing Fe^{3+} and Cr^{3+} on their catalytic activity for isopropyl alcohol decomposition, 1439
Catalytic combustion of methane over bulk and supported $LaCrO_3$ perovskites, 2493
Organic-free synthesis, structure and properties of multicomponent ZSM-5 type zeolites, 2507
Catalysis by polyoxometalates. Part 3.—Influence of vanadium(v) on the thermal stability of 12-metallophosphoric acids from *in situ* infrared studies, 3913

Catalyst characterization
Nature of zirconium phosphite as an acidic catalyst, 1419
Synthesis and properties of SAPO-37, 2679

Catalyst preparation
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 1.—Preparation and characterization, 1623

Catalyst properties
Comparative study of the solid-state and catalytic properties of $La_{2-x}Sr \cdot NiO_{4-\lambda}$ perovskites ($x = 0.00$–1.50) prepared by the nitrate and citrate methods, 3291

Catalytic activity
Factors controlling the activity and selectivity of conversion of cyclohexane in the presence of hydrogen over ruthenium supported on alumina, 1801
Comparative study of the solid-state and catalytic properties of $La_{2-x}Sr \cdot NiO_{4-\lambda}$ perovskites ($x = 0.00$–1.50) prepared by the nitrate and citrate methods, 3291
Comparative investigation of hydrogen chemisorption and benzene hydrogenation activity of supported rhodium catalysts, 3449
Catalytic and infrared spectroscopic investigations of the molecular sieve types SAPO-34 and SAPO-11, 3569

Cation-exchange resin
Characterization of poly(oxyethylene) complex formation with alkali-metal cations in a cation-exchange resin phase, 3027

Cationic homoconjugation
Acid–base and cationic homoconjugation equilibria in nitromethane solutions of substituted pyridine *N*-oxide systems, 1729
Acid–base and cationic homoconjugation equilibria of substituted pyridine *N*-oxides in acetone, 3853

Ceria
Reduction of CeO_2 by hydrogen. Magnetic susceptibility and Fourier-transform infrared, ultraviolet and X-ray photoelectron spectroscopy measurements, 1601

Cerium
Decomposition products of trinuclear ruthenium complexes as effective catalysts of water oxidation, 313
Comparative study of new and established heterogeneous oxygen catalysts, 1245

Chabazite
Characterization of chabazite and chabazite-like zeolites of unusual composition, 1031

Chaos
Phenomenological study of a new flow model of the Belousov–Zhabotinskii reaction, 223

Charge distribution
Electrostatic field of charge distributions enclosed in a polarisable medium: Solvent effects in electronic spectra of ketyl ion pairs, 1117

Charge transfer
Effects of temperature on the photo-oxidation quantum yield of aqueous hexacyanoferrate(II) anion, 927

Charge transport
Controlling processes in the rate of charge transport through $[Os(bipy)_2(PVP)_nCl]Cl$ redox polymer-modified electrodes, 3761

Chemical etching
Kinetics of the reaction of silicon with gaseous bromine, 45

Chemical laser
Room-temperature rate constants for the reaction $D + O_2 + M \rightarrow DO_2 + M$. M = Ar, D_2, CO_2 and F_2, 2337

Chemical vapour deposition
EXAFS evidence for the formation of a V_2O_5 thin film by chemical vapour deposition on SiO_2, 1807

Chemical wave
Wave profile in the acidic nitrate–ferroin reaction, 3613

Chemielectron spectroscopy
Gas-phase metal oxidation reactions studied by chemielectron spectroscopy and chemiion mass spectrometry: reactions of cerium and lanthanum with $O_2(X\ ^3\Sigma_g^-)$, $O_2(a\ ^1\Delta_g)$ and $O(^3P)$, 19

Chemiion mass spectrometry
Gas-phase metal oxidation reactions studied by chemielectron spectroscopy and chemiion mass spectrometry: reactions of cerium and lanthanum with $O_2(X\ ^3\Sigma_g^-)$, $O_2(a\ ^1\Delta_g)$ and $O(^3P)$, 19

Chemiluminescence
Kinetic investigation of the collisional quenching of $Ca(4\ ^3P)$ by C_4H_{10} at elevated temperatures (750–923 K). Time-resolved atomic emission and electronic energy transfer between $Ca(4\ ^3P_J)$ and $CaH(X\ ^2\Sigma^+)$ observed by molecular chemiluminescence, 1503
Time-dependent chemiluminescence from the surface-catalysed recombination of O and NO on polycrystalline Ni, 2877

Chemisorption
Surface reaction of 2-mercaptobenzimidazole on metals and its application in adhesion promotion, 1229
Effect of the size of platinum particles on the chemisorption of oxygen, 1251
Dynamics of the chemisorption of hydrogen on the Fe(001) surface, 1447
Tin oxide surfaces. Part 21.—Infrared study of the chemisorption of 2,2,2-trifluoroethanol, 1,1,1,3,3,3-hexafluoropropan-2-ol, 1,1,1-trifluoropropan-2-one, 1,1,1,3,3,3-hexafluoropropan-2-one and trifluoroacetic acid on tin(IV) oxide gel, 1929
Infrared study of cyclohexanol chemisorption in SAPO molecular sieves, 3315
Comparative investigation of hydrogen chemisorption and benzene hydrogenation activity of supported rhodium catalysts, 3449

Chemometric optimization
Chemometric optimization of the ruthenium carbonyl catalysed cyclization of 2-nitrostilbene to 2-phenylindole, 2811

Chiral molecular recognition
Chiral molecular recognition: A ^{19}F nuclear magnetic resonance study of the diastereoisomer inclusion complexes formed between fluorinated amino acid derivatives and α-cyclodextrin in aqueous solution, 2699

Chlorine
Oxidation of chloride to chlorine by Ce^{V} ions mediated by different Ru^{IV} and Ir^{IV} oxide-based catalysts, 3275

Chloroanthraquinones
Electron transfer from ground-state triethylamine to the lowest excited triplet states of chloroanthraquinones (the 1-chloro, 2-chloro, 1,5-dichloro and 1,8-dichloro compounds) in ethanol and toluene at room temperature, 3731

Chlorobutane
Temperature and chain-length dependence of the volumetric properties of 1-chlorobutane–alkane mixtures, 93

Chlorofluorocarbene
Fluorescence spectroscopy of supersonically cooled CFCl, 2407

Chlorofluorocarbon matrix
Electron paramagnetic resonance evidence for the occurrence of hydrogen and/or proton transfer between C_7, C_8 and C_{11} *n*-alkanes and their cations in irradiated CCl_3F matrices at 77 K, 3499

Chloromethyl radical
Ultraviolet absorption spectra of the CH_2Cl and $CHCl_2$ radicals and the kinetics of their self-recombination reactions from 273 to 686 K, 2367

Chlorophosphaethyne
Detection of chlorophosphaethyne, Cl—C≡P, by photoelectron spectroscopy, 917

Chromia
Infrared spectroscopic study of O_2^- on the surface of Cr_2O_3: the effect of surface pretreatment, 913

Chromium
Energetics for preferential solvation of a chromium complex in aqueous organic solvent, 2167

Clay
Metachromasy in clay-mineral systems: Adsorption of cationic dyes crystal violet and ethyl violet by kaolinite from aqueous and organic solutions, 1201
Ca–K–H exchange on silt-, clay- and silt + clay-size soil separates, 2501

Cluster
Packing schemes for Lennard-Jones clusters of 13 to 150 atoms: minima, transition states and rearrangement mechanisms, 215
Dynamics of acetonitrile crystals and clusters, 539
Aggregation in dense solutions of rods, 861
Migration and coalescence of Pd carbonyl clusters in zeolite Y, 1413
Three candidates for the structure of C_{84}, 1945
Instantaneous normal mode analysis and coexistence phenomena in small clusters, 2399
Electron paramagnetic resonance and electron spin-echo modulation measurements of sodium and potassium ionic clusters in X and Y zeolites, 3157
Closed-shell three-connected clusters: Topological and group-theoretical aspects, 3353

Cluster-size distribution
Evolution of the cluster-size distribution in stirred suspensions, 1163

CNDO
Copper–oxygen coordination in Cu^{II}-heteropolyanion compounds: electron paramagnetic resonance studies and CNDO/2 calculations, 717

Coadsorption
Kinetics of coadsorption of dioxygen and ammonia at a Zn(0001) surface: a theoretical model, 3563

Coagulation
Evolution of the cluster-size distribution in stirred suspensions, 1163

Cobalt
Characterisation of Co^{II} and Co^{III} in CoAPO molecular sieves, 891
State and localization of cobalt, nickel and copper ions adsorbed on titania (anatase), 907
Self-diffusion of cobalt and manganese ions in aqueous electrolyte solutions, 3405

Cobalt salen complex
Electrochemistry of zeolite-encapsulated cobalt salen complexes in acetonitrile and dimethyl sulphoxide solutions, 3831

Coexistence phenomena
Instantaneous normal mode analysis and coexistence phenomena in small clusters, 2399

Collision
Quasi-classical trajectory study of the initial collision energy dependence on the $O(^3P) + I_2$ reaction and thermal rate constant calculations, 517

Collisional quenching
Kinetic investigation of the collisional quenching of $Ca(4\ ^3P)$ by C_4H_{10} at elevated temperatures (750–923 K). Time-resolved atomic emission and electronic energy transfer between $Ca(4\ ^3P_J)$ and $CaH(X\ ^2\Sigma^+)$ observed by molecular chemiluminescence, 1503

Collision dynamics
Approximating relative rotational energy transfer

in molecular collisions, 31
Colloid
Properties of concentrated colloidal dispersions, 357
Colloidal crystal growth, 371
Structural effects of polydispersity in charged colloidal dispersions, 379
Vacancy diffusion in colloidal crystals, 391
Dynamics of hard spherical colloids from the fluid to the glass, 395
Determination of structures in ferrofluids by small-angle neutron scattering, 403
Dynamic light scattering study of concentrated dispersions of anisotropic spherical colloids, 431
Brownian motion of rod-shaped colloidal particles surrounded by electrical double layers, 971
Transient collision efficiency of polymer-induced flocculation, 1177
Counter-ion specificity in colloidal 'crystals' and 'liquids' as studied by transmitted-light spectroscopy, 1361
Particle adhesion in model systems. Part 13.—Theory of multilayer deposition, 1371
Particle adhesion in model systems. Part 14.—Experimental evaluation of multilayer deposition, 1377
Photochemical formation of colloidal silver: peptizing action of acetone ketyl radical, 1905
Computer simulation of bridging flocculation, 2193
Transient behaviour of polymer-induced flocculation, 3245
Effect of heat denaturation on the structure and rheological properties of ovalbumin aqueous colloids, 3385
Electrostatic effects in dilute solutions containing charged colloidal entities, 3529
Colloidal crystal
Counter-ion specificity in colloidal 'crystals' and 'liquids' as studied by transmitted-light spectroscopy, 1361
Colloidal metallic particle
Ultraviolet–visible absorption spectra of the colloidal metallic elements, 3881
Colloidal semiconductor
Photoelectrophoresis of colloidal semiconductors. Part 1.—The technique and its applications, 3537
Photoelectrophoresis of colloidal semiconductors. Part 2.—Transient experiments on TiO_2 particles, 3547
Colloidal silica
Settling suspensions of colloidal silica: Observations and X-ray measurements, 411
Settling suspensions of colloidal silica: Observations and X-ray measurements, 411
Combustion
Catalytic combustion of methane over bulk and supported $LaCrO_3$ perovskites, 2493
High-temperature oxidation of ethanol. Part 2.—Kinetic modelling, 2549
Competitive adsorption
Bridging flocculation induced by competitive adsorption: implications for emulsion stability, 963
Complexation
Heat capacities, self-association and complex formation in alcohol–ester systems, 1133
Thermodynamics of formation and the structure of polymetal alkaline-earth-metal(II) fluoride complexes in molten-nitrate media, 1141
Increased basicity and hydrogen-bonding donor ability of water by hydrogen bonding to dimethyl sulphoxide and its coordination to 1,4,8,11-tetramethyl-1,4,8,11-tetraazacyclotetradecanenickel(II) in nitrobenzene, 1537
^1H nuclear magnetic resonance studies of the association of 1,3,5-trinitrobenzene with naphthalene and methylnaphthalenes, 1549
Characterization of poly(oxyethylene) complex formation with alkali-metal cations in a cation-exchange resin phase, 3027
Solution thermodynamics of amino acid-18-crown-6 and amino acid-cryptand 222 complexes in methanol and ethanol. Linear enthalphy-entropy compensation effect, 3231
Inner-sphere and outer-sphere complexes of yttrium(III), lanthanum(III), neodymium(III), terbium(III) and thulium(III) with halide ions in *N*,*N*-dimethylformamide, 3379
Localization of the proton in complexes of trifluoroacetic acid with pyridine *N*-oxides in dichloromethane by second-derivative infrared spectroscopy, 3825
Molecular mobility, structure and a new model of the carboxymethylchitin–alkaline-earth metal complex in aqueous systems, 3841
Specific interactions between anions and cations in protophobic aprotic solvents. Triple-ion and higher aggregate formation from lithium and tributylammonium thiocyanates, 3847
Synthesis, electron paramagnetic resonance and X-ray structure characterization of copper(II) ternary complexes of *p*-aminobenzoic and 3,4-dimethoxyhydrocinnamic acid with phenanthrolines, 3863
Composite-modified electrode
Cationic polypyrrole composites with anionic functional molecules, 1765
Computer simulation
Computer simulation of bridging flocculation, 2193
Kinetic asymmetry between crystal growth and dissolution on a flat surface: computer simulation study at high temperatures, 2467
Computer simulation of the Si,Al distribution in dealuminated zeolite Y, 2837
Concentration profile
Concentration profile within non-uniform mudcakes, 611
Conductance
Temperature dependence of the square-mound potential for 1 : 1 electrolytes in acetone, dimethyl sulphoxide and alcohols, 63
Transport properties of copper(I) perchlorates in mixed solvents. Part 2.—Conductance and viscosity measurements of bis(2,9-dimethyl-1,10-phenanthroline)copper(I) perchlorate in binary solvent mixtures containing acetonitrile, 1159
Electrical conductances for some tetraalkylammonium bromides, lithium tetrafluoroborate and tetrabutylammonium tetrabutylborate in propylene carbonate at 25 °C, 3511
Conducting polymer
Electroactive bilayers employing conducting polymers. Part 2.—Speciation by *in situ* spectroscopy, 2209
Conductivity
Electrochemical and electrical properties of poly(hexachlorobuta-1,3-diene), an electrochemically graphitized film, 319
Thermodynamic and rate parameters for alanine protonation reactions, 3241
Ionic conductivity of halide sodalites, 3787
Conductometry
Specific interactions between anions and cations in protophobic aprotic solvents. Triple-ion and higher aggregate formation from lithium and tributylammonium thiocyanates, 3847
Conformation
Prospects for using photoinduced intramolecular proton transfer to study the dynamics of conformational changes in flexible molecular chains, 1103
Geometric conformation of the oxirane hydrogen halide dimers from *ab initio* calculations, 3495
Conformational energy
Ab initio molecular orbital calculations of conformational energies of ethyl methyl ether: Basis set and electron correlation effects, 3207
Conservation relations
Determining all extreme semi-positive conservation relations in chemical reaction systems: a test criterion for conservativity, 2561
Constant-volume principle
Thermodynamics of the constant-volume principle for chemical processes involving the solvent, 1553
Contact angle
Shape of a small sessile drop and the determination of contact angle, 1579
Coordination number
Coordination number and equation of state of square-well and square-shoulder fluids: Simulation and quasi-chemical model, 3373
Copper
Formation and decomposition of formate intermediates on supported Cu catalysts exposed to $CO–CO_2–H_2$ mixtures: evidence for a precursor state, 193
State and localization of cobalt, nickel and copper ions adsorbed on titania (anatase), 907
Electron paramagnetic resonance study of hydrocarbon accommodation in copper(II)-exchanged zeolite ZSM-5 and related materials, 1025
Copper(I) perchlorate
Transport properties of copper(I) perchlorates in mixed solvents. Part 1.—Transference numbers of copper(I) perchlorate in acetonitrile–*N*,*N*-dimethylacetamide mixtures at 25 °C, 1155
Transport properties of copper(I) perchlorates in mixed solvents. Part 2.—Conductance and viscosity measurements of bis(2,9-dimethyl-1,10-phenanthroline)copper(I) perchlorate in binary solvent mixtures containing acetonitrile, 1159
Copper(II) ion pair
Redox behaviour of copper(II) ion pairs as surface species on CuTh oxide catalysts. Electron paramagnetic resonance and X-ray photoelectron spectroscopy study, 631
Copper catalyst
In situ Fourier-transform infrared investigation of the interaction of $CO–CO_2–H_2$ with Cu catalysts at low temperatures and high pressures, 1791
Copper electrode
Adsorption of CO, intermediately formed in electrochemical reduction of CO_2, at a copper electrode, 125
Copper oxalate
Kinetic study on the thermal decomposition of copper(II) oxalate, 161
Copper oxide
Catalytic properties of copper oxide supported on zinc aluminate in methane combustion, 1795
Corrosion
Kinetics of corrosion of ruthenium dioxide hydrate by Ce^{IV} ions, 473
CoTi alloy
A study of oxidation of CoTi by X-ray photoelectron spectroscopy, 2755
Coulombic energy
Coulombic energy in bromide salts of mononitrogen organic bases, 1333
Cracking
Catalytic activity of supported heteropoly acids for reactions requiring strong acid centres, 749
Critical cooling rate
Critical cooling rates to avoid ice crystallization in solutions of cryoprotective agents, 101
Critical cooling rates to avoid ice crystallization in aqueous cryoprotectant solutions containing polymers, 3747
18-Crown-6 cryptand 222
Solution thermodynamics of amino acid-18-crown-6 and amino acid-cryptand 222 complexes in methanol and ethanol. Linear enthalphy-entropy compensation effect, 3231
Cryoprotection
Critical cooling rates to avoid ice crystallization in solutions of cryoprotective agents, 101
Critical cooling rates to avoid ice crystallization in aqueous cryoprotectant solutions containing polymers, 3747
Crystal
Vacancy diffusion in colloidal crystals, 391
Crystal growth
Colloidal crystal growth, 371
Kinetic asymmetry between crystal growth and dissolution on a flat surface: computer simulation study at high temperatures, 2467

Crystalline solid
Mathematical analysis of intra-stack dimerizations in reactive crystalline solids, 325
Crystallinity
Crystallinity of uniform oligo(oxyethylene) mono-*n*-alkyl ethers studied by X-ray diffraction and differential scanning calorimetry, 1183
Crystallinity of uniform oligo(oxyethylene) monoalkyl ethers studied by Raman spectroscopy, 3677
Crystallography
Oriented crystallization of $CaCO_3$ under compressed monolayers. Part 1.—Morphological studies of mature crystals, 727
Oriented crystallization of $CaCO_3$ under compressed monolayers. Part 2.—Morphology, structure and growth of immature crystals, 735
Vibrational spectroscopy at high pressures. The crystal structure of $Re(CO)_5I$, the vibrational spectra of the manganese and rhenium pentacarbonyl chlorides and iodides, and their behaviour under high pressure, 1831
Crystal morphology
Preparation and characterization of colloidal α-FeOOH with a narrow size distribution, 869
Interactions at the organic/inorganic interface: Binding motifs for phosphonates at the surface of barite crystals, 3409
Cubic ammonium molybdate
Nuclear magnetic resonance study of ion-exchange reaction on cubic ammonium molybdate, 2669
Cu/SiO_2 catalyst
Infrared study of methyl formate and formaldehyde adsorption on reduced and oxidised silica-supported copper catalysts, 2785
Infrared study of the adsorption of methanol on oxidised and reduced Cu/SiO_2 catalysts, 2795
CuTh oxide catalyst
Redox behaviour of copper(II) ion pairs as surface species on CuTh oxide catalysts. Electron paramagnetic resonance and X-ray photoelectron spectroscopy study, 631
Cyanamide
Effects of ionizing radiation on cyanamide and dimethylcyanamide, 3129
Cyclic voltammetry
Cyclic voltammetric studies on the ternary system decaglycerol dioleate–heptane–water, 133
Electrochemical reduction of *N*-methyl nicotinic acid at a mercury electrode, 301
Voltammetric studies on the redox behaviour of Cr, Mn, Cu, Sb and As ions in Na_2O–B_2O_3 melts, 307
Electrochemical and electrical properties of poly(hexachlorobuta-1,3-diene), an electrochemically graphitized film, 319
Mechanistic investigations of redox polymer-coated electrodes using probe-beam deflection and cyclic voltammetry, 939
Electrochemical studies of antibiotic 23187 (A23187) mediated permeability to divalent heavy-metal ions in phospholipid monolayers adsorbed on mercury electrodes, 1851
Electroactive bilayers employing conducting polymers. Part 2.—Speciation by *in situ* spectroscopy, 2209
High-order periodic voltammograms, period doubling and chaotic cyclic voltammetric behaviour, 2255
Determination of the half-wave potential of the species limiting the potential window. Measurement of Gibbs transfer energies at the water/1,2-dichloroethane interface, 2593
Ultraviolet–visible and electron paramagnetic resonance spectroelectrochemical studies of the reduction products of some anthraquinone sulphonates in aqueous solutions, 3653
Electrochemistry of zeolite-encapsulated cobalt salen complexes in acetonitrile and dimethyl sulphoxide solutions, 3831
Cyclobutane methanol
Thermal unimolecular decomposition of cyclobutanemethanol, 691
Cyclodextrin
Chiral molecular recognition: A ^{19}F nuclear magnetic resonance study of the diastereoisomer inclusion complexes formed between fluorinated amino acid derivatives and α-cyclodextrin in aqueous solution, 2699
Cyclohexanol
Self-association of cyclohexanols in inert solvents. Apparent heat capacities of cyclohexanol and substituted cyclohexanols in *n*-heptane and *n*-decane, 1739
Infrared study of cyclohexanol chemisorption in SAPO molecular sieves, 3315
Cyclohexene
Bimolecular hydrogen transfer over zeolites and SAPOs having the faujasite structure, 783
Cyclohexylperoxy radical
UV absorption spectrum and self-reaction of cyclohexylperoxy radicals, 3221
Cyclopropane–hydrogen fluoride dimer
Ab initio study of the cyclopropane–hydrogen fluoride dimer, 1293
Cytosine bases
Factors controlling the site of protonation of the one-electron adduct of cytosine and its derivatives, 3647
D_3O^+
Dissociation dynamics of D_3O^+ ions prepared in the $\tilde{B}\ ^2B_2$ state, 921
Dealumination
Computer simulation of the Si,Al distribution in dealuminated zeolite Y, 2837
Debye–Hückel approximation
Error in the Debye–Hückel approximation for dilute primitive model electrolytes with Bjerrum parameters of 2 and *ca.* 6.8 investigated by Monte Carlo methods. Excess energy, Helmholtz free energy, heat capacity and Widom activity coefficients corrected for neutralising background, 479
Decaglycerol dioleate
Cyclic voltammetric studies on the ternary system decaglycerol dioleate–heptane–water, 133
Decarboxylation
Decarboxylation of hydrogencarbonatopentaamminecobalt(III) in aquo-organic solvent media, 3753
Decomposition
Behaviour of copper–zirconium nasicon-type phosphate, $Cu^IZr_2(PO_4)_3$, in the decomposition of isopropyl alcohol, 2487
Decomposition of gaseous acetic acid on SnO_2, 2647
Defect structure
Electron paramagnetic resonance investigation of the paramagnetic centres in polycrystalline MoO_3, 1003
Dehydration
Hydrophilic and hydrophobic sites on dehydrated crystalline and amorphous silicas, 497
Dehydrogenation
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 3.—But-1-ene dehydrogenation activity, 1639
Density functional theory
Wetting transitions and capillary condensation in slit-like pores: Comparison of simulation and density functional theory, 3415
Dentistry
Reaction characteristics of hydroxyapatite with F^- and PO_3F^{2-} ions. Chemical states of fluorine in hydroxyapatite, 2235
Derivative Fourier-transform infrared spectroscopy
Localization of the proton in complexes of trifluoroacetic acid with pyridine *N*-oxides in dichloromethane by second-derivative infrared spectroscopy, 3825
1,3-Diarylbenzo[*c*]furan
Structural effects in ion pairs from 1,3-diarylbenzo[*c*]furans and alkali metals: an electron paramagnetic resonance and ENDOR study, 1837
Dibenzylmercury
Electron paramagnetic resonance and theoretical study of dibenzylmercury and diphenylmercury radical cations, 3171
1,8-Dibromoanthraquinone
Existence of the second excited triplet state of 1,8-dibromoanthraquinone observed by picosecond laser photolysis in solutions at room temperature, 3487
1,2-Dichloroethane
KrF laser-induced thermal decomposition of 1,2-dichloroethane, 2151
Dichloromethyl radical
Ultraviolet absorption spectra of the CH_2Cl and $CHCl_2$ radicals and the kinetics of their self-recombination reactions from 273 to 686 K, 2367
Dichroism
Simultaneous measurement of linear electric birefringence and linear electric dichroism using pulsed electric fields, 2219
Dicopper(I) radical complexes
Detection of electron paramagnetic resonance signals from three difference isotope combinations $^{63}Cu/^{63}Cu$, $^{63}Cu/^{65}Cu$ and $^{65}Cu/^{65}Cu$ in stable dicopper(I) radical complexes, 3185
9,10-Dicyanoanthracene
Multiple 'Rehm–Weller plots' in the electron-transfer quenching of singlet excited 9,10-dicyanoanthracene, 3811
Dielectric property
Pressure–volume–temperature data and dielectric properties of liquid and solid 2,2-dimethylbutan-1-ol up to 300 MPa, 1149
Dielectric relaxation
Molecular mechanisms of dielectric relaxation of highly polar liquids, 559
Dielectric relaxation studies of solid solutions of monofluorobenzaldehydes in a polymer: Eyring parameters for aldehyde group rotation, 1127
Dielectric relaxation of *tert*-butyl alcohol–water mixtures using a time-domain technique, 1569
Differential refractometry
Ternary diffusion coefficients of 18-crown-6 ether–KCl–water by direct least-squares analysis of Taylor dispersion measurements, 597
Differential scanning calorimetry
Micelle reorganisation characterised by differential scanning calorimetry for aqueous solutions containing hexa-decyltrimethylammonium bromide and tetradecyltrimethylammonium bromide, 1169
Crystallinity of uniform oligo(oxyethylene) mono-*n*-alkyl ethers studied by X-ray diffraction and differential scanning calorimetry, 1183
Poly(ethylene oxide) hydration studied by differential scanning calorimetry, 3671
Critical cooling rates to avoid ice crystallization in aqueous cryoprotectant solutions containing polymers, 3747
Differential thermal analysis
Finite-element simulation of the differential thermal analysis response to ignition of a pyrotechnic composition, 711
Diffraction
Characterization of monodispersed haematite particles by gas adsorption and Fourier-transform infrared spectroscopy, 2241
Diffuse reflectance Fourier-transform infrared spectroscopy
Surface species on a palladium/zirconia CO oxidation catalyst prepared from a glassy metal precursor: characterization by diffuse reflectance FTIR spectroscopy, 333
Interactions between sulphide minerals and alkylxanthate ions. Part 1.—A vibrational spectroscopic study of the interactions between sphalerite and synthetic zinc(II) and cadmium(II) sulphides, and ethylxanthate ions in aqueous and acetone solutions, 2769
Interactions between sulphide minerals and alkylxanthate ions. Part 4.—Vibrational spectroscopic and calorimetric study of the interactions between galena and synthetic lead(II) sulphide, and alkylxanthate ions in aqueous, acetone and acetonitrile solutions, 2779
Comparison of grafted vanadia species on ZrO_2, TiO_2, SiO_2 and TiO_2/SiO_2 mixed oxides,

3299
Diffuse reflectance infrared spectroscopy
Investigation of hydroxyl groups in crystalline silicoaluminophosphate SAPO-34 by diffuse reflectance infrared spectroscopy, 897
Diffuse reflectance near-infrared spectroscopy
Studies of the influence of a magnetic field on the diffusion of spilt-over deuterium on Y zeolites, 3921
Diffusion
Measurement of effective HCl diffusion coefficients through aqueous and gel films by a pH jump technique, 293
Voltammetric studies on the redox behaviour of Cr, Mn, Cu, Sb and As ions in Na_2O–B_2O_3 melts, 307
Diffusion of Na^+ and Rb^+ in a polymeric crown ether, 1393
Influence of the structure of alumina–aluminium phosphate (AAP) catalysts containing Fe^{3+} and Cr^{3+} on their catalytic activity for isopropyl alcohol decomposition, 1439
Transport of lignosulphonates under an external electric field, 1779
Fourier-transform pulsed-field-gradient ^1H nuclear magnetic resonance investigation of the diffusion of light *n*-alkanes in zeolite ZSM-5, 1935
Viscosities and pair potential energy function for the argon–methane gas-phase interaction, 2161
Steady-state heat and matter exchange at a phase interface, 2187
Determination of the thermodynamic parameters for transfer of alkoxyphenols from aqueous solution to SDS micelles by a Taylor–Aris diffusion technique, 2741
Effect of zeolite structure and morphology on intracrystalline *n*-hexane diffusion in pentasil zeolites studied by the zero-length column method, 3575
Ternary diffusion cofficients for the ill-conditioned systems KCl–KI–H_2O and NaCl–NaI–H_2O measured by a two-detector Taylor dispersion method, 3667
Electron-transfer distance in intermolecular diffusion-limited reactions, 3815
Studies of the influence of a magnetic field on the diffusion of spilt-over deuterium on Y zeolites, 3921
Diffusion current
Dual-cylinder microelectrodes. Part 1.—Theoretical consideration of the steady-state current, 2603
3,4-Dihydroxyphenyl alanine
Role of azide concentration in pulse radiolysis studies of oxidation: 3,4-dihydroxyphenylalanine, 2939
Dimer
Thermodynamic properties of hydrogen-bonded dimers B ··· HF from spectroscopy: B = HCN, CH_3CN, HC_2CN, $(CH_3)_3CCN$ and H_2O, 443
Dimethylacetylene
Electron paramagnetic resonance study of radical formation from cyclopentene and dimethylacetylene following adsorption onto H-mordenite, 3179
1,3-Dimethyladamantane
Spectroscopic studies of the order–disorder phase transition in 1,3-dimethyladamantane, 3835
2,2-Dimethylbutan-1-ol
Pressure–volume–temperature data and dielectric properties of liquid and solid 2,2-dimethylbutan-1-ol up to 300 MPa, 1149
Dimethylcyanamide
Effects of ionizing radiation on cyanamide and dimethylcyanamide, 3129
4,4-Dimethylpent-1-ene
Decomposition of 4,4-dimethylpent-1-ene in the presence of oxygen between 400 and 500°C: oxidation chemistry of allyl radicals, 681
Diphenylmercury
Electron paramagnetic resonance and theoretical study of dibenzylmercury and diphenylmercury radical cations, 3171
Dipolar glass
Localised dynamics of a dipolar glass $(NH_4)_xK_{1-x}I$, 3431
Dipole moment
Microwave spectrum, structure, dipole moment and excited states of $(CH_3)_3CCP$, 9
A new zwitterionic salt for non-linear optics: {4′-[Methyl(diphenyl)phosphonio]biphenyl-4-yl}triphenylborate, 2225
Microwave spectrum, molecular structure and dipole moment of pivalaldehyde, 2689
Discharge-flow reactor
Kinetics of the reaction between methoxyl radicals and hydrogen atoms, 2331
Dispersion
Properties of concentrated colloidal dispersions, 357
Structural effects of polydispersity in charged colloidal dispersions, 379
Dynamics of hard spherical colloids from the fluid to the glass, 395
Determination of structures in ferrofluids by small-angle neutron scattering, 403
Dynamic light scattering study of concentrated dispersions of anisotropic spherical colloids, 431
Properties of concentrated colloidal dispersions, 357
Structural effects of polydispersity in charged colloidal dispersions, 379
Dynamics of hard spherical colloids from the fluid to the glass, 395
Determination of structures in ferrofluids by small-angle neutron scattering, 403
Dynamic light scattering study of concentrated dispersions of anisotropic spherical colloids, 431
Ternary diffusion coefficients of 18-crown-6 ether–KCl–water by direct least-squares analysis of Taylor dispersion measurements, 597
Characterization of monodispersed haematite particles by gas adsorption and Fourier-transform infrared spectroscopy, 2241
Dispersion energy
Dispersion energy of a van der Waals complex of an aromatic molecule and a rare-gas atom, 2391
Disproportionation
Combination and disproportionation reactions of the $CH_3CH\dot{-}N\dot{-}NC_2H_5$ radical, 1827
Dissociation
Dissociation dynamics of D_2O^+ ions prepared in the $\tilde{B}\ ^2B_2$ state, 921
Dissolution
Following the spatial distribution of a solid dissolving at an interface by high-resolution nuclear magnetic resonance spectroscopy, 1585
Kinetic asymmetry between crystal growth and dissolution on a flat surface: computer simulation study at high temperatures, 2467
Effect of non-electrolyte properties on the enthalpic interaction coefficients for NaCl/NaI–non-electrolyte pairs in water. Dissolution enthalpies of NaCl and NaI in aqueous solutions of butan-2-one and 1,2-dimethoxyethane at 25 °C, 3661
DNA
Pulse radiolysis studies of electron migration in DNA from DNA base-radical anions to nitroacridine intercalators in aqueous solution, 3739
Dodecyl pentaoxyethylene alcohol
Mechanism of aggregation of oil-in-water microemulsion droplets stabilized by dodecyl pentaoxyethylene alcohol, $C_{12}E_5$, 3775
Double-charge-transfer spectroscopy
Energies of triplet electronic states of the N_2O^{2+} ion, 1681
Double layer
Double-layer studies in ethanolic solutions. Part 1.—Structure of the mercury/ethanol interface in the absence of specific adsorption, 2967
Dual-cylinder microelectrode
Dual-cylinder microelectrodes. Part 1.—Theoretical consideration of the steady-state current, 2603
Dye
Triplet–triplet and singlet–singlet energy-transfer studies between t-stilbene and 7-aminocoumarin laser dyes, 269
Electrochemical approach to halochromism: effect of salts upon the oxidation potential of $Fe(CN)_2(phen)_2$, 701
Metachromasy in clay-mineral systems: Adsorption of cationic dyes crystal violet and ethyl violet by kaolinite from aqueous and organic solutions, 1201
Dynamic light scattering
Dynamics of hard spherical colloids from the fluid to the glass, 395
Dynamics
Dissociation dynamics of D_2O^+ ions prepared in the $\tilde{B}\ ^2B_2$ state, 921
Dynamics of the chemisorption of hydrogen on the Fe(001) surface, 1447
Eigenvalue
Graph-theoretical method for evaluation of eigenvalues of real symmetric matrices from an eigenvector approach, 2925
Benzenoid hydrocarbons having eigenvalues of $\pm\sqrt{2}$, 3631
Electrical discharge
Production of NO_x in electrical discharges applied to the statistically designed matrix approach, 3359
Electrical double layer
Brownian motion of rod-shaped colloidal particles surrounded by electrical double layers, 971
Electric field
Numerical calculations of the transient-state linear electric birefringence for a sudden application of an alternating field superimposed on a unidirectional field, 297
Transport of lignosulphonates under an external electric field, 1779
Electroactive polymer film
Transport of neutral species in electroactive polymer films, 2047
Electrochemical carbonization
New approach to graphite synthesis: Electrochemical carbonization of hexachlorobuta-1,3-diene, 1187
Electrochemical cell
Investigation of the kinetic behaviour of captopril followed by alternating current polarography, 3505
Electrochemical polymer
Electrosynthesis and analytical characterization of films obtained by oxidation of 2,6-diaminopyridine, 3515
Electrochemistry
Ascorbic acid oxidation at polypyrrole-coated electrodes, 115
Adsorption of CO, intermediately formed in electrochemical reduction of CO_2, at a copper electrode, 123
Electrochemical reduction of *N*-methyl nicotinic acid at a mercury electrode, 301
Electrochemical approach to halochromism: effect of salts upon the oxidation potential of $Fe(CN)_2(phen)_2$, 701
Electrochemical study on calix[4]quinone and calix[4]hydroquinone in *N*,*N*-dimethylformamide, 1575
Electrochemical studies of antibiotic 23187 (A23187) mediated permeability to divalent heavy-metal ions in phospholipid monolayers adsorbed on mercury electrodes, 1851
Electroactive bilayers employing conducting polymers. Part 2.—Speciation by *in situ* spectroscopy, 2209
Evaluation of Cl^- adsorption in anodic Cl_2 evolution at Pt by means of impedance and potential-relaxation experiments. Influence of the state of surface oxidation of the Pt, 2705
Rotating stabilised cell: A new tool for the investigation of interfacial extraction kinetics between liquid phases, 2715
Electrochemical and *in situ* electron paramagnetic resonance studies of polypyrrole doped with polystyrene sulphonate, 2949
Double-layer studies in ethanolic solutions. Part 1.—Structure of the mercury/ethanol interface in the absence of specific adsorption, 2967
Controlling processes in the rate of charge
Thermodynamics and kinetics of heterogeneous electron transfer at glassy carbon/osmium-containing metallopolymer interfaces, 3769

transport through $[Os(bipy)_2(PVP)_xCl]Cl$ redox polymer-modified electrodes, 3761
Electrochemistry of zeolite-encapsulated cobalt salen complexes in acetonitrile and dimethyl sulphoxide solutions, 3831
Electroconvection
Electroconvection at an electrically inhomogeneous permselective membrane surface, 2079
Electrode
Solid-state redox diode composed of an electropolymerized metallocene layer and a polymer electrolyte layer containing a redox couple in a mixed-valent state, 1771
Electrolyte
Error in the Debye–Hückel approximation for dilute primitive model electrolytes with Bjerrum parameters of 2 and *ca.* 6.8 investigated by Monte Carlo methods. Excess energy, Helmholtz free energy, heat capacity and Widom activity coefficients corrected for neutralising background, 479
Attenuated total reflection Fourier-transform infrared spectroscopic study of ion–solvent and ion–ion interactions in lithium perchlorate–nitromethane solutions, 2961
Symmetrical Poisson–Boltzmann and modified Poisson–Boltzman theories, 3227
Self-diffusion of cobalt and manganese ions in aqueous electrolyte solutions, 3405
Electron absorption spectroscopy
Characterisation of Co^{II} and Co^{III} in CoAPO molecular sieves, 891
19-Electron complex
Electron paramagnetic resonance study of the 19-electron $Co(CO)_3L_2$ and $Co(CO)_2L_2PPh_3$ complexes [L_2 = 2,3-bis(diphenylphosphino)maleic anydride], 3113
Electron energy-loss spectroscopy
Near-threshold electron energy-loss (0–9 eV) and optical absorption (5–11.8 eV) spectroscopy of trifluoronitrosomethane (CF_3NO), 2887
Electronic absorption spectrometry
Electronic spectra of anionic mixed halide complexes in solution: identification, computation of spectra and stability constants and assignment of transitions of $[HgX_2Y]^-$ and $[HgX_2Y_2]^{2-}$, 1697
Electronic spectroscopy
Electrostatic field of charge distributions enclosed in a polarisable medium: Solvent effects in electronic spectra of ketyl ion pairs, 1117
Luminescence and excitation spectra of Nd^{3+} in $Cs_2NaGdCl_6$: $NdCl_6^{3-}$, 1707
Transitions between states of high angular momentum in the electronic spectrum of NH_2, 2121
Calculations of the electronic spectra and hyperpolarisabilities of selected dyes and pigments, 3021
Electronic state
Electronic states of some simple ethers studied by vacuum ultraviolet absorption and near-threshold electron energy-loss spectroscopy, 1049
Energies of triplet electronic states of the N_2O^{2+} ion, 1681
Dissociation of NH_3 to NH + H_2, 1809
Electronic structure
Photoelectron spectroscopic studies of the silicon pseudohalides: Relationship between geometrical and electronic Structure, 3805
Electronic transition dipole moment
Optical–optical double resonance (OODR) studies of the halogen ion-pair states. Part 2.—The $f(0_g^+) \rightarrow B(0_u^+)$ transition dipole moment function in I_2, 15
Electron microscopy
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 1.—Preparation and characterization, 1623
Electron migration
Pulse radiolysis studies of electron migration in DNA from DNA base-radical anions to nitroacridine intercalators in aqueous solution, 3739
Electron nuclear double resonance spectroscopy
Electron paramagnetic resonance and proton ENDOR studies in single crystals of potassium hydrogen thiodiacetate, 273
Structural effects in ion pairs from 1,3-diarylbenzo[*c*]furans and alkali metals: an electron paramagnetic resonance and ENDOR study, 1837
Electron-nuclear double resonance of long-lived radicals in aged X- and Y-type zeolite catalysts, 3151
Electron paramagnetic resonance, ENDOR and TRIPLE resonance studies on substitution reactions of 2-methyl-1,4-benzoquinone and 2,3-dimethoxy-5-methyl-1,4-benzoquinone in alkaline methanol, 3163
Electron paramagnetic resonance radiation dosimetry
Electron paramagnetic resonance radiation dosimetry: Possible inorganic alternatives to the EPR/alanine dosimeter, 3147
Electron paramagnetic resonance spectroscopy
Homoatomic polyanions of post-transition elements: synthesis, structure and characterization of the paramagnetic nonagermanide (3−) ion Ge_9^{3-}, a C_{2v} cluster with an odd skeletal electron count, 203
Electron paramagnetic resonance and proton ENDOR studies in single crystals of potassium hydrogen thiodiacetate, 273
Electron paramagnetic resonance study of the interactions of oxygen with silver/titania, 345
Reactivity of the surface paramagnetic species on polycrystalline ZnO and ZnO supported ruthenium with hydrogen and carbon monoxide: An electron paramagnetic resonance investigation, 493
σ-Radicals $R_3N \div$ hal: Electron paramagnetic resonance studies of the radiolysis of alkylammonium halides, 571
Redox behaviour of copper(II) ion pairs as surface species on CuTh oxide catalysts. Electron paramagnetic resonance and X-ray photoelectron spectroscopy study, 631
Copper–oxygen coordination in Cu^{II}-heteropolyanion compounds: electron paramagnetic resonance studies and CNDO/2 calculations, 717
Electron paramagnetic resonance investigation of the paramagnetic centres in polycrystalline MoO_3, 1003
Electron paramagnetic resonance study of hydrocarbon accommodation in copper(II)-exchanged zeolite ZSM-5 and related materials, 1025
Structure of the azetidine radical cation and the neutral azetidin-1-yl radical: an *ab initio* and electron paramagnetic resonance study, 1083
Magnetic field dependent microwave absorption in high-T_c superconducting cuprates, 1209
Characterization of vanadia/silica mixed gel catalysts by electron paramagnetic resonance spectroscopy at 110 K, 1217
Structural effects in ion pairs from 1,3-diarylbenzo[*c*]furans and alkali metals: an electron paramagnetic resonance and ENDOR study, 1837
Electron paramagnetic resonance study of isolated free radical pairs in M^+ 18-crown-6 $TCNQ^-$. (TCNQ = 7,7',8,8'-tetracyano-*p*-quinodimethane; M = K, Rb), 2229
Electron paramagnetic resonance and electron spin echo modulation analysis of the silver atom environment in γ-irradiated silver-exchanged sodium montmorillonite and its Al_{13} pillared derivative, 2749
Electron paramagnetic resonance studies of the formation of alkali-metal particles and ionic clusters in alkali-metal-loaded X zeolites, 2843
Electrochemical and *in situ* electron paramagnetic resonance studies of polypyrrole doped with polystyrene sulphonate, 2949
Studies of the oxidation state and location of palladium species in Al_{13}-pillared montmorillonite, 3083
Electron paramagnetic resonance study of the 19-electron $Co(CO)_3L_2$ and $Co(CO)_2L_2PPh_3$ complexes [L_2 = 2,3-bis(diphenylphosphino)maleic anydride], 3113
Electron paramagnetic resonance studies of radical pairs $[M(CO)_5^-]_2$ (M = Cr, Mo, W) trapped in single crystals of $PPh_4^+HM(CO)_5^-$, 3121
Effects of ionizing radiation on cyanamide and dimethylcyanamide, 3129
Adsorption of carbonate-derived molecules on the surface of carbonate-containing apatites, 3137
Electron paramagnetic resonance and electron spin-echo modulation measurements of sodium and potassium ionic clusters in X and Y zeolites, 3157
Electron paramagnetic resonance, ENDOR and TRIPLE resonance studies on substitution reactions of 2-methyl-1,4-benzoquinone and 2,3-dimethoxy-5-methyl-1,4-benzoquinone in alkaline methanol, 3163
Electron paramagnetic resonance and theoretical study of dibenzylmercury and diphenylmercury radical cations, 3171
Electron paramagnetic resonance study of radical formation from cyclopentene and dimethylacetylene following adsorption onto H-mordenite, 3179
Detection of electron paramagnetic resonance signals from three difference isotope combinations $^{63}Cu/^{63}Cu$, $^{63}Cu/^{65}Cu$ and $^{65}Cu/^{65}Cu$ in stable dicopper(I) radical complexes, 3185
Reactions of yttrium atoms in hydrocarbon matrices: Electron paramagnetic resonance evidence for matrix-isolated YO and Y_n (n = 5 or 7), 3189
Electron paramagnetic resonance studies of a range of ferritins and haemosiderins, 3193
Exchange-coupled Cr^V and Mo^V ions on the surface of CrO_x/ZrO_2 and MoO_x/ZrO_2: An electron paramagnetic resonance study, 3443
Electron paramagnetic resonance evidence for the occurrence of hydrogen and/or proton transfer between C_7, C_8 and C_{11} *n*-alkanes and their cations in irradiated CCl_3F matrices at 77 K, 3499
Factors controlling the site of protonation of the one-electron adduct of cytosine and its derivatives, 3647
Ultraviolet–visible and electron paramagnetic resonance spectroelectrochemical studies of the reduction products of some anthraquinone sulphonates in aqueous solutions, 3653
Synthesis, electron paramagnetic resonance and X-ray structure characterization of copper(II) ternary complexes of *p*-aminobenzoic and 3,4-dimethoxyhydrocinnamic acid with phenanthrolines, 3863
Electron paramagnetic resonance and INDO-MO studies of 2-methylbutane, 3-methylpentane and 3-methylhexane cations produced in several halocarbon matrices γ-irradiated at 77 K, 3869
Electron spin-echo envelope modulation spectroscopy
Electron paramagnetic resonance and electron spin echo modulation analysis of the silver atom environment in γ-irradiated silver-exchanged sodium montmorillonite and its Al_{13} pillared derivative, 2749
Electron paramagnetic resonance and electron spin-echo modulation measurements of sodium and potassium ionic clusters in X and Y zeolites, 3157
Electron spin-echo envelope modulation and spin–spin interaction studies of the iron–sulphur clusters in fumarate reductase of *escherichia coli*, 3199
Electron spin-echo spectroscopy of the iron–sulphur clusters of xanthine oxidase from milk, 3203
Electron transfer
Monte Carlo calculation of energy and electron transfer in a monolayer of spheroids, 51
Mechanisms of fluorescence quenching of aromatic molecules by potassium iodide and potassium bromide in methanol–ethanol solutions, 1523
Electron transfer from ground-state triethylamine to the lowest excited triplet states of chloroanthraquinones (the 1-chloro, 2-chloro, 1,5-dichloro and 1,8-dichloro compounds) in ethanol and toluene at room temperature, 3731

Multiple 'Rehm–Weller plots' in the electron-transfer quenching of singlet excited 9,10-dicyanoanthracene, 3811
Electron-transfer distance in intermolecular diffusion-limited reactions, 3815
Electrophoresis
Electrophoresis of drops and bubbles, 1883
Electropolymerization
Cationic polypyrrole composites with anionic functional molecules, 1765
Electorheological fluid
Stress-transfer mechanisms in electrorheological suspensions, 425
Electrostatic energy
Coulombic energy in bromide salts of mononitrogen organic bases, 1333
Electrostatics
Electrostatic effects in dilute solutions containing charged colloidal entities, 3529
Electroviscous effect
Effect of long-range repulsive forces on the viscosity of concentrated latices: comparison of experimental data with an effective hard-sphere model, 1365
EMF
Analysis of the fast relaxation times for micelle kinetics taking into account new EMF data, 707
Emission spectroscopy
Measurement of the average emission lifetimes of the $A\ ^1\Sigma^+ - X\ ^1\Sigma^+$ and the orange arc bands of CaO, 677
Picosecond time-resolved absorption and emission studies of pyrazolotriazole azomethine dyes, 3479
Emulsion
Bridging flocculation induced by competitive adsorption: implications for emulsion stability, 963
Energy transfer
Monte Carlo calculation of energy and electron transfer in a monolayer of spheroids, 51
Triplet–triplet and singlet–singlet energy-transfer studies between t-stilbene and 7-aminocoumarin laser dyes, 269
Vibrational relaxation of HCN by ^3He, ^4He, H_2, HD, D_2, CH_4 and C_2H_6, 807
Enthalpic interaction coefficient
Calorimetric and volumetric studies of the interactions of some amides in water and in 6 mol dm^{-3} aqueous guanidinium chloride, 2975
Effect of non-electrolyte properties on the enthalpic interaction coefficients for NaCl/NaI–non-electrolyte pairs in water. Dissolution enthalpies of NaCl and NaI in aqueous solutions of butan-2-one and 1,2-dimethoxyethane at 25 °C, 3661
Enthalpy
Enthalpies of transfer of tetrabutylammonium bromide as indicators of the structure of aqueous solvents: aqueous methanol, ethanol, propan-1-ol, 2-methylpropan-2-ol and 1,4-dioxane systems, 87
Standard enthalpy of formation of hexamethyldisilane, 841
Free energy and enthalpy changes for the process of transfer from gas and from dilute aqueous solutions of some alkanes and monofunctional saturated organic compounds, 2433
Enthalpies of transfer of some non-electrolytes from acetonitrile to acetonitrile–methanol mixtures, 2443
Enthalpies of transfer of formamide, *N*-methylformamide, *N*,*N*-dimethylformamide and urea from water to some aqueous alcohol solvent systems at 298 K, 2447
Temperature dependence of enthalpic properties of aqueous micellar solutions of some *N*-alkylnicotinamide chloride surfactants, 2983
Effect of non-electrolyte properties on the enthalpic interaction coefficients for NaCl/NaI–non-electrolyte pairs in water. Dissolution enthalpies of NaCl and NaI in aqueous solutions of butan-2-one and 1,2-dimethoxyethane at 25 °C, 3661
Enzyme
Photocatalytic fixation of carbon dioxide in oxoglutaric acid using isocitrate dehydrogenase and cadmium sulphide, 553
Enzyme catalysis
Enzyme catalysis in uni- and bi-continuous microemulsions: Dependence of kinetics on substrate partitioning, 465
Enzyme catalysis in uni- and bi-continuous microemulsions: Dependence of kinetics on substrate partitioning, 465
Enzyme membrane
Recognition of substrates by membrane potential of immobilized enzyme membranes, 695
Recognition of substrates by membrane potential of immobilized enzyme membranes: Membrane potential theory, 2723
Equation of state
Coordination number and equation of state of square-well and square-shoulder fluids: Simulation and quasi-chemical model, 3373
Equilibrium constant
Correlation between the dielectric solvent polarity parameter, β, and rate and equilibrium constants for various processes, 2589
Escherichia coli
Electron spin-echo envelope modulation and spin–spin interaction studies of the iron–sulphur clusters in fumarate reductase of *escherichia coli*, 3199
Ethane
Classical dynamics of intramolecular energy flow in ethane, 3595
Ethanol
High-temperature oxidation of ethanol. Part 2.—Kinetic modelling, 2549
Infrared spectroscopic studies of the reactions of alcohols over Group IVB metal oxide catalysts. Part 3.—Ethanol over TiO_2, ZrO_2 and HfO_2, and general conclusions from Parts 1 to 3, 2661
Adsorption of pure vapours of ethanol and *n*-heptane and their liquid mixtures on activated carbon, 3799
Ethanol–oxygen mixture
High-temperature oxidation of ethanol. Part 1.—Ignition delays in shock waves, 1691
Ethene
Arrhenius parameters for the addition of HO_2 radicals to ethene between 400 and 500 °C, 2147
Ether
Electronic states of some simple ethers studied by vacuum ultraviolet absorption and near-threshold electron energy-loss spectroscopy, 1049
Ethyl methyl ether
Ab initio molecular orbital calculations of conformational energies of ethyl methyl ether: Basis set and electron correlation effects, 3207
Evanescent wave induced fluorescence spectroscopy
Time-resolved evanescent wave induced fluorescence spectroscopy. Part 1.—Deviations in the fluorescence lifetime of tetrasulphonated aluminium phthalocyanine at a fused silica/methanol interface, 825
EXAFS
Lanthanum L_3-, europium L_3- and copper K-edge EXAFS investigation of lanthanum copper oxides, 1405
Local environment of intercalated lanthanide ions in vermiculite, 3077
Excess enthalpy
Empirical correlations between thermodynamic and spectroscopic properties of aqueous solutions of alkan-*m*,*n*-diols. Excess enthalpies and spin–lattice relaxation times at 298.15 K, 2989
Excess molar property
Effect of molecular size on the W-shaped excess heat capacities: Oxaalkane–alkane systems, 3001
Excess volume
Topological investigations on the association of alkanols: Excess volume of pyridine–alkanol (C_1–C_{10}) mixtures, 1561
Topological investigations of the state of some transition-metal ions in some binary mixtures of non-electrolytes: Molar excess volumes, 2579
Exchange
Exchange concept in water-in-oil microemulsions: Consequences for 'slow' chemical reactions, 2607
Excited state
Microwave spectrum, structure, dipole moment and excited states of $(CH_3)_3CCP$, 9
Resonance-enhanced multiphoton ionisation spectroscopy of the NH(ND) radical. Part 1.—The d $^1\Sigma^+$ state, 2515
Existence of the second excited triplet state of 1,8-dibromoanthraquinone observed by picosecond laser photolysis in solutions at room temperature, 3487
Multiple 'Rehm–Weller plots' in the electron-transfer quenching of singlet excited 9,10-dicyanoanthracene, 3811
Extended X-ray and fine structure analysis
EXAFS evidence for the formation of a V_2O_5 thin film by chemical vapour deposition on SiO_2, 1807
Eyring parameter
Dielectric relaxation studies of solid solutions of monofluorobenzaldehydes in a polymer: Eyring parameters for aldehyde group rotation, 1127
Factorial design
Production of NO_x in electrical discharges applied to the statistically designed matrix approach, 3359
Faraday (Michael), Bicentennial assessment
Science at interfaces: The metaphor and the reality. A bicentennial assessment of Michael Faraday, 2865
Fast reaction
Rate constant calculations on fast diatom–diatom reactions, 1667
Ferricyanide ion
The Bruker Lecture. Single-crystal ^{13}C, ^{14}N and ^{23}Na ENDOR on $Fe(CN)_6^{3-}$ doped into NaCl, 3105
Ferritin
Electron paramagnetic resonance studies of a range of ferritins and haemosiderins, 3193
Ferrocene
Temperature coefficients of half-wave potentials and entropies of transfer of cations in aprotic solvents, 2599
Ferrofluid
Determination of structures in ferrofluids by small-angle neutron scattering, 403
Film
Fourier-transform infrared, attenuated total reflection spectroscopy: A complementary tool for the investigation of the adsorption of CO on thin metal layers, 637
Low-pressure photochemical vapour deposition of gallium metal from an iodide precursor, 995
Interfacial film of surfactant adsorbed at a solid/liquid interface, 2745
Adsorption of (*Z*)-but-2-ene on iron oxide films, 3285
Finite-element simulation
Finite-element simulation of the differential thermal analysis response to ignition of a pyrotechnic composition, 711
Fischer-Tropsch catalysis
Early stages of Fischer-Tropsch activity on ThO_2 and $Th_{0.9}Ce_{0.1}O_2$, 1259
Flash photolysis
Photophysics of Ru^{II} complexes with 1,4,5,8-tetraazaphenanthrene, incorporated into Sephadex SP C-25, 259
Kinetic study of the Na + O_2 + He reaction in the temperature range 392–777 K, 1075
Flash photolysis study of the $CH_3O_2 + CH_3O_2$ and $CH_3O_2 + HO_2$ reactions between 600 and 719 K: Unimolecular decomposition of methylhydroperoxide, 3213
Interaction of halide and pseudohalide ions with the triplet state of 1-nitronaphthalene. Effect of acidity: a flash photolysis study, 3617
Flocculation
Transient collision efficiency of polymer-induced flocculation, 1177
Computer simulation of bridging flocculation, 2193
Flocculation of silica particles by adsorbing and non-adsorbing polymers, 2201
Transient behaviour of polymer-induced

flocculation, 3245
Flotation
Interactions between sulphide minerals and alkylxanthate ions. Part 1.—A vibrational spectroscopic study of the interactions between sphalerite and synthetic zinc(II) and cadmium(II) sulphides, and ethylxanthate ions in aqueous and acetone solutions, 2769
Interactions between sulphide minerals and alkylxanthate ions. Part 4.—Vibrational spectroscopic and calorimetric study of the interactions between galena and synthetic lead(II) sulphide, and alkylxanthate ions in aqueous, acetone and acetonitrile solutions, 2779
Flow
Brownian motion of rod-like micelles under flow, 2073
Flow dynamics
Flow dynamics of supersonic molecular beams and the measurement of rotational–translational coupling parameters for N_2 and H_2, 1069
Fluorapatite
Reaction characteristics of hydroxyapatite with F^- and PO_3F^{2-} ions. Chemical states of fluorine in hydroxyapatite, 2235
Fluorescence
Optical–optical double resonance (OODR) studies of the halogen ion-pair states. Part 2.—The $f(0_g^+) \rightarrow B(0_u^+)$ transition dipole moment function in I_2, 15
Benzophenone sensitization of triplet oxazine and of delayed fluorescence by oxazine in acetonitrile solution, 547
Mechanisms of fluorescence quenching of aromatic molecules by potassium iodide and potassium bromide in methanol–ethanol solutions, 1523
One-dimensional singlet energy migration in the columnar liquid crystal of a triphenylene derivative, 1785
A new zwitterionic salt for non-linear optics: {4′-[Methyl(diphenyl)phosphonio]biphenyl-4-yl}triphenylborate, 2225
Kinetics of the reaction between methoxyl radicals and hydrogen atoms, 2331
S_1–S_0 supersonic jet fluorescence spectra of *trans*-2-methylstyrene: An out-of-plane vinyl group in S_0, 3335
Fluorescence anisotropy
Rotational dynamics of AOT reversed micelles in near-critical and supercritical alkanes, 1899
Fluorescence quenching
Multiple 'Rehm–Weller plots' in the electron-transfer quenching of singlet excited 9,10-dicyanoanthracene, 3811
Electron-transfer distance in intermolecular diffusion-limited reactions, 3815
Fluorescence spectrophotometry
Prospects for using photoinduced intramolecular proton transfer to study the dynamics of conformational changes in flexible molecular chains, 1103
Fluorescence spectroscopy
Dual emission from ion pairs produced by excited-state proton transfer in the naphthol–amine system at 77 K. Steric orientation of contact and separated ion pairs, 1311
Fluorescence spectroscopy of supersonically cooled CFCl, 2407
Methyl and vinyl torsional potentials in *cis*- and *trans*-3-methylstyrene from supersonic jet fluorescence spectra, 3585
Fluoro(sulphido)boron
Microwave spectrum of the unstable molecule fluoro(sulphido)boron, FBS, 1499
Force constant
Force constant of transition metal ion–ligand bonds: Molecular-orbital calculations, 535
Formaldehyde
Oxidation of formaldehyde by the hydroxyl radical in aqueous solution, 1513
Formate intermediate
Formation and decomposition of formate intermediates on supported Cu catalysts exposed to CO–CO_2–H_2 mixtures: evidence for a precursor state, 193
Fourier-transform infared absorption spectroscopy
Vibrationally mediated photodissociation of nitrous acid, 3461
Fourier-transform infrared spectroscopy
Infrared spectroscopic study of ammonia and nitric oxide adsorption and reactivity on a Ru/TiO_2 catalyst: effect of oxo-reducing treatments, 337
Fourier-transform infrared, attenuated total reflection spectroscopy: A complementary tool for the investigation of the adsorption of CO on thin metal layers, 637
Fourier-transform infrared studies of carbon monoxide adsorption on platinum and palladium hydrosols: Influence of pH, 1221
Infrared study of CO adsorption on reduced and oxidised silica-supported copper catalysts, 1467
Infrared study of CO adsorption on Pt–Rh/Al_2O_3 catalysts, 1479
Fourier-transform infrared study of intramolecular $O^-Li^+ \cdots ON \rightleftharpoons O^- \cdots Li^+ON$ bonds with large Li^+ polarizability in 4-substituted 2-diethylaminomethylphenolate *N*-oxides, 1545
In situ Fourier-transform infrared investigation of the interaction of CO–CO_2–H_2 with Cu catalysts at low temperatures and high pressures, 1791
Fourier-transform infrared study of Rh/SiO_2 catalysts exposed to CO–H_2 mixtures at high pressure and temperature, 1921
Fourier-transform infrared product study of the reaction of $CH_3O_2 + HO_2$ over the pressure range 15–700 Torr at 295 K, 2379
CO Fourier-transform infrared study of metallocenes on silica gel and $AlPO_4$, 2473
Carbon dioxide hydrogenation over Au/ZrO_2 catalysts from amorphous precursors: Catalytic reaction mechanism, 2821
Fourier-transform infrared study of pyridine sorbed on zeolite HY, 3319
Catalytic and infrared spectroscopic investigations of the molecular sieve types SAPO-34 and SAPO-11, 3569
Oxidation of methylene in low-temperature matrices, 3725
Fourier-transform infrared studies of carbon monoxide adsorption on platinum sols in alcoholic media, 3779
CO oxidation on Rh/Al_2O_3 catalysts, 3907
Fourier-transform microwave spectroscopy
Rotational spectrum of phosphonium iodide vapour, 507
Microwave spectroscopy of pyrolytically produced, rapidly isolated transient molecules, 3325
Fourier-transform pulsed-field-gradient ^1H nuclear magnetic resonance
Fourier-transform pulsed-field-gradient ^1H nuclear magnetic resonance investigation of the diffusion of light *n*-alkanes in zeolite ZSM-5, 1935
Fragmentation
Fragmentation of valance electronic states of SF_6^+ studied with synchrotron radiation, 1287
Free energy
Micellar growth of octaethylene glycol decyl ether, 957
Free energy and enthalpy changes for the process of transfer from gas and from dilute aqueous solutions of some alkanes and monofunctional saturated organic compounds, 2433
Free radical
Determination of the Arrhenius parameters for the initiation reaction $C_3H_6 + O_2 \rightarrow CH_2CHCH_2 + HO_2$, 241
One-electron reactions of 1,5- and 1,8-dihydroxy-9,10-anthraquinones. A pulse radiolysis study, 1109
Reactivity of $Ru(bpy)_3^+$ towards the radicals originating from the scavenging of hydrogen atoms and hydroxyl radicals by methanol, ethanol, propan-2-ol, *tert*-butyl alcohol and formate ions in aqueous solution: a pulse radiolytic study, 2179
Electron paramagnetic resonance study of isolated free radical pairs in M^+ 18-crown-6 $TCNQ^-$. (TCNQ = 7,7′,8,8′-tetracyano-*p*-quinodimethane; M = K, Rb), 2229
Kinetics of the reaction between methoxyl radicals and hydrogen atoms, 2331
Laser flash photolysis study of the UV spectrum and kinetics of reactions of $HOCH_2CH_2O_2$ radicals, 2351
Resonance-enhanced multiphoton ionisation spectroscopy of the NH(ND) radical. Part 1.—The $d\,^1\Sigma^+$ state, 2515
Flash photolysis study of the $CH_3O_2 + CH_3O_2$ and $CH_3O_2 + HO_2$ reactions between 600 and 719 K: Unimolecular decomposition of methylhydroperoxide, 3213
Fullerene
Three candidates for the structure of C_{84}, 1945
Proposal of a chiral structure for the fullerene C_{76}, 2861
New light on 'the case of imperfect combustion', 2871
The higher fullerenes: a candidate for the structure of C_{78}, 3103
Closed-shell three-connected clusters: Topological and group-theoretical aspects, 3353
Furan
Kinetics of pyrolysis of furan, 815
Gallic acid
Hysteresis and complex oscillations of the uncatalysed Belousov–Zhabotinskii reaction in a stirred flow reactor, 2135
Gallium
Transformation of butanes over ZSM-5 zeolites. Part 2.—Formation of aromatic hydrocarbons over Zn-ZSM-5 and Ga-ZSM-5, 669
Low-pressure photochemical vapour deposition of gallium metal from an iodide precursor, 995
Gaseous bromine
Kinetics of the reaction of silicon with gaseous bromine, 45
Gas-phase reaction
Characterisation of oscillations in the $H_2 + O_2$ reaction in a continuous-flow reactor, 523
Gas–solid interaction
Gas–solid interactions studied by quantitative powder X-ray diffraction analysis, 3063
Quantitative studies of gas–solid reactions by powder X-ray diffraction: Stoichiometric and catalytic conversion of CO to CO_2 over $YBa_2Cu_3O_{6+x}$, 3067
Gel
Measurement of effective HCl diffusion coefficients through aqueous and gel films by a pH jump technique, 293
Structural studies of gel phases. Part 2.—Infrared spectroscopic study of silica monoliths; the interaction of water with surface species, 3857
Gel phase
Structural studies of gel phases. Part 1.—Infrared spectroscopic study of silica monoliths; the effect of thermal history on structure, 761
Generalized London potential
Prediction of vapour–liquid equilibrium data for binary mixtures from molecular parameters using a generalized London potential, 57
Germanium tetrabromide
Photoionisation mass-spectrometric study of fragmentation of $SiBr_4$ and $GeBr_4$ in the range 400–1220 Å, 3717
Gibbs free energy
Determination of the half-wave potential of the species limiting the potential window. Measurement of Gibbs transfer energies at the water/1,2-dichloroethane interface, 2593
Thermodynamics of solvation of ions. Part 5.—Gibbs free energy of hydration at 298.15 K, 2995
Goethite
Preparation and characterization of colloidal α-FeOOH with a narrow size distribution, 869
Gold–zirconia catalyst
Carbon dioxide hydrogenation over Au/ZrO_2 catalysts from amorphous precursors: Catalytic reaction mechanism, 2821
Graphite
New approach to graphite synthesis: Electrochemical carbonization of hexachlorobuta-1,3-diene, 1187

Graph theory
Graph-theoretical method for evaluation of eigenvalues of real symmetric matrices from an eigenvector approach, 2925
Benzenoid hydrocarbons having eigenvalues of $\pm\sqrt{2}$, 3631
Group 4 metal oxide catalyst
Infrared spectroscopic studies of the reactions of alcohols over Group IVB metal oxide catalysts. Part 2.—Methanol over TiO_2, ZrO_2 and HfO_2, 2655
Infrared spectroscopic studies of the reactions of alcohols over Group IVB metal oxide catalysts. Part 3.—Ethanol over TiO_2, ZrO_2 and HfO_2, and general conclusions from Parts 1 to 3, 2661
Group theory
Closed-shell three-connected clusters: Topological and group-theoretical aspects, 3353
Guanidinium chloride
Calorimetric and volumetric studies of the interactions of some amides in water and in 6 mol dm^{-3} aqueous guanidinium chloride, 2975
Guest molecule
Structural properties of α,ω-dibromoalkane/urea inclusion compounds: A new type of interchannel guest molecule ordering, 3423
$H_2 + O_2$ reaction
Characterisation of oscillations in the $H_2 + O_2$ reaction in a continuous-flow reactor, 523
Modelling complex oscillations for the $H_2 + O_2$ reaction in an open system, 2539
H_2–O_2 system
Time-resolved study of hydrogen atoms in the H_2–O_2 system under conditions close to criticality, 2907
Haematite
Characterization of monodispersed haematite particles by gas adsorption and Fourier-transform infrared spectroscopy, 2241
Haemosiderin
Electron paramagnetic resonance studies of a range of ferritins and haemosiderins, 3193
Half-wave potential
Determination of the half-wave potential of the species limiting the potential window. Measurement of Gibbs transfer energies at the water/1,2-dichloroethane interface, 2593
Temperature coefficients of half-wave potentials and entropies of transfer of cations in aprotic solvents, 2599
Halide complex
Electronic spectra of anionic mixed halide complexes in solution: identification, computation of spectra and stability constants and assignment of transitions of $[HgX_2Y]^-$ and $[HgX_2Y_2]^{2-}$, 1697
Halochromism
Electrochemical approach to halochromism: effect of salts upon the oxidation potential of $Fe(CN)_2(phen)_2$, 701
Hard-sphere fluid
Pair correlations of non-uniform hard-sphere fluids in narrow slits and the mechanism of oscillatory solvation forces, 1869
Hard-sphere model
Effect of long-range repulsive forces on the viscosity of concentrated latices: comparison of experimental data with an effective hard-sphere model, 1365
Coordination number and equation of state of square-well and square-shoulder fluids: Simulation and quasi-chemical model, 3373
HCN
Vibrational relaxation of HCN by ^3He, ^4He, H_2, HD, D_2, CH_4 and C_2H_6, 807
Heat capacity
Heat capacities, self-association and complex formation in alcohol–ester systems, 1133
Self-association of phenols in inert solvents. Apparent heat capacities of phenol, substituted phenols and aromatic alcohols in *n*-heptane, 1733
Self-association of cyclohexanols in inert solvents. Apparent heat capacities of cyclohexanol and substituted cyclohexanols in *n*-heptane and *n*-decane, 1739
Effect of molecular size on the W-shaped excess heat capacities: Oxaalkane–alkane systems, 3001
Heptane
Adsorption of pure vapours of ethanol and *n*-heptane and their liquid mixtures on activated carbon, 3799
Heterogeneous catalysis
Heterogeneous catalysis in solution. Part 24.-Kinetics of a redox system exhibiting three separate diffusion-controlled regions: the iron(III) + iodide reaction at a rotating platinum disc catalyst, 977
Infrared study of the adsorption of formic acid on silica-supported copper and oxidised copper catalysts, 1491
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 1.—Preparation and characterization, 1623
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 2.—Reduction behaviour, 1631
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 3.—But-1-ene dehydrogenation activity, 1639
Dispersion and 3-picoline ammoxidation investigation of V_2O_5/α-Al_2O_3 catalysts, 1649
Infrared study of methyl formate and formaldehyde adsorption on reduced and oxidised silica-supported copper catalysts, 2785
Infrared study of the adsorption of methanol on oxidised and reduced Cu/SiO_2 catalysts, 2795
Synthesis and catalytic properties of MAPO-36 molecular sieve, 3309
Heterogeneous system
Following the spatial distribution of a solid dissolving at an interface by high-resolution nuclear magnetic resonance spectroscopy, 1585
Heteropoly acid
Catalytic activity of supported heteropoly acids for reactions requiring strong acid centres, 749
Hexachlorobuta-1,3-diene
New approach to graphite synthesis: Electrochemical carbonization of hexachlorobuta-1,3-diene, 1187
Hexamethyldisilane
Standard enthalpy of formation of hexamethyldisilane, 841
***n*-Hexane**
Effect of zeolite structure and morphology on intracrystalline *n*-hexane diffusion in pentasil zeolites studied by the zero-length column method, 3575
High-field magnetic measurements
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 2.—Reduction behaviour, 1631
High-field nuclear magnetic resonance powder spectroscopy
High-field nuclear magnetic resonance and molecular dynamics investigations of alditol conformations in aqueous and non-aqueous solvents, 579
Powder determination of ^{39}K nuclear quadrupole coupling, 2453
High-order periodic voltammogram
High-order periodic voltammograms, period doubling and chaotic cyclic voltammetric behaviour, 2255
High-resolution Fourier-transform infrared spectroscopy
High-resolution Fourier-transform infrared spectroscopy of $\nu_3 + \nu_8H_2CCS$, ν_1HDCCS and ν_1D_2CCS in the gas phase: an improved r_s structure for thioketene, 1815
High-resolution neutron inelastic scattering spectroscopy
Dynamics of acetonitrile crystals and clusters, 539
High-resolution nuclear magnetic resonance spectroscopy
Following the spatial distribution of a solid dissolving at an interface by high-resolution nuclear magnetic resonance spectroscopy, 1585
High-temperature oxidation
High-temperature oxidation of ethanol. Part 2.—Kinetic modelling, 2549
High-temperature solid
Novel ionic plastic phase of $[(CH_3)_4N]SCN$ obtainable above 455 K studied by proton magnetic resonance, electrical conductivity and thermal measurements, 987
Hindered rotor model
Hindered rotor model for radical association reactions, 2291
Host–guest complex
Molecular mechanics study of 18-azacrown-6 and its binding interactions in 1 : 1 host–guest complexes with neutral and anionic species, 1321
Hückel calculation
Homoatomic polyanions of post-transition elements: synthesis, structure and characterization of the paramagnetic nonagermanide (3−) ion Ge_9^{3-}, a C_{2v} cluster with an odd skeletal electron count, 203
Hydration
Hydrophilic and hydrophobic sites on dehydrated crystalline and amorphous silicas, 497
Poly(ethylene oxide) hydration studied by differential scanning calorimetry, 3671
Hydration force
Hydration force and the interfacial structure of the polar surface, 2733
Hydrocarbon diffusion
Molecular dynamics studies of hydrocarbon diffusion in zeolites, 1947
Hydrocarbon oxidation
Fourier-transform infrared product study of the reaction of $CH_3O_2 + HO_2$ over the pressure range 15–700 Torr at 295 K, 2379
Hydrogen bond
Thermodynamic properties of hydrogen-bonded dimers B ··· HF from spectroscopy: B = HCN, CH_3CN, HC_2CN, $(CH_3)_3CCN$ and H_2O, 443
Reorientation of water molecules in solid hydrates. Correlation with spectroscopic and structural data, 1193
Hydrogen bonding and tautomerism in 3-substituted β-thioxoketones: an *ab initio* molecular orbital study, 1297
Polarity and hydrogen-bonding ability of some binary aqueous–organic mixtures, 1339
Effect of water on the phosphorescence spectra of aromatic carbonyl compounds. Part 2.—Dual phosphorescence of benzophenone at 77 K in ethanol–water, 1509
Increased basicity and hydrogen-bonding donor ability of water by hydrogen bonding to dimethyl sulphoxide and its coordination to 1,4,8,11-tetramethyl-1,4,8,11-tetraazacyclotetradecanenickel(II) in nitrobenzene, 1537
Rotational spectroscopy of a mixture of thiirane and hydrogen bromide: Detection and characterization of a short-lived complex $(CH_2)_2S\cdots HBr$ in a pulsed jet, 3327
Geometric conformation of the oxirane hydrogen halide dimers from *ab initio* calculations, 3495
Localization of the proton in complexes of trifluoroacetic acid with pyridine *N*-oxides in dichloromethane by second-derivative infrared spectroscopy, 3825
Hydrogencarbonatopentaamminecobalt(III)
Decarboxylation of hydrogencarbonatopentaamminecobalt(III) in aquo-organic solvent media, 3753
Hydrogen exchange reaction
Non-equilibrium kinetics of bimolecular exchange reactions. Part 2.—Improved formalism and applications to $H + H_2 \rightarrow H_2 + H$ and its isotopic variants, 229
Hydrogenolysis
Hydrogenolysis of alkanes. Part 6.—Modification of supported ruthenium catalysts by vanadium pentaoxide, 767
Hydrogenolysis of alkanes. Part 7.—Hydrogenolysis of propane and of n-butane over Ir/TiO_2 and Os/TiO_2 catalysts, 775
Hydrogenolysis of propane, *n*-butane and isobutane on rhenium/alumina catalysts,

2479
Hydrogen spillover
Studies of the influence of a magnetic field on the diffusion of spilt-over deuterium on Y zeolites, 3921
Hydroperoxy radical
Fourier-transform infrared product study of the reaction of $CH_3O_2 + HO_2$ over the pressure range 15–700 Torr at 295 K, 2379
Hydrophobicity
Partitioning in aqueous two-phase systems as a method of estimation of the relative hydrophobicity of solutes, 137
Influence of ionic and polymer composition on the properties of the phases of aqueous two-phase systems formed by non-ionic polymers, 141
Hydrothermal exchange
Fast hydrothermal ammonium exchange of zeolite Na-Y, 787
Hydroxyapatite
Reaction characteristics of hydroxyapatite with F^- and PO_3F^{2-} ions. Chemical states of fluorine in hydroxyapatite, 2235
Hydroxy group
Effect of porosity on the distribution and reactivity of hydroxyl groups on the surface of silica gel, 3899
Hydroxy radical
Reaction of CH_3 radicals with OH at room temperature and pressure, 2325
Hyperfine coupling constant
Vibrationally averaged β-hyperfine coupling constants for the muonium-substituted ethyl radical, 2901
Hyperpolarisability
Calculated hyperpolarisabilities of polythiophenes, polyfurans and polypyrroles, 3009
Calculated hyperpolarisabilities of substituted phenylsilanes, 3015
Calculations of the electronic spectra and hyperpolarisabilities of selected dyes and pigments, 3021
Hysteresis
Hysteresis and complex oscillations of the uncatalysed Belousov–Zhabotinskii reaction in a stirred flow reactor, 2135
Ice crystallization
Critical cooling rates to avoid ice crystallization in solutions of cryoprotective agents, 101
Critical cooling rates to avoid ice crystallization in aqueous cryoprotectant solutions containing polymers, 3747
Ignition
High-temperature oxidation of ethanol. Part 1.—Ignition delays in shock waves, 1691
Imidazole
Muonium addition to an imidazole ring, 1497
Imidogen
Resonance-enhanced multiphoton ionisation spectroscopy of the NH(ND) radical. Part 1.—The d $^1\Sigma^+$ state, 2515
Impedance
Evaluation of Cl$^-$ adsorption in anodic Cl_2 evolution at Pt by means of impedance and potential-relaxation experiments. Influence of the state of surface oxidation of the Pt, 2705
Imperfect combustion
New light on 'the case of imperfect combustion', 2871
Inclusion
Chiral molecular recognition: A ^{19}F nuclear magnetic resonance study of the diastereoisomer inclusion complexes formed between fluorinated amino acid derivatives and α-cyclodextrin in aqueous solution, 2699
Structural properties of α,ω-dibromoalkane/urea inclusion compounds: A new type of interchannel guest molecule ordering, 3423
Indium antimonide
Iodine adsorption on InSb(001) at room temperature and low temperature: Surface reaction, 3259
INDO calculations
Electron paramagnetic resonance and INDO-MO studies of 2-methylbutane, 3-methylpentane and 3-methylhexane cations produced in several halocarbon matrices γ-irradiated at 77 K, 3869
Inelastic neutron scattering
Localised dynamics of a dipolar glass $(NH_4)_xK_{1-x}I$, 3431
Infrared chemiluminescence
Infrared chemiluminescence from the $O + CF_2$ reaction: Part 1.—Kinetics of the emission near 2000 cm^{-1}, 1039
Infrared chemiluminescence from the $O + CF_2$ reaction: Part 2.—Analysis of the emission near 2000 cm^{-1}, 1045
Infrared spectroscopy
Infrared and Raman study of the adsorption of NH_3, pyridine, NO and NO_2 on anatase, 643
Structural studies of gel phases. Part 1.—Infrared spectroscopic study of silica monoliths; the effect of thermal history on structure, 761
Infrared spectroscopic study of O_2^- on the surface of Cr_2O_3: the effect of surface pretreatment, 913
Infrared spectroelectrochemical evidence for alkyl viologen radical monomers in acetonitrile, 1355
Infrared study of the reaction between nitrogen oxides and ammonia on titania-supported vanadia catalysts, 1473
Infrared study of NO_2–CO reactions over supported rhodium and platinum catalysts, 1485
Infrared study of the adsorption of formic acid on silica-supported copper and oxidised copper catalysts, 1491
Tin oxide surfaces. Part 21.—Infrared study of the chemisorption of 2,2,2-trifluoroethanol, 1,1,1,3,3,3-hexafluoropropan-2-ol, 1,1,1-trifluoropropan-2-one, 1,1,1,3,3,3-hexafluoropropan-2-one and trifluoroacetic acid on tin(IV) oxide gel, 1929
Characterization of monodispersed haematite particles by gas adsorption and Fourier-transform infrared spectroscopy, 2241
Infrared spectroscopic studies of the reactions of alcohols over Group IVB metal oxide catalysts. Part 2.—Methanol over TiO_2, ZrO_2 and HfO_2, 2655
Infrared spectroscopic studies of the reactions of alcohols over Group IVB metal oxide catalysts. Part 3.—Ethanol over TiO_2, ZrO_2 and HfO_2, and general conclusions from Parts 1 to 3, 2661
Infrared spectroscopic study of the interaction of cations in zeolites with simple molecular probes. Part 1.—Adsorption of molecular hydrogen on alkaline forms of zeolites as a test for localization sites, 2675
Infrared study of methyl formate and formaldehyde adsorption on reduced and oxidised silica-supported copper catalysts, 2785
Infrared study of the adsorption of methanol on oxidised and reduced Cu/SiO_2 catalysts, 2795
Synthesis and catalytic properties of MAPO-36 molecular sieve, 3309
Infrared study of cyclohexanol chemisorption in SAPO molecular sieves, 3315
Infrared study of CO adsorption on $Pt–Rh/SiO_2$ catalysts, 3435
Interdependence of different parameters characterizing the chemistry of an activated carbon surface, 3557
Catalysis by polyoxometalates. Part 3.—Influence of vanadium(V) on the thermal stability of 12-metallophosphoric acids from *in situ* infrared studies, 3913
Inner-layer capacity
Double-layer studies in ethanolic solutions. Part 1.—Structure of the mercury/ethanol interface in the absence of specific adsorption, 2967
Inner-sphere complex
Inner-sphere and outer-sphere complexes of yttrium(III), lanthanum(III), neodymium(III), terbium(III) and thulium(III) with halide ions in *N*,*N*-dimethylformamide, 3379
Intercalation
Rotational tunnelling of ammonia in two-dimensional metal–ammonia solutions, 73
Local environment of intercalated lanthanide ions in vermiculite, 3077
Pulse radiolysis studies of electron migration in DNA from DNA base-radical anions to nitroacridine intercalators in aqueous solution, 3739
Interface
Electrophoresis of drops and bubbles, 1883
Interfacial structure for a compatible polymer blend for short and intermediate annealing times, 2055
Steady-state heat and matter exchange at a phase interface, 2187
Interfacial film of surfactant adsorbed at a solid/liquid interface, 2745
Interfacial capacitance
Interfacial capacitance and ionic association at electrified liquid/liquid interfaces, 107
Interfacial structure
Hydration force and the interfacial structure of the polar surface, 2733
Interfacial viscosity
Interfacial viscosities *via* stress autocorrelation functions, 2023
Intermetallic compound
Catalysis by palladium–rare-earth-metal ($REPd_3$) intermetallic compounds: hydrogenation of but-1-ene, buta-1,3-diene and but-1-yne, 1453
Intramolecular vibrational energy redistribution
Vibrationally mediated photodissociation of nitrous acid, 3461
Intra-stack dimerization
Mathematical analysis of intra-stack dimerizations in reactive crystalline solids, 325
Iodide
Kinetics of the oxidation of iodide by persulphate in AOT–oil–water microemulsions, 129
Iodine
Iodine adsorption on InSb(001) at room temperature and low temperature: Surface reaction, 3259
Iodine chloride
Accurate potentials for X $^1\Sigma^+$, A $^3\Pi_1$ and B $^3\Pi_0^+$ states of I ^{35}Cl from experimental data, 2529
Iodomethane
Oxidation of methylene in low-temperature matrices, 3725
Ion exchange
Diffusion of Na^+ and Rb^+ in a polymeric crown ether, 1393
Ca–K–H exchange on silt-, clay- and silt + clay-size soil separates, 2501
Nuclear magnetic resonance study of ion-exchange reaction on cubic ammonium molybdate, 2669
Effects of exchangeable cations on the adsorption properties of Na^+ mordenite, 2849
Distribution of cations in lanthanum-exchanged NaY zeolites, 2855
Conversion of faujasites to high-silica chabazite SSZ-13 in the presence of *N*,*N*,*N*-trimethyl-1-adamantammonium iodide, 3709
Ionic activity
Some new expressions concerning individual ionic activities and their physical significance, 3523
Ionic association
Interfacial capacitance and ionic association at electrified liquid/liquid interfaces, 107
Ionic plastic crystal
Novel ionic plastic phase of $[(CH_3)_4N]SCN$ obtainable above 455 K studied by proton magnetic resonance, electrical conductivity and thermal measurements, 987
Ionic solvation
Nuclear magnetic resonance study of ion–molecule interactions. Part 6.—^{25}Mg NMR of magnesium(II) ion solvation in aqueous acetone and aqueous acetonitrile solutions, 837
Ionizing radiation
Factors controlling the site of protonation of the one-electron adduct of cytosine and its derivatives, 3647
Ion–ligand bond
Force constant of transition metal ion–ligand bonds: Molecular-orbital calculations, 535
Ion–molecule reaction

Thermodynamic predictions for isotopic fractionation by isotope-exchange reactions, 1351

Ionophore
Electrochemical studies of antibiotic 23187 (A23187) mediated permeability to divalent heavy-metal ions in phospholipid monolayers adsorbed on mercury electrodes, 1851

Ion pair
Dual emission from ion pairs produced by excited-state proton transfer in the naphthol–amine system at 77 K. Steric orientation of contact and separated ion pairs, 1311
Structural effects in ion pairs from 1,3-diarylbenzo[*c*]furans and alkali metals: an electron paramagnetic resonance and ENDOR study, 1837

Iridium
Hydrogenolysis of alkanes. Part 7.—Hydrogenolysis of propane and of n-butane over Ir/TiO_2 and Os/TiO_2 catalysts, 775
Oxidation of chloride to chlorine by Ce^{V} ions mediated by different Ru^{IV} and Ir^{IV} oxide-based catalysts, 3275

Iron
Role of iron impurities in formation of electron-accepting sites in H-ZSM-5 zeolites: ^{15}N nuclear magnetic resonance and ^{15}N nuclear magnetic relaxation of adsorbed N_2 and N_2O, 2247

Iron complex
Solubilization of doubly charged iron (II) complexes in aqueous neutral micellar aggregates. A kinetic investigation, 3033

Iron oxide
Characterization of monodispersed haematite particles by gas adsorption and Fourier-transform infrared spectroscopy, 2241
Adsorption of (*Z*)-but-2-ene on iron oxide films, 3285
Influence of inorganic and organic additives on the tailored synthesis of iron oxides, 3875

Iron-storage protein
Electron paramagnetic resonance studies of a range of ferritins and haemosiderins, 3193

Iron–sulphur cluster
Electron spin-echo envelope modulation and spin–spin interaction studies of the iron–sulphur clusters in fumarate reductase of *escherichia coli*, 3199
Electron spin-echo spectroscopy of the iron–sulphur clusters of xanthine oxidase from milk, 3203

Isobutane
Kinetics of the reaction of $N(^4S)$ with isobutane, 2921

Isomeric equilibria
Theoretical approach to the solvation of nitroenamines and the influence of solvation on isomeric equilibria, 1719

Isomerization
Catalytic activity of supported heteropoly acids for reactions requiring strong acid centres, 749

Isopropyl alcohol
Behaviour of copper–zirconium nasicon-type phosphate, $Cu^{I}Zr_2(PO_4)_3$, in the decomposition of isopropyl alcohol, 2487

Isotope exchange
Early stages of Fischer-Tropsch activity on ThO_2 and $Th_{0.9}Ce_{0.1}O_2$, 1259
Thermodynamic predictions for isotopic fractionation by isotope-exchange reactions, 1351

Isotopic difference method
Structure of a 50 mol kg^{-1} aqueous solution of ammonium nitrate at 373 K by the isotopic difference method of neutron diffraction, 279

Keggin heteropolyanion
Catalysis by polyoxometalates. Part 1.—Supported polyoxoanions of the Keggin structure: spectroscopic study (IR, Raman, UV) of solutions used for impregnation, 349
Copper–oxygen coordination in Cu^{II}-heteropolyanion compounds: electron paramagnetic resonance studies and CNDO/2 calculations, 717

Kerr effect
Simultaneous measurement of linear electric birefringence and linear electric dichroism using pulsed electric fields, 2219

Ketone
Vacuum-ultraviolet absorption spectra of propanone, butanone and the cyclic ketones $C_nH_{2n-2}O$ (n = 4, 5, 6, 7), 3343

Ketyl ion pair
Electrostatic field of charge distributions enclosed in a polarisable medium: Solvent effects in electronic spectra of ketyl ion pairs, 1117

Kinetics
Kinetics of the reaction of silicon with gaseous bromine, 45
Kinetics of the oxidation of iodide by persulphate in AOT–oil–water microemulsions, 129
Kinetic study on the thermal decomposition of copper(II) oxalate, 161
Enzyme catalysis in uni- and bi-continuous microemulsions: Dependence of kinetics on substrate partitioning, 465
Kinetics of corrosion of ruthenium dioxide hydrate by Ce^{IV} ions, 473
Enzyme catalysis in uni- and bi-continuous microemulsions: Dependence of kinetics on substrate partitioning, 465
Kinetics of corrosion of ruthenium dioxide hydrate by Ce^{IV} ions, 473
Kinetics of liquid penetration into periodically constricted capillaries, 619
Kinetics of pyrolysis of furan, 815
Chemical reactions in microemulsions: kinetics of the alkylation of 2-alkylindan-1,3-diones in microemulsions and polar organic solvents, 847
Heterogeneous catalysis in solution. Part 24.-Kinetics of a redox system exhibiting three separate diffusion-controlled regions: the iron(III) + iodide reaction at a rotating platinum disc catalyst, 977
Infrared chemiluminescence from the $O + CF_2$ reaction: Part 1.—Kinetics of the emission near 2000 cm^{-1}, 1039
Infrared chemiluminescence from the $O + CF_2$ reaction: Part 2.—Analysis of the emission near 2000 cm^{-1}, 1045
Kinetic study of the $Na + O_2 + He$ reaction in the temperature range 392–777 K, 1075
Kinetic investigation of the collisional quenching of $Ca(4\ ^3P)$ by C_4H_{10} at elevated temperatures (750–923 K). Time-resolved atomic emission and electronic energy transfer between $Ca(4\ ^3P_J)$ and $CaH(X\ ^2\Sigma^+)$ observed by molecular chemiluminescence, 1503
Combination and disproportionation reactions of the $CH_3\dot{C}H-N-NC_2H_5$ radical, 1827
Nitrate radical reactions: Interactions with alkynes, 2141
Arrhenius parameters for the addition of HO_2 radicals to ethene between 400 and 500 °C, 2147
KrF laser-induced thermal decomposition of 1,2-dichloroethane, 2151
Kinetics of abstraction reactions of *tert*-butoxyl radicals with cyclohexane and methyl-substituted cyclohexanes in the gas phase, 2157
Radical–radical reactions: kinetics, dynamics and mechanisms, 2271
Association reaction of CH_3 and NO: evidence for the involvement of the triplet surface, 2317
Reaction of CH_3 radicals with OH at room temperature and pressure, 2325
Room-temperature rate constants for the reaction $D + O_2 + M \rightarrow DO_2 + M$. M = Ar, D_2, CO_2 and F_2, 2337
Temperature and pressure dependence of the rate coefficient for the reaction $NO_3 + NO_2 + N_2 \rightarrow N_2O_5 + N_2$, 2345
Laser flash photolysis study of the UV spectrum and kinetics of reactions of $HOCH_2\dot{C}H_2O_2$ radicals, 2351
Oxidation of allyl radicals: kinetic parameters for the reaction of allyl radicals with HO_2 and O_2 between 400 and 480 °C, 2361
Ultraviolet absorption spectra of the CH_2Cl and $CHCl_2$ radicals and the kinetics of their self-recombination reactions from 273 to 686 K, 2367
Kinetic investigation of the time-resolved atomic fluorescence $Ca(4\ ^3P_1 \rightarrow 4\ ^1S_0)$ and molecular chemiluminescence $CaCl(A\ ^2\Pi, B\ ^2\Sigma^+ \rightarrow X\ ^2\Sigma^+)$ following the pulsed dye-laser generation of $Ca(4\ ^3P)$ in the presence of CH_3Cl, 2413
Direct measurement of methylene removal rates by species containing the OH functional group, 2421
High-temperature oxidation of ethanol. Part 2.—Kinetic modelling, 2549
Use of a stopped-flow technique to measure the rate constants at room temperature for reactions between the nitrate radical and various organic species, 2913
Kinetics of the reaction of $N(^4S)$ with isobutane, 2921
Flash photolysis study of the $CH_3O_2 + CH_3O_2$ and $CH_3O_2 + HO_2$ reactions between 600 and 719 K: Unimolecular decomposition of methylhydroperoxide, 3213
UV absorption spectrum and self-reaction of cyclohexylperoxy radicals, 3221
Study of the temperature dependence of the reaction of the nitrate radical with propene, 3473
Kinetics of coadsorption of dioxygen and ammonia at a Zn(0001) surface: a theoretical model, 3563
Spin effects on spur kinetics: independent pairs modelling of two-species spurs, 3601
Interaction of halide and pseudohalide ions with the triplet state of 1-nitronaphthalene. Effect of acidity: a flash photolysis study, 3617
Quenching of positronium atoms by nitrobenzene in various solutions, 3641
Effects of sulphate and perchlorate ions on an oscillatory reaction of the Belousov–Zhabotinskii type with oxalic acid, 3821

Lanthanide
Inner-sphere and outer-sphere complexes of yttrium(III), lanthanum(III), neodymium(III), terbium(III) and thulium(III) with halide ions in *N*,*N*-dimethylformamide, 3379

Lanthanum copper oxide
Lanthanum L_3-, europium L_3- and copper K-edge EXAFS investigation of lanthanum copper oxides, 1405

Laser excitation
Transitions between states of high angular momentum in the electronic spectrum of NH_2, 2121

Laser flash photolysis
Laser flash photolysis study of the UV spectrum and kinetics of reactions of $HOCH_2\dot{C}H_2O_2$ radicals, 2351
Direct measurement of methylene removal rates by species containing the OH functional group, 2421

Laser-induced fluorescence
Tunable infrared–tunable ultraviolet double-resonance experiments on HCN, 205

Laser-induced thermal decomposition
KrF laser-induced thermal decomposition of 1,2-dichloroethane, 2151

Laser photolysis
Time-resolved study of hydrogen atoms in the H_2–O_2 system under conditions close to criticality, 2907
Electron transfer from ground-state triethylamine to the lowest excited triplet states of chloroanthraquinones (the 1-chloro, 2-chloro, 1,5-dichloro and 1,8-dichloro compounds) in ethanol and toluene at room temperature, 3731

Lateral diffusion
Lateral diffusion in synthetic membranes: Models and experiments on protein influence, 2039

Latex
Effect of long-range repulsive forces on the viscosity of concentrated latices: comparison of experimental data with an effective hard-sphere model, 1365

Lattice energy
Coulombic energy in bromide salts of mononitrogen organic bases, 1333

Lennard-Jones cluster

Packing schemes for Lennard-Jones clusters of 13 to 150 atoms: minima, transition states and rearrangement mechanisms, 215

Lennard-Jones fluid
Properties of simple fluids in carbon micropores, 2011

Lewis-acid
Magic-angle spinning nuclear magnetic resonance studies of water molecules adsorbed on Brønsted- and Lewis-acid sites in zeolites and amorphous silica–aluminas, 657
Electronic charge distribution and Lewis acidity of surface aluminium atoms in γ-Al_2O_3: a quantum-chemical model, 745
Role of Lewis and Brønsted sites in selective oxidation of propene on MoO_3–Sb_2O_4 catalyst, 3695

Light scattering
Structural effects of polydispersity in charged colloidal dispersions, 379
Dynamic light scattering study of concentrated dispersions of anisotropic spherical colloids, 431

Lignosulphonate
Transport of lignosulphonates under an external electric field, 1779

Linear free-energy relationship
Substitution reactions at pentacyanoferrate(II) complexes: Linear free-energy relationships in mixed solvents, 2573

Line broadening
Energetics for preferential solvation of a chromium complex in aqueous organic solvent, 2167

Liposomes
Incorporation and distribution of benzoquinone into liposomes containing amphilic zinc(II) porphyrin as studied by the quenching of the excited state, 83

Liquid crystal
Influence of viscosity on the thermal vibrations of a lamellar liquid crystal, 153
Cholesteric pitch of aqueous hydroxypropylcellulose in the presence of synthetic polyelectrolytes, 607
One-dimensional singlet energy migration in the columnar liquid crystal of a triphenylene derivative, 1785
Reliability of parameters obtained from time-resolved fluorescence polarization in macroscopically isotropic liquid crystals and membrane vesicles, 2457
Structure of biphenyl in a nematic liquid-crystalline solvent, 2623
Isothermal phase transition of liquid crystals induced by photoisomerization of doped spiropyrans, 3251

Liquid/liquid interface
Interfacial capacitance and ionic association at electrified liquid/liquid interfaces, 107
Rotating stabilised cell: A new tool for the investigation of interfacial extraction kinetics between liquid phases, 2715

Liquid–liquid solubility
Semi-automated apparatus for the determination of liquid solubilities: Mutual solubilities of water and butan-2-ol, 591

Liquid penetration
Kinetics of liquid penetration into periodically constricted capillaries, 619

Lithium tetrafluoroborate
Electrical conductances for some tetraalkylammonium bromides, lithium tetrafluoroborate and tetrabutylammonium tetrabutylborate in propylene carbonate at 25 °C, 3511

Luminescence
Luminescence and excitation spectra of Nd^{3+} in $Cs_2NaGdCl_6$: $NdCl_6^{3-}$, 1707
Cd($5\ ^3P_1$)-photosensitized luminescence of *N,N,N′,N′*-tetramethyl-1,3-propanediamine, 2897
Observation and simulation of the energy-level scheme of the Pr^{3+} ion in REOCl, 3625

Macrocycle
Triplet states of oligomeric axially bridged ruthenium phthalocyanines, 455

Magic angle spinning nuclear magnetic resonance spectroscopy
Magic-angle spinning nuclear magnetic resonance studies of water molecules adsorbed on Brønsted- and Lewis-acid sites in zeolites and amorphous silica–aluminas, 657
Characterization of chabazite and chabazite-like zeolites of unusual composition, 1031
Characterization of $AlPO_4$-14 by magic-angle-spinning nuclear magnetic resonance spectroscopy and thermoanalytical and adsorption measurements, 1433
Catalysis by polyoxometalates. Part 2.—^{29}Si nuclear magnetic resonance evidence for 12-molybdosilicate in silica-supported molybdenum catalysts, 2829

Magnesia-supported iron oxide catalyst
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 1.—Preparation and characterization, 1623
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 2.—Reduction behaviour, 1631
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 3.—But-1-ene dehydrogenation activity, 1639

Magnetic field modulation
Effect of density, magnetic field modulation and magnetic field penetration depth on the microwave absorption properties of $YBa_2Cu_3O_{7-\delta}$ superconductors, 3687

Magnetic susceptibility
Following the spatial distribution of a solid dissolving at an interface by high-resolution nuclear magnetic resonance spectroscopy, 1585

Magnetochromism
Influence of a magnetic field on line intensities in the optical spectra of free molecules, 513

Manganese
Self-diffusion of cobalt and manganese ions in aqueous electrolyte solutions, 3405

Many-body calculation
Many-body expansion of the potential-energy surface for BeHF and Dynamical calculations for the reaction, Be + HF(v, J) → BeF(v', J') + H, 435

MAPO-36
Synthesis and catalytic properties of MAPO-36 molecular sieve, 3309

Mass spectrometry
Nitrate radical reactions: Interactions with alkynes, 2141

Mass transfer
Nuclear magnetic resonance measurement of mass transfer in molecular sieve crystallites, 1989

Matrix
Production of NO_x in electrical discharges applied to the statistically designed matrix approach, 3359
Electron paramagnetic resonance and INDO-MO studies of 2-methylbutane, 3-methylpentane and 3-methylhexane cations produced in several halocarbon matrices γ-irradiated at 77 K, 3869

Matrix isolation
Effects of ionizing radiation on cyanamide and dimethylcyanamide, 3129
Reactions of yttrium atoms in hydrocarbon matrices: Electron paramagnetic resonance evidence for matrix-isolated YO and Y_n (n = 5 or 7), 3189

Matrix photochemistry
Oxidation of methylene in low-temperature matrices, 3725

Meissner effect
Microwave absorption characterization of the $YBa_2Cu_3O_{7-\delta}$ high-temperature superconductor prepared by different sintering and oxygen annealing times, 167

Membrane
Lateral diffusion in synthetic membranes: Models and experiments on protein influence, 2039
Electroconvection at an electrically inhomogeneous permselective membrane surface, 2079
Facilitated transport with fixed-site carrier membranes, 2089
Quantum conditions in membrane transport controlling nervous excitation, 2093
Investigation of the kinetic behaviour of captopril followed by alternating current polarography, 3505

Membrane potential
Recognition of substrates by membrane potential of immobilized enzyme membranes, 695
Recognition of substrates by membrane potential of immobilized enzyme membranes: Membrane potential theory, 2723

Membrane vesicle
Reliability of parameters obtained from time-resolved fluorescence polarization in macroscopically isotropic liquid crystals and membrane vesicles, 2457

Mercury/ethanol interface
Double-layer studies in ethanolic solutions. Part 1.—Structure of the mercury/ethanol interface in the absence of specific adsorption, 2967

Mercury/ethylene glycol interface
Influence of functional groups and substituents on the adsorption of aromatic non-ionic surfactants at the Hg/ethylene glycol interface, 3399

Metachromasy
Metachromasy in clay-mineral systems: Adsorption of cationic dyes crystal violet and ethyl violet by kaolinite from aqueous and organic solutions, 1201

Metakaolinite
Synthesis of zeolite Na-A form Metakaolinite revisited, 3091

Metal-ammonia solution
Rotational tunnelling of ammonia in two-dimensional metal–ammonia solutions, 73

Metallocenes
CO Fourier-transform infrared study of metallocenes on silica gel and $AlPO_4$, 2473

Metallopolymer
Thermodynamics and kinetics of heterogeneous electron transfer at glassy carbon/osmium-containing metallopolymer interfaces, 3769

Metal surface
Surface reaction of 2-mercaptobenzimidazole on metals and its application in adhesion promotion, 1229

Metastable phase
Metastable phases and compounds in the ternary system Ag–Au–I, 625

Methane
Oxidative coupling of methane over $SrCO_3$ and SrO, 1273
Molecular simulation of methane and butane in silicalite, 1951

Methane combustion
Catalytic properties of copper oxide supported on zinc aluminate in methane combustion, 1795

Methanol
Infrared spectroscopic studies of the reactions of alcohols over Group IVB metal oxide catalysts. Part 2.—Methanol over TiO_2, ZrO_2 and HfO_2, 2655
Infrared study of the adsorption of methanol on oxidised and reduced Cu/SiO_2 catalysts, 2795

Methanol synthesis
In situ Fourier-transform infrared investigation of the interaction of CO–CO_2–H_2 with Cu catalysts at low temperatures and high pressures, 1791

Methoxyl radical
Kinetics of the reaction between methoxyl radicals and hydrogen atoms, 2331

Methylammonium bromide
Thermodynamically metastable plastic phase revealed in methylammonium bromide crystals, 3255

Methylene
Direct measurement of methylene removal rates by species containing the OH functional group, 2421

Methylhydroperoxide
Flash photolysis study of the CH_3O_2 + CH_3O_2 and CH_3O_2 + HO_2 reactions between 600 and 719 K: Unimolecular decomposition of methylhydroperoxide, 3213

***N*-Methyl nicotinic acid**
Electrochemical reduction of *N*-methyl nicotinic acid at a mercury electrode, 301

Methylperoxy radical
Fourier-transform infrared product study of the reaction of CH_3O_2 + HO_2 over the pressure range 15–700 Torr at 295 K, 2379

Methyl radical
Reaction of CH_3 radicals with OH at room temperature and pressure, 2325
3-Methylstyrene
Methyl and vinyl torsional potentials in *cis*- and *trans*-3-methylstyrene from supersonic jet fluorescence spectra, 3585
Micelle
Cyclic voltammetric studies on the ternary system decaglycerol dioleate–heptane–water, 133
Analysis of the fast relaxation times for micelle kinetics taking into account new EMF data, 707
Nuclear magnetic resonance paramagnetic relaxation method for the determination of micellar solubilization equilibria applied to anionic micelles, 947
Micellar growth of octaethylene glycol decyl ether, 957
Micelle reorganisation characterised by differential scanning calorimetry for aqueous solutions containing hexa-decyltrimethylammonium bromide and tetradecyltrimethylammonium bromide, 1169
Micellar effect on the kinetics of the base equilibrium of amino acids studied by the ultrasonic absorption method, 1857
Brownian motion of rod-like micelles under flow, 2073
Determination of the thermodynamic parameters for transfer of alkoxyphenols from aqueous solution to SDS micelles by a Taylor–Aris diffusion technique, 2741
Temperature dependence of enthalpic properties of aqueous micellar solutions of some *N*-alkylnicotinamide chloride surfactants, 2983
Solubilization of doubly charged iron (II) complexes in aqueous neutral micellar aggregates. A kinetic investigation, 3033
Micelle formation in non-aqueous solvents: Calorimetric study of the association of poly(ethylene oxide) alkyl ethers and hexadecyltrimethylammonium bromide in formamide, 3037
Microcanonical variational theory
Microcanonical variational theory of radical recombination by inversion of interpolated partition function. Part 2.—$CX_3 + O_2$ (X = H, F, Cl), 2307
Microemulsion
Kinetics of the oxidation of iodide by persulphate in AOT–oil–water microemulsions, 129
Enzyme catalysis in uni- and bi-continuous microemulsions: Dependence of kinetics on substrate partitioning, 465
Chemical reactions in microemulsions: kinetics of the alkylation of 2-alkylindan-1,3-diones in microemulsions and polar organic solvents, 847
Exchange concept in water-in-oil microemulsions: Consequences for 'slow' chemical reactions, 2607
Structure and stability of microemulsion-based organo-gels, 3389
Mechanism of aggregation of oil-in-water microemulsion droplets stabilized by dodecyl pentaoxyethylene alcohol, $C_{12}E_5$, 3775
Micropore
Surface fractal dimension of microporous carbon fibres by nitrogen adsorption, 179
Ex-hydroxide magnesium oxide as a model adsorbent for investigation of micropore filling mechanisms, 185
Characterization of active carbons by combined preadsorption and immersion techniques, 1233
Ultramicropores in microporous carbon fibres evidenced by helium adsorption at 4.2 K, 1915
Transport of an adsorbing vapour in a model silica system, 1971
Properties of simple fluids in carbon micropores, 2011
Effect of the ratio of length of sphere to length of cylinder on adsorption and self-diffusion in a 'sphere-cylinder' micropore, 3791
Microscopy
Colloidal crystal growth, 371
Microstructure
Enzyme catalysis in uni- and bi-continuous microemulsions: Dependence of kinetics on substrate partitioning, 465
Microwave absorption
Microwave absorption characterization of the $YBa_2Cu_3O_{7-\delta}$ high-temperature superconductor prepared by different sintering and oxygen annealing times, 167
Magnetic field dependent microwave absorption in high-T_c superconducting cuprates, 1209
Effect of density, magnetic field modulation and magnetic field penetration depth on the microwave absorption properties of $YBa_2Cu_3O_{7-\delta}$ superconductors, 3687
Intensity of the microwave absorption in high-temperature superconductors, 3893
Microwave spectroscopy
Microwave spectrum for bromo(sulphido)boron, BrBS, 1
Microwave spectrum, structure, dipole moment and excited states of $(CH_3)_3CCP$, 9
Microwave spectrum of the unstable molecule fluoro(sulphido)boron, FBS, 1499
Microwave spectrum, molecular structure and dipole moment of pivalaldehyde, 2689
Mixed gel catalyst
Characterization of vanadia/silica mixed gel catalysts by electron paramagnetic resonance spectroscopy at 110 K, 1217
Mixed solvent
Transport properties of copper(I) perchlorates in mixed solvents. Part 1.—Transference numbers of copper(I) perchlorate in acetonitrile–*N*,*N*-dimethylacetamide mixtures at 25 °C, 1155
Transport properties of copper(I) perchlorates in mixed solvents. Part 2.—Conductance and viscosity measurements of bis(2,9-dimethyl-1,10-phenanthroline)copper(I) perchlorate in binary solvent mixtures containing acetonitrile, 1159
Effect of water on the phosphorescence spectra of aromatic carbonyl compounds. Part 2.—Dual phosphorescence of benzophenone at 77 K in ethanol–water, 1509
MNDO calculation
Effect of steric hindrance and π electrons on alcohol self-association, 1745
Model design
Determining all extreme semi-positive conservation relations in chemical reaction systems: a test criterion for conservativity, 2561
Modified electrode
Effect of supporting electrolyte on the mediated reducation of $[Fe(H_2O)_6]^{3+}$ by an osmium-containing poly(4-vinylpyridine) film, 1863
Electrosynthesis and analytical characterization of films obtained by oxidation of 2,6-diaminopyridine, 3515
Molecular beam
Flow dynamics of supersonic molecular beams and the measurement of rotational–translational coupling parameters for N_2 and H_2, 1069
Molecular chain
Prospects for using photoinduced intramolecular proton transfer to study the dynamics of conformational changes in flexible molecular chains, 1103
Molecular collision
Approximating relative rotational energy transfer in molecular collisions, 31
Molecular dynamics
Packing schemes for Lennard-Jones clusters of 13 to 150 atoms: minima, transition states and rearrangement mechanisms, 215
High-field nuclear magnetic resonance and molecular dynamics investigations of alditol conformations in aqueous and non-aqueous solvents, 579
Computer simulation of xenon dimer formation in a dense inert-gas environment, 831
Molecular dynamics studies on zeolites. Part 5—Discussion of the structural changes of silicalite, 1657
Molecular dynamics studies of hydrocarbon diffusion in zeolites, 1947
Self-diffusion of water into a ferrierite-type zeolite by molecular dynamics simulations, 1959
Molecular dynamics investigations of self-assembled monolayers, 2031
Instantaneous normal mode analysis and coexistence phenomena in small clusters, 2399
Molecular dynamics of xylene in Na, Yb-Y and ZSM-5 studied by quasi-elastic neutron scattering, 3455
Effect of the ratio of length of sphere to length of cylinder on adsorption and self-diffusion in a 'sphere-cylinder' micropore, 3791
Molecular mechanics
Molecular mechanics study of 18-azacrown-6 and its binding interactions in 1 : 1 host–guest complexes with neutral and anionic species, 1321
Molecular mechanisms
Molecular mechanisms of dielectric relaxation of highly polar liquids, 559
Molecular motion
Thermodynamically metastable plastic phase revealed in methylammonium bromide crystals, 3255
Molecular orbital
Force constant of transition metal ion–ligand bonds: Molecular-orbital calculations, 535
Ab initio molecular orbital calculations of conformational energies of ethyl methyl ether: Basis set and electron correlation effects, 3207
Molecular-orbital theory
Proposal of a chiral structure for the fullerene C_{76}, 2861
Molecular sieve
Characterisation of Co^{II} and Co^{III} in CoAPO molecular sieves, 891
Nuclear magnetic resonance measurement of mass transfer in molecular sieve crystallites, 1989
Synthesis and catalytic properties of MAPO-36 molecular sieve, 3309
Catalytic and infrared spectroscopic investigations of the molecular sieve types SAPO-34 and SAPO-11, 3569
Molecular simulation
Molecular simulation of methane and butane in silicalite, 1951
Molecular structure
Microwave spectrum, molecular structure and dipole moment of pivalaldehyde, 2689
The higher fullerenes: a candidate for the structure of C_{78}, 3103
Molecular transport
Molecular dynamics studies of hydrocarbon diffusion in zeolites, 1947
Molecular simulation of methane and butane in silicalite, 1951
Self-diffusion of water into a ferrierite-type zeolite by molecular dynamics simulations, 1959
Transport of an adsorbing vapour in a model silica system, 1971
Nuclear magnetic resonance measurement of mass transfer in molecular sieve crystallites, 1989
Properties of simple fluids in carbon micropores, 2011
Simulation of molecular transport in pores and pore networks, 2017
Interfacial viscosities *via* stress autocorrelation functions, 2023
Molecular dynamics investigations of self-assembled monolayers, 2031
Lateral diffusion in synthetic membranes: Models and experiments on protein influence, 2039
Transport of neutral species in electroactive polymer films, 2047
Interfacial structure for a compatible polymer blend for short and intermediate annealing times, 2055
Brownian motion of rod-like micelles under flow, 2073
Electroconvection at an electrically inhomogeneous permselective membrane surface, 2079
Facilitated transport with fixed-site carrier membranes, 2089
Quantum conditions in membrane transport controlling nervous excitation, 2093
Free energies underlying ion binding and transport in protein channels: Free energy perturbation simulations in ion binding and

selectivity for valinomycin, 2099
Molten salt
Thermodynamics of formation and the structure of polymetal alkaline-earth-metal(II) fluoride complexes in molten-nitrate media, 1141
Molybdenum
Catalysis by polyoxometalates. Part 2.—^{29}Si nuclear magnetic resonance evidence for 12-molybdosilicate in silica-supported molybdenum catalysts, 2829
Molybdenum oxide
Electron paramagnetic resonance investigation of the paramagnetic centres in polycrystalline MoO_3, 1003
Monolayer
Monte Carlo calculation of energy and electron transfer in a monolayer of spheroids, 51
Oriented crystallization of $CaCO_3$ under compressed monolayers. Part 1.—Morphological studies of mature crystals, 727
Oriented crystallization of $CaCO_3$ under compressed monolayers. Part 2.—Morphology, structure and growth of immature crystals, 735
Monte Carlo
Monte Carlo calculation of energy and electron transfer in a monolayer of spheroids, 51
Error in the Debye–Hückel approximation for dilute primitive model electrolytes with Bjerrum parameters of 2 and *ca.* 6.8 investigated by Monte Carlo methods. Excess energy, Helmholtz free energy, heat capacity and Widom activity coefficients corrected for neutralising background, 479
Computer simulation of bridging flocculation, 2193
Computer simulation of the Si,Al distribution in dealuminated zeolite Y, 2837
Coordination number and equation of state of square-well and square-shoulder fluids: Simulation and quasi-chemical model, 3373
Montmorillonite
Electron paramagnetic resonance and electron spin echo modulation analysis of the silver atom environment in γ-irradiated silver-exchanged sodium montmorillonite and its Al_{13} pillared derivative, 2749
Studies of the oxidation state and location of palladium species in Al_{13}-pillared montmorillonite, 3083
MoO_3–Sb_2O_4 catalyst
Role of Lewis and Brønsted sites in selective oxidation of propene on MoO_3–Sb_2O_4 catalyst, 3695
Mordenite
Electron paramagnetic resonance study of radical formation from cyclopentene and dimethylacetylene following adsorption onto H-mordenite, 3179
Morphology
Oriented crystallization of $CaCO_3$ under compressed monolayers. Part 1.—Morphological studies of mature crystals, 727
Oriented crystallization of $CaCO_3$ under compressed monolayers. Part 2.—Morphology, structure and growth of immature crystals, 735
Influence of inorganic and organic additives on the tailored synthesis of iron oxides, 3875
Møller–Plesset perturbation theory
Energies of triplet electronic states of the N_2O^{2+} ion, 1681
Moving boundary method
Transference numbers for NaCl in a 60 wt.% ethanol–water mixture at 25 °C, 603
Mudcake
Concentration profile within non-uniform mudcakes, 611
Multicomponent zeolite
Organic-free synthesis, structure and properties of multicomponent ZSM-5 type zeolites, 2507
Multilayer
Particle adhesion in model systems. Part 13.—Theory of multilayer deposition, 1371
Particle adhesion in model systems. Part 14.—Experimental evaluation of multilayer deposition, 1377
Multiphoton ionisation spectroscopy
Multiphoton ionisation spectroscopy of the 3s(2 + 2, 1) and 4s(3 + 1) Rydberg states of acetone: Evidence for a molecular valence state at 153 nm, 2891
Multiple-pulse spectroscopy
Multiple-pulse ^{1}H nuclear magnetic resonance investigations of titania and ruthenium dispersed on titania, 1917
Muonium
Vibrationally averaged β-hyperfine coupling constants for the muonium-substituted ethyl radical, 2901
Muon spin resonance spectroscopy
Muonium addition to an imidazole ring, 1497
N(^{4}S)
Kinetics of the reaction of N(^{4}S) with isobutane, 2921
N_2^{2+} ion
Intensity distribution of the rotational lines in the $D\ ^1\Sigma_u^+$–$X\ ^1\Sigma_g^+$ (0, 0) band of the N_2^{2+} ion, 2525
Nanosecond time-resolved emission spectroscopy
Dual emission from ion pairs produced by excited-state proton transfer in the naphthol–amine system at 77 K. Steric orientation of contact and separated ion pairs, 1311
Nasicon
Behaviour of copper–zirconium nasicon-type phosphate, $Cu^1Zr_2(PO_4)_3$, in the decomposition of isopropyl alcohol, 2487
Near-infrared spectroscopy
Structural studies of gel phases. Part 2.—Infrared spectroscopic study of silica monoliths; the interaction of water with surface species, 3857
Near-threshold electron energy-loss spectroscopy
Electronic states of some simple ethers studied by vacuum ultraviolet absorption and near-threshold electron energy-loss spectroscopy, 1049
Nematic liquid crystal
Structure of biphenyl in a nematic liquid-crystalline solvent, 2623
Nervous excitation
Quantum conditions in membrane transport controlling nervous excitation, 2093
Neutron diffraction
Structure of a 50 mol kg^{-1} aqueous solution of ammonium nitrate at 373 K by the isotopic difference method of neutron diffraction, 279
Neutron reflection
In situ neutron reflectivity studies of polybithiophene, 2863
Neutron specular reflection
Interfacial structure for a compatible polymer blend for short and intermediate annealing times, 2055
Nickel
Passivation and reaction of nickel catalysts, 791
State and localization of cobalt, nickel and copper ions adsorbed on titania (anatase), 907
Nicotinamide
Temperature dependence of enthalpic properties of aqueous micellar solutions of some *N*-alkylnicotinamide chloride surfactants, 2983
Nitrate–ferroin reaction
Wave profile in the acidic nitrate–ferroin reaction, 3613
Nitrate radical
Nitrate radical reactions: Interactions with alkynes, 2141
Temperature and pressure dependence of the rate coefficient for the reaction $NO_3 + NO_2 + N_2 \rightarrow N_2O_5 + N_2$, 2345
Use of a stopped-flow technique to measure the rate constants at room temperature for reactions between the nitrate radical and various organic species, 2913
Study of the temperature dependence of the reaction of the nitrate radical with propene, 3473
Nitric oxide
Infrared spectroscopic study of ammonia and nitric oxide adsorption and reactivity on a Ru/TiO_2 catalyst: effect of oxo-reducing treatments, 337
Time-dependent chemiluminescence from the surface-catalysed recombination of O and NO on polycrystalline Ni, 2877
Nitroanthracene
Photophysics and photochemistry of nitroanthracenes. Part 1.—Primary processes in the photochemical reactions of 9-benzoyl-10-nitroanthracene and 9-cyano-10-nitroanthracene studied by steady-state photolysis and nanosecond laser photolysis, 3365
Nitrobenzene
Quenching of positronium atoms by nitrobenzene in various solutions, 3641
1-Nitronaphthalene
Interaction of halide and pseudohalide ions with the triplet state of 1-nitronaphthalene. Effect of acidity: a flash photolysis study, 3617
Nitropropene
He I and He II photoelectron spectra of isomeric nitropropenes, 1685
Nitrous acid
Vibrationally mediated photodissociation of nitrous acid, 3461
Nitrous oxide
Role of iron impurities in formation of electron-accepting sites in H-ZSM-5 zeolites: ^{15}N nuclear magnetic resonance and ^{15}N nuclear magnetic relaxation of adsorbed N_2 and N_2O, 2247
NO_x
Production of NO_x in electrical discharges applied to the statistically designed matrix approach, 3359
NO_2
Some *ab initio* valence-bond calculations for NO_2, 1089
Non-electrolyte mixture
Temperature and chain-length dependence of the volumetric properties of 1-chlorobutane–alkane mixtures, 93
Non-electrolyte solution
Enthalpies of transfer of some non-electrolytes from acetonitrile to acetonitrile–methanol mixtures, 2443
Non-equilibrium kinetics
Non-equilibrium kinetics of bimolecular exchange reactions. Part 2.—Improved formalism and applications to $H + H_2 \rightarrow H_2 + H$ and its isotopic variants, 229
Non-ionic polymer
Influence of non-ionic polymers on solvent properties of water as detected by studies of acid-base equilibria of sulphonephthalein and fluorescein dyes, 931
Non-linear optics
A new zwitterionic salt for non-linear optics: {4'-[Methyl(diphenyl)phosphonio]biphenyl-4-yl}triphenylborate, 2225
Calculated hyperpolarisabilities of polythiophenes, polyfurans and polypyrroles, 3009
Calculated hyperpolarisabilities of substituted phenylsilanes, 3015
Calculations of the electronic spectra and hyperpolarisabilities of selected dyes and pigments, 3021
Nuclear magnetic relaxation
Role of iron impurities in formation of electron-accepting sites in H-ZSM-5 zeolites: ^{15}N nuclear magnetic resonance and ^{15}N nuclear magnetic relaxation of adsorbed N_2 and N_2O, 2247
Nuclear magnetic resonance spectroscopy
Nuclear magnetic resonance study of ion–molecule interactions. Part 6.—^{25}Mg NMR of magnesium(II) ion solvation in aqueous acetone and aqueous acetonitrile solutions, 837
Nuclear magnetic resonance paramagnetic relaxation method for the determination of micellar solubilization equilibria applied to anionic micelles, 947
^{1}H nuclear magnetic resonance studies of the association of 1,3,5-trinitrobenzene with naphthalene and methylnaphthalenes, 1549
^{2}H Nuclear magnetic resonance spectroscopy
Orientation dependence of ^{2}H nuclear spin relaxation in trimethyl [$^2H_9$] ammonium tetraphenylborate, 1715
Nuclear magnetic resonance spectroscopy

Nuclear magnetic resonance measurement of mass transfer in molecular sieve crystallites, 1989
Interactions of sorbed water with starch studied using proton nuclear magnetic resonance spectroscopy, 2613
Nuclear magnetic resonance study of ion-exchange reaction on cubic ammonium molybdate, 2669
Synthesis of zeolite Na-A form Metakaolinite revisited, 3091
Nuclear quadrupole coupling
Powder determination of ^{39}K nuclear quadrupole coupling, 2453
Nucleation
Thermal decomposition of solid wegscheiderite, $Na_2CO_3 \cdot 3NaHCO_3$, 1911
Octaethylporphine
Photophysical properties of *meso*-substituted octaethylporphines and their zinc complexes, 2933
Oligo(oxyethylene) monoalkyl ether
Crystallinity of uniform oligo(oxyethylene) monoalkyl ethers studied by Raman spectroscopy, 3677
Optical absorption spectroscopy
Near-threshold electron energy-loss (0–9 eV) and optical absorption (5–11.8 eV) spectroscopy of trifluoronitrosomethane (CF_3NO), 2887
Optical–optical double resonance
Optical–optical double resonance (OODR) studies of the halogen ion-pair states. Part 2.—The $f(0_g^+) \rightarrow B(0_u^+)$ transition dipole moment function in I_2, 15
Optical spectroscopy
Influence of a magnetic field on line intensities in the optical spectra of free molecules, 513
Orange arc band
Measurement of the average emission lifetimes of the $A\ ^1\Sigma^+ - X\ ^1\Sigma^+$ and the orange arc bands of CaO, 677
Order–disorder phase transition
Spectroscopic studies of the order–disorder phase transition in 1,3-dimethyladamantane, 3835
Organic/inorganic interface
Interactions at the organic/inorganic interface: Binding motifs for phosphonates at the surface of barite crystals, 3409
Organic solid
Spectroscopic studies of the order–disorder phase transition in 1,3-dimethyladamantane, 3835
Organo-gel
Structure and stability of microemulsion-based organo-gels, 3389
Oscillatory force
Pair correlations of non-uniform hard-sphere fluids in narrow slits and the mechanism of oscillatory solvation forces, 1869
Oscillatory ignition
Modelling complex oscillations for the $H_2 + O_2$ reaction in an open system, 2539
Oscillatory reaction
Phenomenological study of a new flow model of the Belousov–Zhabotinskii reaction, 223
Characterisation of oscillations in the $H_2 + O_2$ reaction in a continuous-flow reactor, 523
Hysteresis and complex oscillations of the uncatalysed Belousov–Zhabotinskii reaction in a stirred flow reactor, 2135
Effects of sulphate and perchlorate ions on an oscillatory reaction of the Belousov–Zhabotinskii type with oxalic acid, 3821
Osculating complex
HBO osculating complex in the $B(^2P) + OH(^2\Pi)$ reaction, 37
Osmium
Hydrogenolysis of alkanes. Part 7.—Hydrogenolysis of propane and of n-butane over Ir/TiO_2 and Os/TiO_2 catalysts, 775
Osmotic coefficient
Self-association of amphiphilic phenothiazine drugs in aqueous solutions of low ionic strength, 2971
Outer-sphere complex
Inner-sphere and outer-sphere complexes of yttrium(III), lanthanum(III), neodymium(III), terbium(III) and thulium(III) with halide ions in *N,N*-dimethylformamide, 3379
Ovalbumin
Effect of heat denaturation on the structure and rheological properties of ovalbumin aqueous colloids, 3385
Oxaalkane–alkane system
Effect of molecular size on the W-shaped excess heat capacities: Oxaalkane–alkane systems, 3001
Oxidation
Gas-phase metal oxidation reactions studied by chemielectron spectroscopy and chemiion mass spectrometry: reactions of cerium and lanthanum with $O_2(X\ ^3\Sigma_g^-)$, $O_2(a\ ^1\Delta_g)$ and $O(^3P)$, 19
Kinetics of the oxidation of iodide by persulphate in AOT–oil–water microemulsions, 129
Decomposition of 4,4-dimethylpent-1-ene in the presence of oxygen between 400 and 500°C: oxidation chemistry of allyl radicals, 681
Change in the work function of zirconium by oxidation at high temperatures and low oxygen pressures, 1399
Oxidation of formaldehyde by the hydroxyl radical in aqueous solution, 1513
Auger electron, electron energy loss and secondary electron emission spectroscopic studies on the oxidation of zirconium at high temperatures and room temperature, 1591
High-temperature oxidation of ethanol. Part 1.—Ignition delays in shock waves, 1691
Oxidation of allyl radicals: kinetic parameters for the reaction of allyl radicals with HO_2 and O_2 between 400 and 480°C, 2361
Role of Lewis and Brønsted sites in selective oxidation of propene on MoO_3–Sb_2O_4 catalyst, 3695
CO oxidation on Rh/Al_2O_3 catalysts, 3907
Oxidative coupling
Oxidative coupling of methane over $SrCO_3$ and SrO, 1273
Oxide-ion specific electrode
Solubility of ZnO and hydrolysis of $ZnCl_2$ in KCl melts, 2955
Oxide melt
Voltammetric studies on the redox behaviour of Cr, Mn, Cu, Sb and As ions in Na_2O–B_2O_3 melts, 307
Oxirane hydrogen halide dimer
Geometric conformation of the oxirane hydrogen halide dimers from *ab initio* calculations, 3495
Oxygen
Comparative study of new and established heterogeneous oxygen catalysts, 1245
Effect of the size of platinum particles on the chemisorption of oxygen, 1251
Pair correlation
Pair correlations of non-uniform hard-sphere fluids in narrow slits and the mechanism of oscillatory solvation forces, 1869
Palladium
Surface species on a palladium/zirconia CO oxidation catalyst prepared from a glassy metal precursor: characterization by diffuse reflectance FTIR spectroscopy, 333
Catalysis by palladium–rare-earth-metal ($REPd_3$) intermetallic compounds: hydrogenation of but-1-ene, buta-1,3-diene and but-1-yne, 1453
Palladium carbonyl
Migration and coalescence of Pd carbonyl clusters in zeolite Y, 1413
Palladium cluster
Determination by *X*-ray photoelectron spectroscopy of the electronic state of Pd clusters in Y zeolite, 3703
Paramagnetic relaxation
Nuclear magnetic resonance paramagnetic relaxation method for the determination of micellar solubilization equilibria applied to anionic micelles, 947
Partial molar heat capacity
Aqueous solutions containing amino acids and peptides. Part 27.—Partial molar heat capacities and partial molar volumes of some *N*-acetyl amino acid amides, some *N*-acetyl peptide amides and two peptides at 25°C, 1751
Particle adhesion
Particle adhesion in model systems. Part 13.—Theory of multilayer deposition, 1371
Particle adhesion in model systems. Part 14.—Experimental evaluation of multilayer deposition, 1377
Particle Size distribution
Effect of the size of platinum particles on the chemisorption of oxygen, 1251
Partitioning
Partitioning in aqueous two-phase systems as a method of estimation of the relative hydrophobicity of solutes, 137
Influence of ionic and polymer composition on the properties of the phases of aqueous two-phase systems formed by non-ionic polymers, 141
Passivation
Passivation and reaction of nickel catalysts, 791
Passivity
Nature of the passive film on Fe–Cr alloys as studied by ^{18}O secondary ion mass spectrometry: reduction of the prior film and stability to *ex situ* surface analysis, 1011
Pd electrode
In situ neutron reflectivity studies of polybithiophene, 2863
Pentacarbonyl halides
Vibrational spectroscopy at high pressures. The crystal structure of $Re(CO)_5I$, the vibrational spectra of the manganese and rhenium pentacarbonyl chlorides and iodides, and their behaviour under high pressure, 1831
Pentacyanoferrate(II) complexes
Substitution reactions at pentacyanoferrate(II) complexes: Linear free-energy relationships in mixed solvents, 2573
Peptide
Aqueous solutions containing amino acids and peptides. Part 27.—Partial molar heat capacities and partial molar volumes of some *N*-acetyl amino acid amides, some *N*-acetyl peptide amides and two peptides at 25°C, 1751
Permselectivity
Electroconvection at an electrically inhomogeneous permselective membrane surface, 2079
Perovskite
Catalytic combustion of methane over bulk and supported $LaCrO_3$ perovskites, 2493
Comparative study of the solid-state and catalytic properties of $La_{2-x}Sr \cdot NiO_{4-\lambda}$ perovskites ($x = 0.00$–1.50) prepared by the nitrate and citrate methods, 3291
Peroxyl radical
Arrhenius parameters for the addition of HO_2 radicals to ethene between 400 and 500°C, 2147
Perturbation
Silver(I) perturbation of (*E*)-(*Z*) photoisomerization of stilbene and azobenzene, 1303
Phase diagram
Metastable phases and compounds in the ternary system Ag–Au–I, 625
Phase stability
Structure and stability of microemulsion-based organo-gels, 3389
Phase transition
Isothermal phase transition of liquid crystals induced by photoisomerization of doped spiropyrans, 3251
Phenol
Pulsed laser-induced oxidation of phenol in acid aqueous TiO_2 sols, 1097
Self-association of phenols in inert solvents. Apparent heat capacities of phenol, substituted phenols and aromatic alcohols in *n*-heptane, 1733
Phenothiazine drug
Self-association of amphiphilic phenothiazine drugs in aqueous solutions of low ionic strength, 2971
pH jump technique
Measurement of effective HCl diffusion coefficients through aqueous and gel films by a pH jump technique, 293
Phospholipid
Electrochemical studies of antibiotic 23187 (A23187) mediated permeability to divalent heavy-metal ions in phospholipid monolayers

adsorbed on mercury electrodes, 1851
Phosphate
De-sintering action of phosphorus in alumina–aluminium phosphates (AAP) containing transition-metal ions (M = Cr, Mn, Fe, Co, Ni, Cu, Zn), 901
Phosphate catalyst
Influence of the structure of alumina–aluminium phosphate (AAP) catalysts containing Fe^{3+} and Cr^{3+} on their catalytic activity for isopropyl alcohol decomposition, 1439
Phospholipid membrane
Hydration force and the interfacial structure of the polar surface, 2733
Phosphonium iodide vapour
Rotational spectrum of phosphonium iodide vapour, 507
Phosphorescence
Effects of water on the phosphorescence spectra of aromatic carbonyl compounds. Part 1.—Dual phosphorescence of benzophenone at 77 K in 2,2,2-trifluoroethanol–water, 449
Effect of water on the phosphorescence spectra of aromatic carbonyl compounds. Part 2.—Dual phosphorescence of benzophenone at 77 K in ethanol–water, 1509
Phosphorescence spectroscopy
Photophysics and photochemistry of nitroanthracenes. Part 1.—Primary processes in the photochemical reactions of 9-benzoyl-10-nitroanthracene and 9-cyano-10-nitroanthracene studied by steady-state photolysis and nanosecond laser photolysis, 3365
Photocatalysis
Photocatalytic fixation of carbon dioxide in oxoglutaric acid using isocitrate dehydrogenase and cadmium sulphide, 553
Photochemistry
Photochemical formation of colloidal silver: peptizing action of acetone ketyl radical, 1905
Photophysical properties of *meso*-substituted octaethylporphines and their zinc complexes, 2933
Photophysics and photochemistry of nitroanthracenes. Part 1.—Primary processes in the photochemical reactions of 9-benzoyl-10-nitroanthracene and 9-cyano-10-nitroanthracene studied by steady-state photolysis and nanosecond laser photolysis, 3365
Picosecond time-resolved absorption and emission studies of pyrazolotriazole azomethine dyes, 3479
Photodecomposition
Photochemistry of trimethyl arsine at 193 nm, 2383
Photodeposition
Photodeposition of uranium oxides onto TiO_2 from aqueous uranyl solutions, 3267
Photodimerization
Mathematical analysis of intra-stack dimerizations in reactive crystalline solids, 325
Photodissociation
Photodissociation of Ne_2^+, 797
Photoelectron spectroscopy
Detection of chlorophosphaethyne, Cl—C≡P, by photoelectron spectroscopy, 917
He I and He II photoelectron spectra of isomeric nitropropenes, 1685
Photoelectron spectroscopic studies of the silicon pseudohalides: Relationship between geometrical and electronic Structure, 3805
Photoelectrophoresis
Photoelectrophoresis of colloidal semiconductors. Part 1.—The technique and its applications, 3537
Photoelectrophoresis of colloidal semiconductors. Part 2.—Transient experiments on TiO_2 particles, 3547
Photofragment spectroscopy
Photodissociation of Ne_2^+, 797
Photoionisation mass spectrometry
Photoionisation mass-spectrometric study of fragmentation of $SiBr_4$ and $GeBr_4$ in the range 400–1220 Å, 3717
Photoionization
Dissociation dynamics of D_2O^+ ions prepared in the $\tilde{B}\ ^2B_2$ state, 921
Effects of temperature on the photo-oxidation quantum yield of aqueous hexacyanoferrate(II) anion, 927
Photoisomerization
Silver(I) perturbation of (*E*)-(*Z*) photoisomerization of stilbene and azobenzene, 1303
Isothermal phase transition of liquid crystals induced by photoisomerization of doped spiropyrans, 3251
Photolysis
Photophysics and photochemistry of nitroanthracenes. Part 1.—Primary processes in the photochemical reactions of 9-benzoyl-10-nitroanthracene and 9-cyano-10-nitroanthracene studied by steady-state photolysis and nanosecond laser photolysis, 3365
Photon correlation spectroscopy
Brownian motion of rod-shaped colloidal particles surrounded by electrical double layers, 971
Characterization of adsorbed layers of a disordered coil protein on polystyrene latex, 3043
Photo-oxidation
Effects of temperature on the photo-oxidation quantum yield of aqueous hexacyanoferrate(II) anion, 927
Oxidation of methylene in low-temperature matrices, 3725
Photophysics
Photophysics of Ru^{II} complexes with 1,4,5,8-tetraazaphenanthrene, incorporated into Sephadex SP C-25, 259
Photophysics and photochemistry of nitroanthracenes. Part 1.—Primary processes in the photochemical reactions of 9-benzoyl-10-nitroanthracene and 9-cyano-10-nitroanthracene studied by steady-state photolysis and nanosecond laser photolysis, 3365
Photoreduction
Photoreduction of thioxanthen-9-one and benzophenone by amines. Electrical conductivity and light emission studies, 1531
Photodeposition of uranium oxides onto TiO_2 from aqueous uranyl solutions, 3267
Photosensitization
Benzophenone sensitization of triplet oxazine and of delayed fluorescence by oxazine in acetonitrile solution, 547
Cd($5\ ^3P_1$)-photosensitized luminescence of *N*,*N*,*N*′,*N*′-tetramethyl-1,3-propanediamine, 2897
Phthalocyanine
Time-resolved evanescent wave induced fluorescence spectroscopy. Part 1.—Deviations in the fluorescence lifetime of tetrasulphonated aluminium phthalocyanine at a fused silica/methanol interface, 825
Picosecond laser photolysis
Existence of the second excited triplet state of 1,8-dibromoanthraquinone observed by picosecond laser photolysis in solutions at room temperature, 3487
Pivalaldehyde
Microwave spectrum, molecular structure and dipole moment of pivalaldehyde, 2689
Plasma
Kinetic study of the Na + O_2 + He reaction in the temperature range 392–777 K, 1075
Plastic phase
Thermodynamically metastable plastic phase revealed in methylammonium bromide crystals, 3255
Platinum
Effect of the size of platinum particles on the chemisorption of oxygen, 1251
Platinum sol
Fourier-transform infrared studies of carbon monoxide adsorption on platinum sols in alcoholic media, 3779
Platinum surface
Heterogeneous catalysis in solution. Part 25.—Contrasting behaviour of reduced and oxidised platinum surfaces in the catalysis of the reaction between cerium(IV) and mercury(I), 1383
Poisson–Boltzmann theory
Symmetrical Poisson–Boltzmann and modified Poisson–Boltzman theories, 3227
Polarisability
A new zwitterionic salt for non-linear optics: {4′-[Methyl(diphenyl)phosphonio]biphenyl-4-yl}triphenylborate, 2225
Polarity
Polarity and hydrogen-bonding ability of some binary aqueous–organic mixtures, 1339
Polarity parameter
Correlation between the dielectric solvent polarity parameter, β, and rate and equilibrium constants for various processes, 2589
Polarizability
Fourier-transform infrared study of intramolecular $O^-Li^+ \cdots ON \rightleftharpoons O^- \cdots Li^+ON$ bonds with large Li^+ polarizability in 4-substituted 2-diethylaminomethylphenolate *N*-oxides, 1545
Polarography
Electrochemical reduction of *N*-methyl nicotinic acid at a mercury electrode, 301
Poly(ethylene oxide)
Micelle formation in non-aqueous solvents: Calorimetric study of the association of poly(ethylene oxide) alkyl ethers and hexadecyltrimethylammonium bromide in formamide, 3037
Poly(ethylene oxide) hydration studied by differential scanning calorimetry, 3671
Poly(oxyethylene) complex
Characterization of poly(oxyethylene) complex formation with alkali-metal cations in a cation-exchange resin phase, 3027
Polyaniline
Optical and electrical a.c. response of polyaniline films, 853
Polybithiophene film
In situ neutron reflectivity studies of polybithiophene, 2863
Polyelectrolyte
Cholesteric pitch of aqueous hydroxypropylcellulose in the presence of synthetic polyeiectrolytes, 607
Polyheterocycle
Calculated hyperpolarisabilities of polythiophenes, polyfurans and polypyrroles, 3009
Polymer
Crystallinity of uniform oligo(oxyethylene) mono-*n*-alkyl ethers studied by X-ray diffraction and differential scanning calorimetry, 1183
Interfacial structure for a compatible polymer blend for short and intermediate annealing times, 2055
Flocculation of silica particles by adsorbing and non-adsorbing polymers, 2201
Polymer coating
γ-ray induced fluoropolymeric encapsulation of TiO_2 particles: an X-ray photoelectron spectroscopic investigation, 991
Polymer electrolyte
Solid-state redox diode composed of an electropolymerized metallocene layer and a polymer electrolyte layer containing a redox couple in a mixed-valent state, 1771
Polymer film
Electrochemical and electrical properties of poly(hexachlorobuta-1,3-diene), an electrochemically graphitized film, 319
Optical and electrical a.c. response of polyaniline films, 853
Effect of supporting electrolyte on the mediated reducation of $[Fe(H_2O)_6]^{3+}$ by an osmium-containing poly(4-vinylpyridine) film, 1863
Transport of neutral species in electroactive polymer films, 2047
Electrosynthesis and analytical characterization of films obtained by oxidation of 2,6-diaminopyridine, 3515
Polymeric crown ether
Diffusion of Na^+ and Rb^+ in a polymeric crown ether, 1393
Polymer-induced flocculation
Transient collision efficiency of polymer-induced flocculation, 1177
Polymer-modified electrode

Controlling processes in the rate of charge transport through $[Os(bipy)_2(PVP)_nCl]Cl$ redox polymer-modified electrodes, 2761
Polymer solution
Transient behaviour of polymer-induced flocculation, 3245
Polyoxometalate
Catalysis by polyoxometalates. Part 1.—Supported polyoxoanions of the Keggin structure: spectroscopic study (IR, Raman, UV) of solutions used for impregnation, 349
Polyoxometallate
Catalysis by polyoxometalates. Part 3.—Influence of vanadium(v) on the thermal stability of 12-metallophosphoric acids from *in situ* infrared studies, 3913
Polypyrrole
Ascorbic acid oxidation at polypyrrole-coated electrodes, 115
Cationic polypyrrole composites with anionic functional molecules, 1765
Electrochemical and *in situ* electron paramagnetic resonance studies of polypyrrole doped with polystyrene sulphonate, 2949
Polysiloxane
Environmentally induced macromolecular rearrangement on the surface of polyurethane–polysiloxane block copolymers, 147
Polystyrene latex
Characterization of adsorbed layers of a disordered coil protein on polystyrene latex, 3043
Polyurethane
Environmentally induced macromolecular rearrangement on the surface of polyurethane–polysiloxane block copolymers, 147
Pore
Simulation of molecular transport in pores and pore networks, 2017
Interfacial viscosities *via* stress autocorrelation functions, 2023
Porosity
Ex-hydroxide magnesium oxide as a model adsorbent for investigation of micropore filling mechanisms, 185
Effect of porosity on the distribution and reactivity of hydroxyl groups on the surface of silica gel, 3899
Porous material
Simulation of small-angle X-ray scattering behaviour of activated carbon fibres adsorbing water, 2763
Porphyrin
Radiolytic reduction of tetrapyridylporphyrins. Formation of a stable radical from tetrakis(*N*-methyl-2-pyridyl)porphyrin, 2567
Photophysical properties of *meso*-substituted octaethylporphines and their zinc complexes, 2933
Positronium
Quenching of positronium atoms by nitrobenzene in various solutions, 3641
Potassium hydrogen thiodiacetate
Electron paramagnetic resonance and proton ENDOR studies in single crystals of potassium hydrogen thiodiacetate, 273
Potential-energy curve
Accurate potentials for $X\ ^1\Sigma^+$, $A\ ^3\Pi_1$ and $B\ ^3\Pi_0^+$ states of $I\ ^{35}Cl$ from experimental data, 2529
Potential-energy function
Potential-energy function for large carbon clusters, 803
Dissociation of NH_3 to $NH + H_2$, 1809
Viscosities and pair potential energy function for the argon–methane gas-phase interaction, 2161
Potential-energy surface
HBO osculating complex in the $B(^2P) + OH(^2\Pi)$ reaction, 37
Many-body expansion of the potential-energy surface for BeHF and Dynamical calculations for the reaction, $Be + HF(v, J) \rightarrow BeF(v', J') + H$, 435
Many-body expansion of the potential-energy surface for BeHF and Dynamical calculations for the reaction, $Be + HF(v, J) \rightarrow BeF(v', J') + H$, 435
$B(^2P) + H_2O\ (X^1A_1)$: a quasi-classical 3D trajectory calculation, 1057
From radical–radical association rates to potential-energy parameters: SACM comparison of the reactions $H + C_2H_7 \rightleftharpoons C_2H_8$ and $H + CH_3 \rightleftharpoons CH_4$, 2299
Classical dynamics of intramolecular energy flow in ethane, 3595
Potential relaxation
Evaluation of Cl^- adsorption in anodic Cl_2 evolution at Pt by means of impedance and potential-relaxation experiments. Influence of the state of surface oxidation of the Pt, 2705
Potentiometric titration
Solubility of ZnO and hydrolysis of $ZnCl_2$ in KCl melts, 2955
Powder X-ray diffraction
Gas–solid interactions studied by quantitative powder X-ray diffraction analysis, 3063
Quantitative studies of gas–solid reactions by powder X-ray diffraction: Stoichiometric and catalytic conversion of CO to CO_2 over $YBa_2Cu_3O_{6+x}$, 3067
Praseodymium
Observation and simulation of the energy-level scheme of the Pr^{3+} ion in REOCl, 3625
Precursor state
Formation and decomposition of formate intermediates on supported Cu catalysts exposed to CO–CO_2–H_2 mixtures: evidence for a precursor state, 193
Probe-beam deflection
Mechanistic investigations of redox polymer-coated electrodes using probe-beam deflection and cyclic voltammetry, 939
Propene
Role of Lewis and Brønsted sites in selective oxidation of propene on MoO_3–Sb_2O_4 catalyst, 3695
Protein
Characterization of adsorbed layers of a disordered coil protein on polystyrene latex, 3043
Protein channel
Free energies underlying ion binding and transport in protein channels: Free energy perturbation simulations in ion binding and selectivity for valinomycin, 2099
Protein denaturation
Calorimetric and volumetric studies of the interactions of some amides in water and in 6 mol dm^{-3} aqueous guanidinium chloride, 2975
Protonation
Thermodynamic and rate parameters for alanine protonation reactions, 3241
Proton transfer
Prospects for using photoinduced intramolecular proton transfer to study the dynamics of conformational changes in flexible molecular chains, 1103
Protophobic aprotic solvent
Specific interactions between anions and cations in protophobic aprotic solvents. Triple-ion and higher aggregate formation from lithium and tributylammonium thiocyanates, 3847
Pseudorotation
Electron paramagnetic resonance study of the 19-electron $Co(CO)_3L_2$ and $Co(CO)_2L_2PPh_3$ complexes [L_2 = 2,3-bis(diphenylphosphino)maleic anydride], 3113
Pulsed dye-laser excitation
Kinetic investigation of the time-resolved atomic fluorescence $Ca(4\ ^3P_1 \rightarrow 4\ ^1S_0)$ and molecular chemiluminescence $CaCl(A\ ^2\Pi, B\ ^2\Sigma^+ \rightarrow X\ ^2\Sigma^+)$ following the pulsed dye-laser generation of $Ca(4\ ^3P)$ in the presence of CH_3Cl, 2413
Pulsed laser excitation
$Cd(5\ ^3P_1)$-photosensitized luminescence of *N,N,N',N'*-tetramethyl-1,3-propanediamine, 2897
Pulsed laser-induced oxidation
Pulsed laser-induced oxidation of phenol in acid aqueous TiO_2 sols, 1097
Pulse radiolysis
One-electron reactions of 1,5- and 1,8-dihydroxy-9,10-anthraquinones. A pulse radiolysis study, 1109
Reactivity of $Ru(bpy)_3^{3+}$ towards the radicals originating from the scavenging of hydrogen atoms and hydroxyl radicals by methanol, ethanol, propan-2-ol, *tert*-butyl alcohol and formate ions in aqueous solution: a pulse radiolytic study, 2179
Role of azide concentration in pulse radiolysis studies of oxidation: 3,4-dihydroxyphenylalanine, 2939
Absorption spectra of the radical ions of quinones: A pulse radiolysis study, 2943
Pulse radiolysis studies of electron migration in DNA from DNA base-radical anions to nitroacridine intercalators in aqueous solution, 3739
Pyrazolotriazole azomethine dyes
Picosecond time-resolved absorption and emission studies of pyrazolotriazole azomethine dyes, 3479
Pyridine
Fourier-transform infrared study of pyridine sorbed on zeolite HY, 3319
Pyridine–alkanol mixture
Topological investigations on the association of alkanols: Excess volume of pyridine–alkanol (C_1–C_{10}) mixtures, 1561
Pyridine *N*-oxide
Acid–base and cationic homoconjugation equilibria in nitromethane solutions of substituted pyridine *N*-oxide systems, 1729
Acid–base and cationic homoconjugation equilibria of substituted pyridine *N*-oxides in acetone, 3853
Pyrolysis
Kinetics of pyrolysis of furan, 815
Kinetics of abstraction reactions of *tert*-butoxyl radicals with cyclohexane and methyl-substituted cyclohexanes in the gas phase, 2157
Pyrotechnic composition
Finite-element simulation of the differential thermal analysis response to ignition of a pyrotechnic composition, 711
Quadrupole spin–lattice relaxation
Orientation dependence of ^2H nuclear spin relaxation in trimethyl [$^2H_9$] ammonium tetraphenylborate, 1715
Quantitative powder X-ray diffraction
Gas–solid interactions studied by quantitative powder X-ray diffraction analysis, 3063
Quantitative studies of gas–solid reactions by powder X-ray diffraction: Stoichiometric and catalytic conversion of CO to CO_2 over $YBa_2Cu_3O_{6+x}$, 3067
Quantum electrodynamics
Influence of a magnetic field on line intensities in the optical spectra of free molecules, 513
Quantum mechanics
Electronic charge distribution and Lewis acidity of surface aluminium atoms in γ-Al_2O_3: a quantum-chemical model, 745
α-Quartz
EPR study of the $[SiO_4/Li]^0$ centre in α-quartz, 3143
Quasi-classical trajectory calculation
$B(^2P) + H_2O\ (X^1A_1)$: a quasi-classical 3D trajectory calculation, 1057
Quasi-classical trajectory study
Quasi-classical trajectory study of the initial collision energy dependence on the $O(^3P) + I_2$ reaction and thermal rate constant calculations, 517
Quasi-elastic neutron scattering
Molecular dynamics of xylene in Na, Yb-Y and ZSM-5 studied by quasi-elastic neutron scattering, 3455
Quenching
Incorporation and distribution of benzoquinone into liposomes containing amphilic zinc(II) porphyrin as studied by the quenching of the excited state, 83
Quenching kinetics
Quenching of positronium atoms by nitrobenzene in various solutions, 3641
Quinone
Absorption spectra of the radical ions of quinones: A pulse radiolysis study, 2943
Radiation damage
Electron paramagnetic resonance studies of radical pairs $[M(CO)_5^-]_2$ (M = Cr, Mo, W)

trapped in single crystals of $PPh_4^+HM(CO)_5^-$, 3121
Radical
σ-Radicals $R_3N \div$ hal: Electron paramagnetic resonance studies of the radiolysis of alkylammonium halides, 571
Combination and disproportionation reactions of the $CH_3CH \div N \div NC_2H_5$ radical, 1827
Time resolved Fourier-transform infrared emission in the $O(^3P) + CHF(^1A')$ reaction, 2283
Reaction of CH_3 radicals with OH at room temperature and pressure, 2325
Room-temperature rate constants for the reaction $D + O_2 + M \rightarrow DO_2 + M$. M = Ar, D_2, CO_2 and F_2, 2337
Oxidation of allyl radicals: kinetic parameters for the reaction of allyl radicals with HO_2 and O_2 between 400 and 480 °C, 2361
Absorption spectra of the radical ions of quinones: A pulse radiolysis study, 2943
Radical association
Hindered rotor model for radical association reactions, 2291
From radical–radical association rates to potential-energy parameters: SACM comparison of the reactions $H + C_7H_7 \rightleftharpoons C_7H_8$ and $H + CH_3 \rightleftharpoons CH_4$, 2299
Association reaction of CH_3 and NO: evidence for the involvement of the triplet surface, 2317
Ultraviolet absorption spectra of the CH_2Cl and $CHCl_2$ radicals and the kinetics of their self-recombination reactions from 273 to 686 K, 2367
Radical cation
Electron paramagnetic resonance evidence for the occurrence of hydrogen and/or proton transfer between C_7, C_8 and C_{11} *n*-alkanes and their cations in irradiated CCl_3F matrices at 77 K, 3499
Radical pair
Electron paramagnetic resonance studies of radical pairs $[M(CO)_5^-]_2$ (M = Cr, Mo, W) trapped in single crystals of $PPh_4^+HM(CO)_5^-$, 3121
Radical–radical reactions
Radical–radical reactions: kinetics, dynamics and mechanisms, 2271
Microcanonical variational theory of radical recombination by inversion of interpolated partition function. Part 2.–$CX_3 + O_2$ (X = H, F, Cl), 2307
Radical reaction
Vibrational-state distribution of CO_2 produced in the reaction between OH radicals and CO, 1037
Radiolysis
σ-Radicals $R_3N \div$ hal: Electron paramagnetic resonance studies of the radiolysis of alkylammonium halides, 571
Radiolytic reduction of tetrapyridylporphyrins. Formation of a stable radical from tetrakis(*N*-methyl-2-pyridyl)porphyrin, 2567
Effects of ionizing radiation on cyanamide and dimethylcyanamide, 3129
Raman spectroscopy
Infrared and Raman study of the adsorption of NH_3, pyridine, NO and NO_2 on anatase, 643
Raman spectroscopic study of titania-supported vanadia catalysts, 653
Crystallinity of uniform oligo(oxyethylene) monoalkyl ethers studied by Raman spectroscopy, 3677
Rare-earth metal
Catalysis by palladium–rare-earth-metal ($REPd_3$) intermetallic compounds: hydrogenation of but-1-ene, buta-1,3-diene and but-1-yne, 1453
Rare-gas dimers
Photodissociation of Ne_2^+, 797
Rate coefficient
Temperature and pressure dependence of the rate coefficient for the reaction $NO_3 + NO_2 + N_2 \rightarrow N_2O_5 + N_2$, 2345
Rate constant
Rate constant calculations on fast diatom–diatom reactions, 1667
Room-temperature rate constants for the reaction $D + O_2 + M \rightarrow DO_2 + M$. M = Ar, D_2, CO_2 and F_2, 2337
Rate parameter
Thermodynamic and rate parameters for alanine protonation reactions, 3241
Real symmetric matrix
Graph-theoretical method for evaluation of eigenvalues of real symmetric matrices from an eigenvector approach, 2925
Redox
Heterogeneous catalysis in solution. Part 24.-Kinetics of a redox system exhibiting three separate diffusion-controlled regions: the iron(III) + iodide reaction at a rotating platinum disc catalyst, 977
Redox catalysis
Oxidation of chloride to chlorine by Ce^V ions mediated by different Ru^{IV} and Ir^{IV} oxide-based catalysts, 3275
Redox electrode
Mechanistic investigations of redox polymer-coated electrodes using probe-beam deflection and cyclic voltammetry, 939
Reduction
Reduction of CeO_2 by hydrogen. Magnetic susceptibility and Fourier-transform infrared, ultraviolet and X-ray photoelectron spectroscopy measurements, 1601
Reactivity of $Ru(bpy)_3^+$ towards the radicals originating from the scavenging of hydrogen atoms and hydroxyl radicals by methanol, ethanol, propan-2-ol, *tert*-butyl alcohol and formate ions in aqueous solution: a pulse radiolytic study, 2179
Reflection spectroscopy
Cholesteric pitch of aqueous hydroxypropylcellulose in the presence of synthetic polyelectrolytes, 607
Refractive index
Ethane-1,2-diol–2-methoxyethanol solvent system. Dependence of the relative permittivity and refractive index on the temperature and composition of the binary mixture, 2583
Relative permittivity
Ethane-1,2-diol–2-methoxyethanol solvent system. Dependence of the relative permittivity and refractive index on the temperature and composition of the binary mixture, 2583
Relaxation kinetics
Tunable infrared–tunable ultraviolet double-resonance experiments on HCN, 205
Analysis of the fast relaxation times for micelle kinetics taking into account new EMF data, 707
Reorientation
Reorientation of water molecules in solid hydrates. Correlation with spectroscopic and structural data, 1193
Resonance-enhanced multiphoton ionisation spectroscopy
Resonance-enhanced multiphoton ionisation spectroscopy of the NH(ND) radical. Part 1.—The $d\ ^1\Sigma^+$ state, 2515
Response surface
Chemometric optimization of the ruthenium carbonyl catalysed cyclization of 2-nitrostilbene to 2-phenylindole, 2811
Reversed micelle
Rotational dynamics of AOT reversed micelles in near-critical and supercritical alkanes, 1899
Rh/Al_2O_3 catalyst
CO oxidation on Rh/Al_2O_3 catalysts, 3907
Rhenium/alumina
Hydrogenolysis of propane, *n*-butane and isobutane on rhenium/alumina catalysts, 2479
Rheology
Properties of concentrated colloidal dispersions, 357
Effect of heat denaturation on the structure and rheological properties of ovalbumin aqueous colloids, 3385
Rhodium
Properties of Rh-exchanged SiO_2–Al_2O_3 sol–gel catalysts, 199
Comparative investigation of hydrogen chemisorption and benzene hydrogenation activity of supported rhodium catalysts, 3449
Rh/SiO_2 catalyst
Fourier-transform infrared study of Rh/SiO_2 catalysts exposed to CO–H_2 mixtures at high pressure and temperature, 1921
Ribose
Interactions between cations and sugars. Part 6.—Calorimetric method for simultaneous determination of the stability constant and enthalpy change for weak complexation, 2173
Rotating disc electrode
Heterogeneous catalysis in solution. Part 24.-Kinetics of a redox system exhibiting three separate diffusion-controlled regions: the iron(III) + iodide reaction at a rotating platinum disc catalyst, 977
Heterogeneous catalysis in solution. Part 25.—Contrasting behaviour of reduced and oxidised platinum surfaces in the catalysis of the reaction between cerium(IV) and mercury(I), 1383
Effect of supporting electrolyte on the mediated reducation of $[Fe(H_2O)_6]^{3+}$ by an osmium-containing poly(4-vinylpyridine) film, 1863
Rotating stabilised cell
Rotating stabilised cell: A new tool for the investigation of interfacial extraction kinetics between liquid phases, 2715
Rotation
Dielectric relaxation studies of solid solutions of monofluorobenzaldehydes in a polymer: Eyring parameters for aldehyde group rotation, 1127
Rotational energy profile
Model calculations of chemical interactions. Part 3.—Rotational energy profiles in simple molecules: evaluation, additivity and role of bond–bond, bond–lone-pair and lone-pair–lone-pair interactions, 249
Rotational energy transfer
Approximating relative rotational energy transfer in molecular collisions, 31
Rotational isomerism
Model calculations of chemical interactions. Part 3.—Rotational energy profiles in simple molecules: evaluation, additivity and role of bond–bond, bond–lone-pair and lone-pair–lone-pair interactions, 249
Rotationally adiabatic capture theory
Rate constant calculations on fast diatom–diatom reactions, 1667
Rotational motion
Rate constant calculations on fast diatom–diatom reactions, 1667
Rotational spectroscopy
Thermodynamic properties of hydrogen-bonded dimers B ··· HF from spectroscopy: B = HCN, CH_3CN, HC_2CN, $(CH_3)_3CCN$ and H_2O, 443
Rotational spectrum of phosphonium iodide vapour, 507
Rotational spectroscopy of a mixture of thiirane and hydrogen bromide: Detection and characterization of a short-lived complex $(CH_2)_2S \cdots HBr$ in a pulsed jet, 3327
Rotational structure
Intensity distribution of the rotational lines in the $D\ ^1\Sigma_u^+$–$X\ ^1\Sigma_g^+$ (0, 0) band of the N_2^{2+} ion, 2525
Rotational-translational coupling
Flow dynamics of supersonic molecular beams and the measurement of rotational–translational coupling parameters for N_2 and H_2, 1069
Rotational tunnelling
Rotational tunnelling of ammonia in two-dimensional metal–ammonia solutions, 73
Runge–Kutta method
Numerical calculations of the transient-state linear electric birefringence for a sudden application of an alternating field superimposed on a unidirectional field, 297
Ruthenium
Kinetics of corrosion of ruthenium dioxide hydrate by Ce^{IV} ions, 473
Reactivity of the surface paramagnetic species on polycrystalline ZnO and ZnO supported ruthenium with hydrogen and carbon

monoxide: An electron paramagnetic resonance investigation, 493
Hydrogenolysis of alkanes. Part 6.—Modification of supported ruthenium catalysts by vanadium pentaoxide, 767
Factors controlling the activity and selectivity of conversion of cyclohexane in the presence of hydrogen over ruthenium supported on alumina, 1801
Multiple-pulse ^1H nuclear magnetic resonance investigations of titania and ruthenium dispersed on titania, 1917
Reactivity of $Ru(bpy)_3^{+}$ towards the radicals originating from the scavenging of hydrogen atoms and hydroxyl radicals by methanol, ethanol, propan-2-ol, *tert*-butyl alcohol and formate ions in aqueous solution: a pulse radiolytic study, 2179
Oxidation of chloride to chlorine by Ce^{V} ions mediated by different Ru^{IV} and Ir^{IV} oxide-based catalysts, 3275

Ruthenium complexes
Decomposition products of trinuclear ruthenium complexes as effective catalysts of water oxidation, 313

Rydberg state
Multiphoton ionisation spectroscopy of the 3s(2 + 2, 1) and 4s(3 + 1) Rydberg states of acetone: Evidence for a molecular valence state at 153 nm, 2891
Vacuum-ultraviolet absorption spectra of propanone, butanone and the cyclic ketones $C_nH_{2n-2}O$ ($n = 4, 5, 6, 7$), 3343

Saliva
Calcium phosphate system in saliva-like media, 1759

SAPO molecular sieves
Infrared study of cyclohexanol chemisorption in SAPO molecular sieves, 3315

Secondary ion mass spectrometry
Relative positive-ion yields from transition-metal oxide systems under dynamic secondary ion mass spectrometry conditions, 875
Nature of the passive film on Fe–Cr alloys as studied by ^{18}O secondary ion mass spectrometry: reduction of the prior film and stability to *ex situ* surface analysis, 1011

Self-assembled monolayer
Molecular dynamics investigations of self-assembled monolayers, 2031

Self-association
Self-association of phenols in inert solvents. Apparent heat capacities of phenol, substituted phenols and aromatic alcohols in *n*-heptane, 1733
Self-association of cyclohexanols in inert solvents. Apparent heat capacities of cyclohexanol and substituted cyclohexanols in *n*-heptane and *n*-decane, 1739
Effect of steric hindrance and π electrons on alcohol self-association, 1745
Self-association of amphiphilic phenothiazine drugs in aqueous solutions of low ionic strength, 2971

Self-diffusion
Self-diffusion of cobalt and manganese ions in aqueous electrolyte solutions, 3405
Effect of the ratio of length of sphere to length of cylinder on adsorption and self-diffusion in a 'sphere-cylinder' micropore, 3791

Semiconductor
Iodine adsorption on InSb(001) at room temperature and low temperature: Surface reaction, 3259

Sephadex
Photophysics of Ru^{II} complexes with 1,4,5,8-tetraazaphenanthrene, incorporated into Sephadex SP C-25, 259

Sessile drop
Shape of a small sessile drop and the determination of contact angle, 1579

SF_6^+
Fragmentation of valance electronic states of SF_6^+ studied with synchrotron radiation, 1287

Shear stress
Stress-transfer mechanisms in electrorheological suspensions, 425

Shock wave
Kinetics of pyrolysis of furan, 815
High-temperature oxidation of ethanol. Part 1.—Ignition delays in shock waves, 1691

Silica
Properties of Rh-exchanged SiO_2–Al_2O_3 sol–gel catalysts, 199
Hydrophilic and hydrophobic sites on dehydrated crystalline and amorphous silicas, 497
EXAFS evidence for the formation of a V_2O_5 thin film by chemical vapour deposition on SiO_2, 1807
Transport of an adsorbing vapour in a model silica system, 1971
Spectroscopic investigation of the structure of silica-supported vanadium oxide catalysts at submonolayer coverages, 2635

Silica–alumina
Magic-angle spinning nuclear magnetic resonance studies of water molecules adsorbed on Brønsted- and Lewis-acid sites in zeolites and amorphous silica–aluminas, 657

Silica gel
Effect of porosity on the distribution and reactivity of hydroxyl groups on the surface of silica gel, 3899

Silicalite
Molecular dynamics studies on zeolites. Part 5.—Discussion of the structural changes of silicalite, 1657
Molecular simulation of methane and butane in silicalite, 1951

Silica monolith
Structural studies of gel phases. Part 2.—Infrared spectroscopic study of silica monoliths; the interaction of water with surface species, 3857

Silicoaluminophosphate
Investigation of hydroxyl groups in crystalline silicoaluminophosphate SAPO-34 by diffuse reflectance infrared spectroscopy, 897

Silicoaluminophosphate SAPO-37
Synthesis and properties of SAPO-37, 2679

Silicon
Kinetics of the reaction of silicon with gaseous bromine, 45

Silicon pseudohalide
Photoelectron spectroscopic studies of the silicon pseudohalides: Relationship between geometrical and electronic Structure, 3805

Silicon tetrabromide
Photoionisation mass-spectrometric study of fragmentation of $SiBr_4$ and $GeBr_4$ in the range 400–1220 Å, 3717

Silt
Ca–K–H exchange on silt-, clay- and silt + clay-size soil separates, 2501

Silver
Electron paramagnetic resonance study of the interactions of oxygen with silver/titania, 345

Single-crystal electron paramagnetic resonance spectroscopy
EPR study of the $[SiO_4/Li]^{\circ}$ centre in α-quartz, 3143

Single-crystal ENDOR
The Bruker Lecture. Single-crystal ^{13}C, ^{14}N and ^{23}Na ENDOR on $Fe(CN)_6^{3-}$ doped into NaCl, 3105

Sintering
De-sintering action of phosphorus in alumina–aluminium phosphates (AAP) containing transition-metal ions (M = Cr, Mn, Fe, Co, Ni, Cu, Zn), 901

Site energy density
A novel technique for the calculation of site energy densities from gas adsorption isotherm data, 3051

Small-angle neutron scattering
Determination of structures in ferrofluids by small-angle neutron scattering, 403
Structure and stability of microemulsion-based organo-gels, 3389

Small-angle X-ray scattering
Surface fractal dimension of microporous carbon fibres by nitrogen adsorption, 179
Simulation of small-angle X-ray scattering behaviour of activated carbon fibres adsorbing water, 2763
Characterization of adsorbed layers of a disordered coil protein on polystyrene latex, 3043

Sodalite
Ionic conductivity of halide sodalites, 3787

Sodium chloride
Transference numbers for NaCl in a 60 wt.% ethanol–water mixture at 25 °C, 603

Sol
Pulsed laser-induced oxidation of phenol in acid aqueous TiO_2 sols, 1097

Sol gel method
Structural studies of gel phases. Part 1.—Infrared spectroscopic study of silica monoliths; the effect of thermal history on structure, 761

Solid hydrate
Reorientation of water molecules in solid hydrates. Correlation with spectroscopic and structural data, 1193

Solid-state redox diode
Solid-state redox diode composed of an electropolymerized metallocene layer and a polymer electrolyte layer containing a redox couple in a mixed-valent state, 1771

Solubility
Thermochemical investigations of associated solutions. Part 14.—Calculation of anthracene–butyl acetate association parameters from measured solubility data, 461
Calcium phosphate system in saliva-like media, 1759
Solubility of ZnO and hydrolysis of $ZnCl_2$ in KCl melts, 2955

Solubization
Solubilization of doubly charged iron (II) complexes in aqueous neutral micellar aggregates. A kinetic investigation, 3033

Solution kinetics
Oxidation of formaldehyde by the hydroxyl radical in aqueous solution, 1513
Rotating stabilised cell: A new tool for the investigation of interfacial extraction kinetics between liquid phases, 2715

Solvation
Enthalpies of transfer of tetrabutylammonium bromide as indicators of the structure of aqueous solvents: aqueous methanol, ethanol, propan-1-ol, 2-methylpropan-2-ol and 1,4-dioxane systems, 87
Ion association and solvation of thiocyanates in water–dimethylformamide mixtures: an ultrasonic study, 287
Influence of non-ionic polymers on solvent properties of water as detected by studies of acid-base equilibria of sulphonephthalein and fluorescein dyes, 931
Theoretical approach to the solvation of nitroenamines and the influence of solvation on isomeric equilibria, 1719
Preferential solvation in mixed solvents. Part 6.—Binary mixtures containing methanol, ethanol, acetone or triethylamine and another organic solvent, 1843
Energetics for preferential solvation of a chromium complex in aqueous organic solvent, 2167
Free energy and enthalpy changes for the process of transfer from gas and from dilute aqueous solutions of some alkanes and monofunctional saturated organic compounds, 2433
Thermodynamics of solvation of ions. Part 5.—Gibbs free energy of hydration at 298.15 K, 2995

Solvatochromism
Preferential solvation in mixed binary solvents by ultraviolet–visible spectroscopy: N-ethyl-4-cyanopyridinium iodide in alcohol–acetone mixtures, 587
Polarity and hydrogen-bonding ability of some binary aqueous–organic mixtures, 1339
A new zwitterionic salt for non-linear optics: {4′-[Methyl(diphenyl)phosphonio]biphenyl-4-yl}triphenylborate, 2225

Solvent effect
Decarboxylation of hydrogencarbonatopentaamminecobalt(III) in aquo-organic solvent media, 3753

Solvent polarity
Correlation between the dielectric solvent polarity parameter, β, and rate and equilibrium constants for various processes, 2589

Solvent properties

Substitution reactions at pentacyanoferrate(II) complexes: Linear free-energy relationships in mixed solvents, 2573

Sonically induced narrowing nuclear magnetic resonance

Sonically induced narrowing of solid-state nuclear magnetic resonance spectra: a possible alternative to magic angle spinning nuclear magnetic resonance, 2253

Sorbed water

Interactions of sorbed water with starch studied using proton nuclear magnetic resonance spectroscopy, 2613

Sorption

Fourier-transform infrared study of pyridine sorbed on zeolite HY, 3319

Specific volume

Pressure–volume–temperature data and dielectric properties of liquid and solid 2,2-dimethylbutan-1-ol up to 300 MPa, 1149

Spectroelectrochemistry

Infrared spectroelectrochemical evidence for alkyl viologen radical monomers in acetonitrile, 1355

Spectrophotometry

Increased basicity and hydrogen-bonding donor ability of water by hydrogen bonding to dimethyl sulphoxide and its coordination to 1,4,8,11-tetramethyl-1,4,8,11-tetraazacyclotetradecanenickel(II) in nitrobenzene, 1537

Spin effects

Spin effects on spur kinetics: analytical models for single-species spurs, 2427

Spin effects on spur kinetics: independent pairs modelling of two-species spurs, 3601

Spin–lattice relaxation

Empirical correlations between thermodynamic and spectroscopic properties of aqueous solutions of alkan-*m*,*n*-diols. Excess enthalpies and spin–lattice relaxation times at 298.15 K, 2989

Spin–spin interaction

Electron spin-echo envelope modulation and spin–spin interaction studies of the iron–sulphur clusters in fumarate reductase of *escherichia coli*, 3199

Spur kinetics

Spin effects on spur kinetics: analytical models for single-species spurs, 2427

Spin effects on spur kinetics: independent pairs modelling of two-species spurs, 3601

Square-mound potential

Temperature dependence of the square-mound potential for 1 : 1 electrolytes in acetone, dimethyl sulphoxide and alcohols, 63

Stability constant

Electronic spectra of anionic mixed halide complexes in solution: identification, computation of spectra and stability constants and assignment of transitions of $[HgX_2Y]^-$ and $[HgX_2Y_2]^{2-}$, 1697

Interactions between cations and sugars. Part 6.—Calorimetric method for simultaneous determination of the stability constant and enthalpy change for weak complexation, 2173

Starch

Interactions of sorbed water with starch studied using proton nuclear magnetic resonance spectroscopy, 2613

Statistical mechanics

Temperature dependence of the square-mound potential for 1 : 1 electrolytes in acetone, dimethyl sulphoxide and alcohols, 63

Steric hindrance

Effect of steric hindrance and π electrons on alcohol self-association, 1745

Stilbene

Triplet–triplet and singlet–singlet energy-transfer studies between t-stilbene and 7-aminocoumarin laser dyes, 269

Silver(I) perturbation of (*E*)-(*Z*) photoisomerization of stilbene and azobenzene, 1303

Stirring

Evolution of the cluster-size distribution in stirred suspensions, 1163

Stopped-flow technique

Use of a stopped-flow technique to measure the rate constants at room temperature for reactions between the nitrate radical and various organic species, 2913

Stress autocorrelation function

Interfacial viscosities *via* stress autocorrelation functions, 2023

Structure

Microwave spectrum, structure, dipole moment and excited states of $(CH_3)_3CCP$, 9

Substituted phenylsilane

Calculated hyperpolarisabilities of substituted phenylsilanes, 3015

Sulphide mineral

Interactions between sulphide minerals and alkylxanthate ions. Part 1.—A vibrational spectroscopic study of the interactions between sphalerite and synthetic zinc(II) and cadmium(II) sulphides, and ethylxanthate ions in aqueous and acetone solutions, 2769

Interactions between sulphide minerals and alkylxanthate ions. Part 4.—Vibrational spectroscopic and calorimetric study of the interactions between galena and synthetic lead(II) sulphide, and alkylxanthate ions in aqueous, acetone and acetonitrile solutions, 2779

Sulphonephthalein dye

Influence of non-ionic polymers on solvent properties of water as detected by studies of acid-base equilibria of sulphonephthalein and fluorescein dyes, 931

Superconductivity

Microwave absorption characterization of the $YBa_2Cu_3O_{7-\delta}$ high-temperature superconductor prepared by different sintering and oxygen annealing times, 167

Intensity of the microwave absorption in high-temperature superconductors, 3893

Superconductor

Magnetic field dependent microwave absorption in high-T_c superconducting cuprates, 1209

Effect of density, magnetic field modulation and magnetic field penetration depth on the microwave absorption properties of $YBa_2Cu_3O_{7-\delta}$ superconductors, 3687

Supersonically cooled $CFCl_3$

Fluorescence spectroscopy of supersonically cooled CFCl, 2407

Supersonic jet

S_1–S_0 supersonic jet fluorescence spectra of *trans*-2-methylstyrene: An out-of-plane vinyl group in S_0, 3335

Methyl and vinyl torsional potentials in *cis*- and *trans*-3-methylstyrene from supersonic jet fluorescence spectra, 3585

Supported catalyst

Raman spectroscopic study of titania-supported vanadia catalysts, 653

Catalytic activity of supported heteropoly acids for reactions requiring strong acid centres, 749

Hydrogenolysis of alkanes. Part 6.—Modification of supported ruthenium catalysts by vanadium pentaoxide, 767

Passivation and reaction of nickel catalysts, 791

Spectroscopic investigation of the structure of silica-supported vanadium oxide catalysts at submonolayer coverages, 2635

Catalysis by polyoxometalates. Part 2.—^{29}Si nuclear magnetic resonance evidence for 12-molybdosilicate in silica-supported molybdenum catalysts, 2829

Comparison of grafted vanadia species on ZrO_2, TiO_2, SiO_2 and TiO_2/SiO_2 mixed oxides, 3299

Infrared study of CO adsorption on Pt–Rh/SiO_2 catalysts, 3435

Comparative investigation of hydrogen chemisorption and benzene hydrogenation activity of supported rhodium catalysts, 3449

Supported metal catalyst

Factors controlling the activity and selectivity of conversion of cyclohexane in the presence of hydrogen over ruthenium supported on alumina, 1801

Surface

Reactivity of the surface paramagnetic species on polycrystalline ZnO and ZnO supported ruthenium with hydrogen and carbon monoxide: An electron paramagnetic resonance investigation, 493

Effect of porosity on the distribution and reactivity of hydroxyl groups on the surface of silica gel, 3899

Surface acidity

Infrared and Raman study of the surface acidity of titania-supported vanadia catalysts, 1611

Structure and acidity of vanadium oxide layered on titania (anatase and rutile), 2629

Surface-catalysed recombination

Time-dependent chemiluminescence from the surface-catalysed recombination of O and NO on polycrystalline Ni, 2877

Surface charge

Electrophoresis of drops and bubbles, 1883

Surface chemistry

Interdependence of different parameters characterizing the chemistry of an activated carbon surface, 3557

Surface complex

Interactions between sulphide minerals and alkylxanthate ions. Part 1.—A vibrational spectroscopic study of the interactions between sphalerite and synthetic zinc(II) and cadmium(II) sulphides, and ethylxanthate ions in aqueous and acetone solutions, 2769

Interactions between sulphide minerals and alkylxanthate ions. Part 4.—Vibrational spectroscopic and calorimetric study of the interactions between galena and synthetic lead(II) sulphide, and alkylxanthate ions in aqueous, acetone and acetonitrile solutions, 2779

Kinetics of coadsorption of dioxygen and ammonia at a Zn(0001) surface: a theoretical model, 3563

Surface-enhanced Raman spectroscopy

Oxidative C—C bond scission of 1,2-dicarbonyl on a metallic copper surface: a surface-enhanced Raman scattering study, 1021

Surface oxide

Exchange-coupled Cr^V and Mo^V ions on the surface of CrO_x/ZrO_2 and MoO_x/ZrO_2: An electron paramagnetic resonance study, 3443

Surface spectroscopy

Auger electron, electron energy loss and secondary electron emission spectroscopic studies on the oxidation of zirconium at high temperatures and room temperature, 1591

Surface tension

Shape of a small sessile drop and the determination of contact angle, 1579

Surfactant

Bending energy of surfactant films, 949

Micellar growth of octaethylene glycol decyl ether, 957

Micelle reorganisation characterised by differential scanning calorimetry for aqueous solutions containing hexa-decyltrimethylammonium bromide and tetradecyltrimethylammonium bromide, 1169

Interfacial film of surfactant adsorbed at a solid/liquid interface, 2745

Temperature dependence of enthalpic properties of aqueous micellar solutions of some *N*-alkylnicotinamide chloride surfactants, 2983

Influence of functional groups and substituents on the adsorption of aromatic non-ionic surfactants at the Hg/ethylene glycol interface, 3399

Suspension

Settling suspensions of colloidal silica: Observations and X-ray measurements, 411

Stress-transfer mechanisms in electrorheological suspensions, 425

Evolution of the cluster-size distribution in stirred suspensions, 1163

Synchrotron radiation

Fragmentation of valance electronic states of SF_6^+ studied with synchrotron radiation, 1287

Synthesis

Electrosynthesis and analytical characterization of films obtained by oxidation of 2,6-diaminopyridine, 3515

Tailored synthesis
Influence of inorganic and organic additives on the tailored synthesis of iron oxides, 3875
Tautomerism
Hydrogen bonding and tautomerism in 3-substituted β-thioxoketones: an *ab initio* molecular orbital study, 1297
Taylor dispersion method
Ternary diffusion cofficients for the ill-conditioned systems KCl–KI–H_2O and NaCl–NaI–H_2O measured by a two-detector Taylor dispersion method, 3667
TCNQ
Electron paramagnetic resonance study of isolated free radical pairs in M^+ 18-crown-6 $TCNQ^-$. (TCNQ = 7,7',8,8'-tetracyano-*p*-quinodimethane; M = K, Rb), 2229
Temperature-programmed desorption
Synthesis and catalytic properties of MAPO-36 molecular sieve, 3309
Ternary diffusion coefficient
Ternary diffusion coefficients of 18-crown-6 ether–KCl–water by direct least-squares analysis of Taylor dispersion measurements, 597
Ternary system
Metastable phases and compounds in the ternary system Ag–Au–I, 625
***tert*-Butyl alcohol–water mixtures**
Dielectric relaxation of *tert*-butyl alcohol–water mixtures using a time-domain technique, 1569
tetraalkylammonium bromides
Electrical conductances for some tetraalkylammonium bromides, lithium tetrafluoroborate and tetrabutylammonium tetrabutylborate in propylene carbonate at 25 °C, 3511
Tetraazaphenanthrene
Photophysics of Ru^{II} complexes with 1,4,5,8-tetraazaphenanthrene, incorporated into Sephadex SP C-25, 259
Tetrabutylammonium tetrabutylborate
Electrical conductances for some tetraalkylammonium bromides, lithium tetrafluoroborate and tetrabutylammonium tetrabutylborate in propylene carbonate at 25 °C, 3511
Tetramethylammonium cation
Novel ionic plastic phase of $[(CH_3)_4N]SCN$ obtainable above 455 K studied by proton magnetic resonance, electrical conductivity and thermal measurements, 987
Tetrapyridylporphyrin
Radiolytic reduction of tetrapyridylporphyrins. Formation of a stable radical from tetrakis(*N*-methyl-2-pyridyl)porphyrin, 2567
Thermal decomposition
Kinetic study on the thermal decomposition of copper(II) oxalate, 161
Thermal unimolecular decomposition of cyclobutanemethanol, 691
Thermal decomposition of solid wegscheiderite, $Na_2CO_3 \cdot 3NaHCO_3$, 1911
Thermal vibration
Influence of viscosity on the thermal vibrations of a lamellar liquid crystal, 153
Thermodynamics
Thermodynamics of adsorption from solution: adsorption by activated carbon of the three binary systems involving n-butanol, n-heptane and n-dodecane, 755
Standard enthalpy of formation of hexamethyldisilane, 841
Heat capacities, self-association and complex formation in alcohol–ester systems, 1133
Thermodynamics of formation and the structure of polymetal alkaline-earth-metal(II) fluoride complexes in molten-nitrate media, 1141
Thermodynamic behaviour of binary systems of 1,4-dioxane with 1,2-dichloroethane, dichloromethane, trichloroethene, tetrachloroethene and cyclohexane. Vapour pressures and excess molar Gibbs energies, 1345
Thermodynamic predictions for isotopic fractionation by isotope-exchange reactions, 1351
Thermodynamics of the constant-volume principle for chemical processes involving the solvent, 1553
Free energy and enthalpy changes for the process of transfer from gas and from dilute aqueous solutions of some alkanes and monofunctional saturated organic compounds, 2433
Enthalpies of transfer of some non-electrolytes from acetonitrile to acetonitrile–methanol mixtures, 2443
Enthalpies of transfer of formamide, *N*-methylformamide, *N*,*N*-dimethylformamide and urea from water to some aqueous alcohol solvent systems at 298 K, 2447
Ethane-1,2-diol–2-methoxyethanol solvent system. Dependence of the relative permittivity and refractive index on the temperature and composition of the binary mixture, 2583
Temperature coefficients of half-wave potentials and entropies of transfer of cations in aprotic solvents, 2599
Determination of the thermodynamic parameters for transfer of alkoxyphenols from aqueous solution to SDS micelles by a Taylor–Aris diffusion technique, 2741
Calorimetric and volumetric studies of the interactions of some amides in water and in 6 mol dm^{-3} aqueous guanidinium chloride, 2975
Thermodynamics of solvation of ions. Part 5.—Gibbs free energy of hydration at 298.15 K, 2995
Characterization of poly(oxyethylene) complex formation with alkali-metal cations in a cation-exchange resin phase, 3027
Solution thermodynamics of amino acid-18-crown-6 and amino acid-cryptand 222 complexes in methanol and ethanol. Linear enthalphy-entropy compensation effect, 3231
Thermodynamic and rate parameters for alanine protonation reactions, 3241
Some new expressions concerning individual ionic activities and their physical significance, 3523
Effect of non-electrolyte properties on the enthalpic interaction coefficients for NaCl/NaI–non-electrolyte pairs in water. Dissolution enthalpies of NaCl and NaI in aqueous solutions of butan-2-one and 1,2-dimethoxyethane at 25 °C, 3661
Decarboxylation of hydrogencarbonatopentaamminecobalt(III) in aquo-organic solvent media, 3753
Thiirane–hydrogen bromide dimer
Rotational spectroscopy of a mixture of thiirane and hydrogen bromide: Detection and characterization of a short-lived complex $(CH_2)_2S \cdots HBr$ in a pulsed jet, 3327
Thin film
Electroactive bilayers employing conducting polymers. Part 2.—Speciation by *in situ* spectroscopy, 2209
Thiocyanate
Ion association and solvation of thiocyanates in water–dimethylformamide mixtures: an ultrasonic study, 287
Thioketene
High-resolution Fourier-transform infrared spectroscopy of $\nu_3 + \nu_8 H_2CCS$, $\nu_1 HDCCS$ and $\nu_1 D_2CCS$ in the gas phase: an improved r_s structure for thioketene, 1815
Thioxanthen-9-one
Photoreduction of thioxanthen-9-one and benzophenone by amines. Electrical conductivity and light emission studies, 1531
Thioxoketone
Hydrogen bonding and tautomerism in 3-substituted β-thioxoketones: an *ab initio* molecular orbital study, 1297
Thorium oxide
Early stages of Fischer-Tropsch activity on ThO_2 and $Th_{0.9}Ce_{0.1}O_2$, 1259
Time-resolved atomic emission
Kinetic investigation of the collisional quenching of Ca(4 ^3P) by C_4H_{10} at elevated temperatures (750–923 K). Time-resolved atomic emission and electronic energy transfer between Ca(4 ^3P_J) and CaH($X\ ^2\Sigma^+$) observed by molecular chemiluminescence, 1503
Time-resolved atomic fluorescence
Kinetic investigation of the time-resolved atomic fluorescence Ca(4 $^3P_1 \rightarrow 4\ ^1S_0$) and molecular chemiluminescence CaCl($A\ ^2\Pi$, $B\ ^2\Sigma^+ \rightarrow X\ ^2\Sigma^+$) following the pulsed dye-laser generation of Ca(4 ^3P) in the presence of CH_3Cl, 2413
Time-resolved chemiluminescence
Kinetic investigation of the time-resolved atomic fluorescence Ca(4 $^3P_1 \rightarrow 4\ ^1S_0$) and molecular chemiluminescence CaCl($A\ ^2\Pi$, $B\ ^2\Sigma^+ \rightarrow X\ ^2\Sigma^+$) following the pulsed dye-laser generation of Ca(4 ^3P) in the presence of CH_3Cl, 2413
Time-resolved fluorescence polarization
Reliability of parameters obtained from time-resolved fluorescence polarization in macroscopically isotropic liquid crystals and membrane vesicles, 2457
Time-resolved Fourier-transform infrared spectroscopy
Time resolved Fourier-transform infrared emission in the $O(^3P) + CHF(^1A')$ reaction, 2283
Time-resolved optical absorption spectroscopy
Triplet states of oligomeric axially bridged ruthenium phthalocyanines, 455
Time-resolved resonance fluorescence
Time-resolved study of hydrogen atoms in the H_2–O_2 system under conditions close to criticality, 2907
Tin dioxide
Decomposition of gaseous acetic acid on SnO_2, 2647
Tin oxide
Tin oxide surfaces. Part 21.—Infrared study of the chemisorption of 2,2,2-trifluoroethanol, 1,1,1,3,3,3-hexafluoropropan-2-ol, 1,1,1-trifluoropropan-2-one, 1,1,1,3,3,3-hexafluoropropan-2-one and trifluoroacetic acid on tin(IV) oxide gel, 1929
Titania
Electron paramagnetic resonance study of the interactions of oxygen with silver/titania, 345
Raman spectroscopic study of titania-supported vanadia catalysts, 653
Hydrogenolysis of alkanes. Part 7.—Hydrogenolysis of propane and of n-butane over Ir/TiO_2 and Os/TiO_2 catalysts, 775
State and localization of cobalt, nickel and copper ions adsorbed on titania (anatase), 907
γ-ray induced fluoropolymeric encapsulation of TiO_2 particles: an X-ray photoelectron spectroscopic investigation, 991
Infrared and Raman study of the surface acidity of titania-supported vanadia catalysts, 1611
Infrared and Raman study of the adsorption of nitrogen oxides on titania-supported vanadia catalysts, 1617
Multiple-pulse ^1H nuclear magnetic resonance investigations of titania and ruthenium dispersed on titania, 1917
Structure and acidity of vanadium oxide layered on titania (anatase and rutile), 2629
Photodeposition of uranium oxides onto TiO_2 from aqueous uranyl solutions, 3267
Titanium dioxide
Benzene–ammonia coadsorption on TiO_2 (anatase), 175
Titanium dioxide sol
Photoelectrophoresis of colloidal semiconductors. Part 2.—Transient experiments on TiO_2 particles, 3547
Toluene
Effect of Zn substitutions in $YBa_2Cu_3O_{6+x}$ phases on reactivity during the ammoxidation of toluene, 1265
Topology
Closed-shell three-connected clusters: Topological and group-theoretical aspects, 3353
Torsional potential
Methyl and vinyl torsional potentials in *cis*- and *trans*-3-methylstyrene from supersonic jet fluorescence spectra, 3585

Transference numbers
Transference numbers for NaCl in a 60 wt.% ethanol–water mixture at 25 °C, 603
Transient species
Microwave spectroscopy of pyrolytically produced, rapidly isolated transient molecules, 3325
Transition-metal ion
Topological investigations of the state of some transition-metal ions in some binary mixtures of non-electrolytes: Molar excess volumes, 2579
Transition-metal oxide
Relative positive-ion yields from transition-metal oxide systems under dynamic secondary ion mass spectrometry conditions, 875
Transition-state theory
Hindered rotor model for radical association reactions, 2291
Transmitted-light spectroscopy
Counter-ion specificity in colloidal 'crystals' and 'liquids' as studied by transmitted-light spectroscopy, 1361
Transport properties
Transport properties of copper(I) perchlorates in mixed solvents. Part 1.—Transference numbers of copper(I) perchlorate in acetonitrile–*N*,*N*-dimethylacetamide mixtures at 25 °C, 1155
Trifluoronitrosomethane
Near-threshold electron energy-loss (0–9 eV) and optical absorption (5–11.8 eV) spectroscopy of trifluoronitrosomethane (CF_3NO), 2887
Trimethyl arsine
Photochemistry of trimethyl arsine at 193 nm, 2383
Triphenylene derivative
One-dimensional singlet energy migration in the columnar liquid crystal of a triphenylene derivative, 1785
TRIPLE
Electron paramagnetic resonance, ENDOR and TRIPLE resonance studies on substitution reactions of 2-methyl-1,4-benzoquinone and 2,3-dimethoxy-5-methyl-1,4-benzoquinone in alkaline methanol, 3163
Triplet state
Effects of water on the phosphorescence spectra of aromatic carbonyl compounds. Part 1.—Dual phosphorescence of benzophenone at 77 K in 2,2,2-trifluoroethanol–water, 449
Triplet states of oligomeric axially bridged ruthenium phthalocyanines, 455
Benzophenone sensitization of triplet oxazine and of delayed fluorescence by oxazine in acetonitrile solution, 547
Association reaction of CH_3 and NO: evidence for the involvement of the triplet surface, 2317
Interaction of halide and pseudohalide ions with the triplet state of 1-nitronaphthalene. Effect of acidity: a flash photolysis study, 3617
Tungstosilicic acid
Specific modification of the external surface of ZSM-5 zeolites by 12-tungstosilicic acid, 1461
Turbidity
Flocculation of silica particles by adsorbing and non-adsorbing polymers, 2201
Ultramicropore
Ultramicropores in microporous carbon fibres evidenced by helium adsorption at 4.2 K, 1915
Ultrasonic relaxation
Micellar effect on the kinetics of the base equilibrium of amino acids studied by the ultrasonic absorption method, 1857
Ultrasound
Ion association and solvation of thiocyanates in water–dimethylformamide mixtures: an ultrasonic study, 287
Ultraviolet spectroscopy
Laser flash photolysis study of the UV spectrum and kinetics of reactions of $HOCH_2CH_2O_2$ radicals, 2351
Ultraviolet absorption spectra of the CH_2Cl and $CHCl_2$ radicals and the kinetics of their self-recombination reactions from 273 to 686 K, 2367
Photochemistry of trimethyl arsine at 193 nm, 2383
Unimolecular decomposition
Thermal unimolecular decomposition of cyclobutanemethanol, 691
Flash photolysis study of the $CH_3O_2 + CH_3O_2$ and $CH_3O_2 + HO_2$ reactions between 600 and 719 K: Unimolecular decomposition of methylhydroperoxide, 3213
Uranium oxides
Photodeposition of uranium oxides onto TiO_2 from aqueous uranyl solutions, 3267
Urea
Calorimetric and volumetric studies of the interactions of some amides in water and in 6 mol dm^{-3} aqueous guanidinium chloride, 2975
Structural properties of α,ω-dibromoalkane/urea inclusion compounds: A new type of interchannel guest molecule ordering, 3423
UV absorption spectroscopy
UV absorption spectrum and self-reaction of cyclohexylperoxy radicals, 3221
UV–VIS spectroscopy
Preferential solvation in mixed binary solvents by ultraviolet–visible spectroscopy: N-ethyl-4-cyanopyridinium iodide in alcohol–acetone mixtures, 587
Ultraviolet–visible and electron paramagnetic resonance spectroelectrochemical studies of the reduction products of some anthraquinone sulphonates in aqueous solutions, 3653
Ultraviolet–visible absorption spectra of the colloidal metallic elements, 3881
Vacancy diffusion
Vacancy diffusion in colloidal crystals, 391
Vacuum ultraviolet absorption spectroscopy
Electronic states of some simple ethers studied by vacuum ultraviolet absorption and near-threshold electron energy-loss spectroscopy, 1049
Vacuum-ultraviolet absorption spectra of propanone, butanone and the cyclic ketones $C_nH_{2n-2}O$ ($n = 4, 5, 6, 7$), 3343
Vacuum UV emission spectroscopy
Intensity distribution of the rotational lines in the D $^1\Sigma_u^+$–X $^1\Sigma_g^+$ (0, 0) band of the N_2^{2+} ion, 2525
Valence-bond calculation
Some *ab initio* valence-bond calculations for NO_2, 1089
Valinomycin
Free energies underlying ion binding and transport in protein channels: Free energy perturbation simulations in ion binding and selectivity for valinomycin, 2099
Vanadia
Raman spectroscopic study of titania-supported vanadia catalysts, 653
Infrared study of the reaction between nitrogen oxides and ammonia on titania-supported vanadia catalysts, 1473
Infrared and Raman study of the surface acidity of titania-supported vanadia catalysts, 1611
Infrared and Raman study of the adsorption of nitrogen oxides on titania-supported vanadia catalysts, 1617
EXAFS evidence for the formation of a V_2O_5 thin film by chemical vapour deposition on SiO_2, 1807
Structure and acidity of vanadium oxide layered on titania (anatase and rutile), 2629
Spectroscopic investigation of the structure of silica-supported vanadium oxide catalysts at submonolayer coverages, 2635
Comparison of grafted vanadia species on ZrO_2, TiO_2, SiO_2 and TiO_2/SiO_2 mixed oxides, 3299
van der Waals complex
Dispersion energy of a van der Waals complex of an aromatic molecule and a rare-gas atom, 2391
van der Waals interaction
Temperature and chain-length dependence of the volumetric properties of 1-chlorobutane–alkane mixtures, 93
Vapour deposition
Low-pressure photochemical vapour deposition of gallium metal from an iodide precursor, 995
Vapour–liquid equilibrium
Prediction of vapour–liquid equilibrium data for binary mixtures from molecular parameters using a generalized London potential, 57
Vermiculite
Local environment of intercalated lanthanide ions in vermiculite, 3077
Vibrationally mediated photodissociation
Vibrationally mediated photodissociation of nitrous acid, 3461
Vibrational relaxation
Vibrational relaxation of HCN by ^3He, ^4He, H_2, HD, D_2, CH_4 and C_2H_6, 807
Vibrational spectroscopy
Thermodynamic properties of hydrogen-bonded dimers B ··· HF from spectroscopy: B = HCN, CH_3CN, HC_2CN, $(CH_3)_3CCN$ and H_2O, 443
Vibrational spectroscopy at high pressures. The crystal structure of $Re(CO)_5I$, the vibrational spectra of the manganese and rhenium pentacarbonyl chlorides and iodides, and their behaviour under high pressure, 1831
Vibrational-state distribution
Vibrational-state distribution of CO_2 produced in the reaction between OH radicals and CO, 1037
Vibration–rotation parameter
Microwave spectrum for bromo(sulphido)boron, BrBS, 1
Viologen
Infrared spectroelectrochemical evidence for alkyl viologen radical monomers in acetonitrile, 1355
Virial coefficient
Viscosities and pair potential energy function for the argon–methane gas-phase interaction, 2161
Viscoelasticity
Molecular mobility, structure and a new model of the carboxymethylchitin–alkaline-earth metal complex in aqueous systems, 3841
Viscosity
Influence of viscosity on the thermal vibrations of a lamellar liquid crystal, 153
Transport properties of copper(I) perchlorates in mixed solvents. Part 2.—Conductance and viscosity measurements of bis(2,9-dimethyl-1,10-phenanthroline)copper(I) perchlorate in binary solvent mixtures containing acetonitrile, 1159
Effect of long-range repulsive forces on the viscosity of concentrated latices: comparison of experimental data with an effective hard-sphere model, 1365
Viscosities and pair potential energy function for the argon–methane gas-phase interaction, 2161
Voltammetry
Electrochemical study on calix[4]quinone and calix[4]hydroquinone in *N*,*N*-dimethylformamide, 1575
Thermodynamics and kinetics of heterogeneous electron transfer at glassy carbon/osmium-containing metallopolymer interfaces, 3769
Volumetric property
Temperature and chain-length dependence of the volumetric properties of 1-chlorobutane–alkane mixtures, 93
Water
Decomposition products of trinuclear ruthenium complexes as effective catalysts of water oxidation, 313
Influence of non-ionic polymers on solvent properties of water as detected by studies of acid-base equilibria of sulphonephthalein and fluorescein dyes, 931
Water-gas shift reaction
Infrared study of CO adsorption on reduced and oxidised silica-supported copper catalysts, 1467
Wave profile
Wave profile in the acidic nitrate–ferroin reaction, 3613
Wegscheiderite
Thermal decomposition of solid wegscheiderite, $Na_2CO_3 \cdot 3NaHCO_3$, 1911
Investigation of the formation of wegscheiderite, $Na_2CO_3 \cdot 3NaHCO_3$, 3683
Wetting transition
Wetting transitions and capillary condensation in slit-like pores: Comparison of simulation and

density functional theory, 3415
Work function
Change in the work function of zirconium by oxidation at high temperatures and low oxygen pressures, 1399
Xanthine oxidase
Electron spin-echo spectroscopy of the iron–sulphur clusters of xanthine oxidase from milk, 3203
Xenon
Computer simulation of xenon dimer formation in a dense inert-gas environment, 831
X-Irradiation
Adsorption of carbonate-derived molecules on the surface of carbonate-containing apatites, 3137
X-Ray diffraction
Characterization of chabazite and chabazite-like zeolites of unusual composition, 1031
Crystallinity of uniform oligo(oxyethylene) mono-*n*-alkyl ethers studied by X-ray diffraction and differential scanning calorimetry, 1183
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 1.—Preparation and characterization, 1623
Iron oxide dehydrogenation catalysts supported on magnesium oxide. Part 2.—Reduction behaviour, 1631
Reaction characteristics of hydroxyapatite with F^- and PO_3F^{2-} ions. Chemical states of fluorine in hydroxyapatite, 2235
Effects of exchangeable cations on the adsorption properties of Na^+ mordenite, 2849
Distribution of cations in lanthanum-exchanged NaY zeolites, 2855
Structural properties of α,ω-dibromoalkane/urea inclusion compounds: A new type of interchannel guest molecule ordering, 3423
X-Ray fluorescence spectroscopy
Dispersion and 3-picoline ammoxidation investigation of V_2O_5/α-Al_2O_3 catalysts, 1649
X-Ray photoelectron spectroscopy
Redox behaviour of copper(II) ion pairs as surface species on CuTh oxide catalysts. Electron paramagnetic resonance and X-ray photoelectron spectroscopy study, 631
γ-ray induced fluoropolymeric encapsulation of TiO_2 particles: an X-ray photoelectron spectroscopic investigation, 991
Effect of Zn substitutions in $YBa_2Cu_3O_{6+x}$ phases on reactivity during the ammoxidation of toluene, 1265
A study of oxidation of CoTi by X-ray photoelectron spectroscopy, 2755
Studies of the oxidation state and location of palladium species in Al_{13}-pillared montmorillonite, 3083
Determination by X-ray photoelectron spectroscopy of the electronic state of Pd clusters in Y zeolite, 3703
X-Ray powder diffraction
Investigation of the formation of wegscheiderite, $Na_2CO_3 \cdot 3NaHCO_3$, 3683
X-Ray structure characterization
Synthesis, electron paramagnetic resonance and X-ray structure characterization of copper(II) ternary complexes of *p*-aminobenzoic and 3,4-dimethoxyhydrocinnamic acid with phenanthrolines, 3863
X-Ray tomography measurements
Settling suspensions of colloidal silica: Observations and X-ray measurements, 411
Xylene
Molecular dynamics of xylene in Na, Yb-Y and ZSM-5 studied by quasi-elastic neutron scattering, 3455
Y–Ba–Cu–O phase
Effect of Zn substitutions in $YBa_2Cu_3O_{6+x}$ phases on reactivity during the ammoxidation of toluene, 1265
Yttrium cluster
Reactions of yttrium atoms in hydrocarbon matrices: Electron paramagnetic resonance evidence for matrix-isolated YO and Y_n ($n = 5$ or 7), 3189
Zeeman spin–lattice relaxation
Orientation dependence of ^2H nuclear spin relaxation in trimethyl [$^2H_9$] ammonium tetraphenylborate, 1715
Zeolite
Magic-angle spinning nuclear magnetic resonance studies of water molecules adsorbed on Brønsted- and Lewis-acid sites in zeolites and amorphous silica–aluminas, 657
Transformation of butanes over ZSM-5 zeolites. Part 1.—Mechanisms of cracking over H-ZSM-5, 663
Transformation of butanes over ZSM-5 zeolites. Part 2.—Formation of aromatic hydrocarbons over Zn-ZSM-5 and Ga-ZSM-5, 669
Bimolecular hydrogen transfer over zeolites and SAPOs having the faujasite structure, 783
Fast hydrothermal ammonium exchange of zeolite Na-Y, 787
Electron paramagnetic resonance study of hydrocarbon accommodation in copper(II)-exchanged zeolite ZSM-5 and related materials, 1025
Liquid-phase adsorption of binary ethanol–water mixtures on high-silica adsorbents, 1279
Liquid-phase adsorption of ethanol–water mixtures on NaZSM-5 zeolite with inorganic and organic binders, 1283
Migration and coalescence of Pd carbonyl clusters in zeolite Y, 1413
Specific modification of the external surface of ZSM-5 zeolites by 12-tungstosilicic acid, 1461
Molecular dynamics studies on zeolites. Part 5—Discussion of the structural changes of silicalite, 1657
Fourier-transform pulsed-field-gradient ^1H nuclear magnetic resonance investigation of the diffusion of light *n*-alkanes in zeolite ZSM-5, 1935
Molecular dynamics studies of hydrocarbon diffusion in zeolites, 1947
Self-diffusion of water into a ferrierite-type zeolite by molecular dynamics simulations, 1959
Role of iron impurities in formation of electron-accepting sites in H-ZSM-5 zeolites: ^{15}N nuclear magnetic resonance and ^{15}N nuclear magnetic relaxation of adsorbed N_2 and N_2O, 2247
Infrared spectroscopic study of the interaction of cations in zeolites with simple molecular probes. Part 1.—Adsorption of molecular hydrogen on alkaline forms of zeolites as a test for localization sites, 2675
Synthesis and properties of SAPO-37, 2679
Computer simulation of the Si,Al distribution in dealuminated zeolite Y, 2837
Electron paramagnetic resonance studies of the formation of alkali-metal particles and ionic clusters in alkali-metal-loaded X zeolites, 2843
Effects of exchangeable cations on the adsorption properties of Na^+ mordenite, 2849
Distribution of cations in lanthanum-exchanged NaY zeolites, 2855
Treatment of boron-containing pentasil-type zeolites under 'boron-extracting' conditions, 3099
Electron-nuclear double resonance of long-lived radicals in aged X- and Y-type zeolite catalysts, 3151
Electron paramagnetic resonance and electron spin-echo modulation measurements of sodium and potassium ionic clusters in X and Y zeolites, 3157
Fourier-transform infrared study of pyridine sorbed on zeolite HY, 3319
Molecular dynamics of xylene in Na, Yb-Y and ZSM-5 studied by quasi-elastic neutron scattering, 3455
Effect of zeolite structure and morphology on intracrystalline *n*-hexane diffusion in pentasil zeolites studied by the zero-length column method, 3575
Determination by X-ray photoelectron spectroscopy of the electronic state of Pd clusters in Y zeolite, 3703
Conversion of faujasites to high-silica chabazite SSZ-13 in the presence of *N,N,N*-trimethyl-1-adamantammonium iodide, 3709
Electrochemistry of zeolite-encapsulated cobalt salen complexes in acetonitrile and dimethyl sulphoxide solutions, 3831
Studies of the influence of a magnetic field on the diffusion of spilt-over deuterium on Y zeolites, 3921
Zeolite synthesis
Organic-free synthesis, structure and properties of multicomponent ZSM-5 type zeolites, 2507
Synthesis of zeolite Na-A form Metakaolinite revisited, 3091
Zero-length column method
Effect of zeolite structure and morphology on intracrystalline *n*-hexane diffusion in pentasil zeolites studied by the zero-length column method, 3575
Zinc
Reactivity of the surface paramagnetic species on polycrystalline ZnO and ZnO supported ruthenium with hydrogen and carbon monoxide: An electron paramagnetic resonance investigation, 493
Transformation of butanes over ZSM-5 zeolites. Part 2.—Formation of aromatic hydrocarbons over Zn-ZSM-5 and Ga-ZSM-5, 669
Zinc aluminate
Catalytic properties of copper oxide supported on zinc aluminate in methane combustion, 1795
Zirconia
Surface species on a palladium/zirconia CO oxidation catalyst prepared from a glassy metal precursor: characterization by diffuse reflectance FTIR spectroscopy, 333
Exchange-coupled Cr^V and Mo^V ions on the surface of CrO_x/ZrO_2 and MoO_x/ZrO_2: An electron paramagnetic resonance study, 3443
Zirconium
Change in the work function of zirconium by oxidation at high temperatures and low oxygen pressures, 1399
Auger electron. electron energy loss and secondary electron emission spectroscopic studies on the oxidation of zirconium at high temperatures and room temperature, 1591
Zirconium phosphite
Nature of zirconium phosphite as an acidic catalyst, 1419
Zn(0001) surface
Kinetics of coadsorption of dioxygen and ammonia at a Zn(0001) surface: a theoretical model, 3563
